

## Dual Floating Wall-Mounted AV Shelves, Adjustable Height Shelf For Under TV, Organize A/V Equipment On Black Tempered Glass Shelves

ID prodotto: 2B-WALL-MOUNT-SHELF

The floating wall mount AV shelf features two 5mm thick black tempered glass shelves, providing an unobstructed surface ideal for organizing AV components under or above a TV or display.

The shelf's bracket mounts to a single wall stud or a concrete wall, with all necessary hardware for installation on a wooden stud or concrete wall, as well as a quick-installation guide, included.

The shelves are height adjustable along the 13.6-inch (346mm) wall mount bracket, allowing for customization to accommodate various AV equipment sizes and configurations, such as video conferencing equipment or an AV receiver.

Supported by steel brackets, each shelf can support up to 15.4 lbs (7kg). The aluminum wall bracket is sturdy yet lightweight for easier installation, while the tempered glass shelves are more resistant to scratches and shattering than traditional glass.

Cutouts along each side of the wall-mount bracket and pre-scored knockouts on the top and bottom caps provide additional options for cable positioning.
