## Multitask with Ease

### Picture-by-Picture (PBP) & Keyboard, Video, Mouse (KVM)

PBP lets you display output from two PCs side-by-side on one monitor. A KVM switch lets you control multiple computers with one set of keyboard, mouse, and monitor.

### Picture in Picture (PIP)

PIP lets you multitask efficiently by displaying a smaller window within your main display.

### Choosing the Right Aspect Ratio

Different monitor aspect ratios offer unique advantages. While the standard 16:9 is versatile, ultrawide 21:9 and super ultrawide 32:9 monitors provide immersive experiences and enhanced productivity.
