

MPN: LV-OTDR-1

OTDR Fibre Optical SM Tester

1310/1550nm 32/30dB

The LV-OTDR-1 OTDR features a 5.6-inch capacitive touchscreen and integrates functions such as dynamic and expert OTDR, event map, OPM, VFL, RJ45 tracking, stable light source, and intelligent diagnosis. It supports 1:32/1:64 splitter testing, end-face inspection, loss analysis, system settings, and multilingual support.

With a dynamic range of up to 45dB, it can test distances over 180km. It supports up to four wavelengths (1310/1550/850/1300nm) with test wavelengths at 1310/1550/1625nm. The minimum event blind zone is 0.8m, and the max sampling resolution is 2.5cm.

Powered by a 5200mAh high-capacity battery with smart power-saving and power bank support, it accurately measures fiber length, loss, and connection quality. Ideal for FTTH, metro networks, backbone systems, and R&D applications.

- Maximum dynamic range of 45dB, 256k data Sampling point
- Automatic monitoring function of communication lights
- Supports eight languages and SOR file format
- Professional OTDR: measurement, curve, list
- The map is displayed simultaneously
- A light source that supports continuous/ modulated mode output
- Automatic OTDR: One-click testing, no complex Settings required
- Intelligent diagnosis support: 1:32/1:64 splitter testing

Specifications

Battery	Battery Technology	Lithium-Ion (Li-Ion)
Operational conditions	Operating temperature (T-T)	-5 - 50 °C
	Storage temperature (T-T)	-20 - 70 °C
Packaging content	AC adapter included	Yes
Technical details	Built-in display	Yes
	Calibrated wavelengths	850, 1300, 1310, 1490, 1550, 1625 nm
	Easy to use	Yes
Vendor information	Brand Name	Lanview
	Warranty	3 Year(s)
