KW 9100 SLIM
Rechargeable designer keyboard for discerning customers

CHERRY

Models may vary from the image shown

The CHERRY KW 9100 SLIM not only looks fabulous, but also offers numerous extra features, state-of-the-art technology and the highest quality workmanship.

The extra flat keyboard is connected either via Bluetooth® or with the included 2.4 GHz wireless USB receiver. You can conveniently change between the two connection types with a sliding switch. For example, you can connect to a laptop via Bluetooth® and also to a PC using the 2.4ghz wireless receiver. Data transmission uses AES 128 encryption in both cases and a range of up to 10 meters is also sufficient for use with a TV or game console.
The built-in rechargeable battery allows you to work for weeks without charging the keyboard. After that, simply plug the included USB-A to USB-C cable into a free port, even while working. To ensure that the rechargeable batteries are still charged after a holiday, the wireless keyboard can be turned off completely with a switch.

The wireless computer keyboard is fitted with a built-in metal plate for maximum stability and rigidity. If you prefer a steeper angle while typing, you can adjust the wireless keyboard using the removable magnetic strip. CHERRY's own SX scissor technology mechanism with a low-profile keystroke

ensures an ideal typing experience.

Status LEDs are integrated directly into the respective keys. This allows you to see at a glance whether the caps, scroll, or Num-Lock keys are activated. In addition, these keys flash to warn that the battery charging status is low. The 6 additional keys have proved to be extremely convenient and practical: "Windows lock", "Open browser", "Volume Down", "Volume Up", "Mute" and "Open calculator". If that's not enough for you, the special keys (as well as the F-keys) can be freely programmed with the free CHERRY KEYS software.
Regardless of whether you use it for mobile working, in the office or home. the KW 9100 SLIM keyboard is your constant, stylish companion. Bluetooth® or wireless connectivity mean that there are no limits to what you can do with it.
