About this manual

This manual contains service and reference information for the following Lenovo products.

Model name	Machine type (MT)
- Yoga Book 9 13IMU9 - Yoga Book 9 13IMU9 1	83FF

Important:

- This manual is intended only for trained service technicians who are familiar with Lenovo products.
- Before servicing a Lenovo product, be sure to read all the information under Chapter 1 “Safety information” on page 1.

Chapter 1. Safety information

This chapter presents the following safety information that you need to be familiar with before you service a Lenovo notebook computer.

General safety

Follow these rules to ensure general safety:

- Observe good housekeeping in the area of the machines during and after maintenance.
- When lifting any heavy object:
 1. Make sure that you can stand safely without slipping.
 2. Distribute the weight of the object equally between your feet.
 3. Use a slow lifting force. Never move suddenly or twist when you attempt to lift.
 4. Lift by standing or by pushing up with your leg muscles; this action removes the strain from the muscles in your back. *Do not attempt to lift any object that weighs more than 16 kg (35 lb) or that you think is too heavy for you.*
- Do not perform any action that causes hazards to the customer, or that makes the equipment unsafe.
- Before you start the machine, make sure that other service technicians and the customer's personnel are not in a hazardous position.
- Place removed covers and other parts in a safe place, away from all personnel, while you are servicing the machine.
- Keep your tool case away from walk areas so that other people will not trip over it.
- Do not wear loose clothing that can be trapped in the moving parts of a machine. Make sure that your sleeves are fastened or rolled up above your elbows. If your hair is long, fasten it.
- Insert the ends of your necktie or scarf inside clothing or fasten it with a non-conductive clip, about 8 centimeters (3 inches) from the end.
- Do not wear jewelry, chains, metal-frame eyeglasses, or metal fasteners for your clothing.

Attention: Metal objects are good electrical conductors.

- Wear safety glasses when you are hammering, drilling, soldering, cutting wire, attaching springs, using solvents, or working in any other conditions that might be hazardous to your eyes.
- After service, reinstall all safety shields, guards, labels, and ground wires. Replace any safety device that is worn or defective.
- Reinstall all covers correctly before returning the machine to the customer.
- Fan louvers on the machine help to prevent overheating of internal components. Do not obstruct fan louvers or cover them with labels or stickers.

Electrical safety

Observe the following rules when working on electrical equipment.

Important: Use only approved tools and test equipment. Some hand tools have handles covered with a soft material that does not insulate you when working with live electrical currents. Many customers have, near their equipment, rubber floor mats that contain small conductive fibers to decrease electrostatic discharges. Do not use this type of mat to protect yourself from electrical shock.

- Find the room emergency power-off (EPO) switch, disconnecting switch, or electrical outlet. If an electrical accident occurs, you can then operate the switch or unplug the power cord quickly.
- Do not work alone under hazardous conditions or near equipment that has hazardous voltages.
- Disconnect all power before:
 - Performing a mechanical inspection
 - Working near power supplies

- Removing or installing main units
- Before you start to work on the machine, unplug the power cord. If you cannot unplug it, ask the customer to power-off the wall box that supplies power to the machine, and to lock the wall box in the off position.
- If you need to work on a machine that has *exposed* electrical circuits, observe the following precautions:
 - Ensure that another person, familiar with the power-off controls, is near you.

Attention: Another person must be there to switch off the power, if necessary.

- Use only one hand when working with powered-on electrical equipment; keep the other hand in your pocket or behind your back.

Attention: An electrical shock can occur only when there is a complete circuit. By observing the above rule, you may prevent a current from passing through your body.

- When using testers, set the controls correctly and use the approved probe leads and accessories for that tester.
- Stand on suitable rubber mats (obtained locally, if necessary) to insulate you from grounds such as metal floor strips and machine frames.

Observe the special safety precautions when you work with very high voltages; Instructions for these precautions are in the safety sections of maintenance information. Use extreme care when measuring high voltages.

- Regularly inspect and maintain your electrical hand tools for safe operational condition.
- Do not use worn or broken tools and testers.
- *Never assume* that power has been disconnected from a circuit. First, *check* that it has been powered off.
- Always look carefully for possible hazards in your work area. Examples of these hazards are moist floors, non-grounded power extension cables, power surges, and missing safety grounds.
- Do not touch live electrical circuits with the reflective surface of a plastic dental mirror. The surface is conductive; such touching can cause personal injury and machine damage.
- Do not service the following parts *with the power on* when they are removed from their normal operating places in a machine:
 - Power supply units
 - Pumps
 - Blowers and fans
 - Motor generators
 - Similar units as listed above

This practice ensures correct grounding of the units.

- If an electrical accident occurs:
 - Use caution; do not become a victim yourself.
 - Switch off power.
 - Send another person to get medical aid.

Safety inspection guide

The purpose of this inspection guide is to assist you in identifying potentially unsafe conditions. As each machine was designed and built, required safety items were installed to protect users and service technicians from injury. This guide addresses only those items. You should use good judgment to identify potential safety hazards due to attachment of non-Lenovo features or options not covered by this inspection guide.

If any unsafe conditions are present, you must determine how serious the apparent hazard could be and whether you can continue without first correcting the problem.

Consider these conditions and the safety hazards they present:

- Electrical hazards, especially primary power (primary voltage on the frame can cause serious or fatal electrical shock)
- Explosive hazards, such as a damaged cathode ray tube (CRT) face or a bulging capacitor
- Mechanical hazards, such as loose or missing hardware

To determine whether there are any potentially unsafe conditions, use the following checklist at the beginning of every service task. Begin the checks with the power off, and the power cord disconnected.

Checklist:

1. Check exterior covers for damage (loose, broken, or sharp edges).
2. Power off the computer. Disconnect the power cord.
3. Check the power cord for:
 - a. A third-wire ground connector in good condition. Use a meter to measure third-wire ground continuity for 0.1 ohm or less between the external ground pin and the frame ground.
 - b. The power cord should be the authorized type specified for your computer. Go to: <http://www.lenovo.com/serviceparts-lookup>
 - c. Insulation must not be frayed or worn.
4. Check for cracked or bulging batteries.
5. Remove the cover.
6. Check for any obvious non-Lenovo alterations. Use good judgment as to the safety of any non-Lenovo alterations.
7. Check inside the unit for any obvious unsafe conditions, such as metal filings, contamination, water or other liquids, or signs of fire or smoke damage.
8. Check for worn, frayed, or pinched cables.
9. Check that the power-supply cover fasteners (screws or rivets) have not been removed or tampered with.

Handling devices that are sensitive to electrostatic discharge

Any computer part containing transistors or integrated circuits (ICs) should be considered sensitive to electrostatic discharge (ESD). ESD damage can occur when there is a difference in charge between objects. Protect against ESD damage by equalizing the charge so that the machine, the part, the work mat, and the person handling the part are all at the same charge.

Notes:

1. Use product-specific ESD procedures when they exceed the requirements noted here.
2. Make sure that the ESD protective devices you use have been certified (ISO 9000) as fully effective.

When handling ESD-sensitive parts:

- Keep the parts in protective packages until they are inserted into the product.
- Avoid contact with other people.
- Wear a grounded wrist strap against your skin to eliminate static on your body.
- Prevent the part from touching your clothing. Most clothing is insulative and retains a charge even when you are wearing a wrist strap.
- Use a grounded work mat to provide a static-free work surface. The mat is especially useful when handling ESD-sensitive devices.
- Select a grounding system, such as those listed below, to provide protection that meets the specific service requirement.

Note: The use of a grounding system to guard against ESD damage is desirable but not necessary.

- Attach the ESD ground clip to any frame ground, ground braid, or green-wire ground.
- When working on a double-insulated or battery-operated system, use an ESD common ground or reference point. You can use coax or connector-outside shells on these systems.
- Use the round ground prong of the ac plug on ac-operated computers.

Grounding requirements

Electrical grounding of the computer is required for operator safety and correct system function. Proper grounding of the electrical outlet can be verified by a certified electrician.

Safety notices (multilingual translations)

The safety notices in this section are provided in the following languages:

- English
- Arabic
- Brazilian Portuguese
- French
- German
- Hebrew
- Japanese
- Korean
- Spanish
- Traditional Chinese

DANGER

Before the computer is powered on after FRU replacement, make sure that all screws, springs, and other small parts are in place and are not left loose inside the computer. Verify this by shaking the computer and listening for rattling sounds. Metallic parts or metal flakes can cause electrical short circuits.

DANGER

Some standby batteries contain a small amount of nickel and cadmium. Do not disassemble a standby battery, recharge it, throw it into fire or water, or short-circuit it. Dispose of the battery as required by local ordinances or regulations. Use only the battery in the appropriate parts listing. Use of an incorrect battery can result in ignition or explosion of the battery.

DANGER

The battery pack contains small amounts of nickel. Do not disassemble it, throw it into fire or water, or short-circuit it. Dispose of the battery pack as required by local ordinances or regulations. Use only the battery in the appropriate parts listing when replacing the battery pack. Use of an incorrect battery can result in ignition or explosion of the battery.

DANGER

The lithium battery can cause a fire, an explosion, or a severe burn. Do not recharge it, remove its polarized connector, disassemble it, heat it above 100°C (212°F), incinerate it, or expose its cell contents to water. Dispose of the battery as required by local ordinances or regulations. Use only the battery in the appropriate parts listing. Use of an incorrect battery can result in ignition or explosion of the battery.

DANGER

If the LCD breaks and the fluid from inside the LCD gets into your eyes or on your hands, immediately wash the affected areas with water for at least 15 minutes. Seek medical care if any symptoms from the fluid are present after washing.

DANGER

To avoid shock, do not remove the plastic cover that protects the lower part of the inverter card.

DANGER

Though the main batteries have low voltage, a short-circuited or grounded battery can produce enough current to burn personnel or combustible materials.

DANGER

Unless hot swap is allowed for the FRU being replaced, do as follows before removing it: power off the computer, unplug all power cords from electrical outlets, remove the battery pack, and disconnect any interconnecting cables.

قبل إعادة تشغيل الحاسب بعد الانتهاء من استبدال FRU، تأكد من أنه قد تم إعادة كل من المسامير و السوست وكل الأجزاء الصغيرة الأخرى في أماكنهم ولم يتم فقدهم داخل الحاسب. ويمكن التحقق من ذلك عن طريق هز الحاسب والاستماع لأي صوت صاخب يصدر منه. قد تؤدي الأجزاء أو الرقائق المعدنية إلى حدوث دائرة قصر.

تحتوي بعض البطاريات الاحتياطية على كمية صغيرة من مائتي النيكل والكادميوم. لا تقم بفك أو إعادة شحن البطارية الاحتياطية ولا تقم أيضا بالقائها في النار أو الماء ولا تتسبب في احداث دائرة قصر بها. قم بالتخلص من البطارية كما هو موضح في القوانين المحلية. استخدم نوع البطارية المحدد والذي يوصى باستخدامه. حيث أنه قد يؤدي استخدام نوع بطارية غير صحيح الى اشتعالها أو انفجارها.

تحتوي حزمة البطارية على كمية صغيرة من مادة النيكل. لا تقم بفكها أو القاءها في النار أو الماء ولا تتسبب في احداث دائرة قصر بها. تخلص من حزمة البطارية وفقا لما هو موضح في القوانين المحلية. قم، عند استبدال حزمة البطارية، باستخدام الأنواع المحددة فقط والتي يوصى باستخدامها. حيث أنه قد يؤدي استخدام نوع بطارية غير صحيح الى اشتعالها أو انفجارها.

قد تتسبب بطارية الليثيوم في حدوث حريق أو انفجار أو حدوث حروق شديدة. لا تقم بإعادة شحن البطارية أو إزالة موصل الاستقطاب الخاص بها ولا تحاول أيضا فكها أو تسخينها لأكثر من ١٠٠ درجة مئوية (٢١٢ فهرنهايت) أو حرقها أو تعريض محتويات الخاتمة الخاصة بها للماء. قم بالتخلص من البطارية وفقا لما هو موضح في القوانين المحلية. استخدم نوع البطارية المحدد والذي يوصى باستخدامه. حيث أنه قد يؤدي استخدام نوع بطارية غير صحيح الى اشتعالها أو انفجارها.

إذا ما انكسرت شاشة LCD ولامس السائل الداخلي عينيك أو يديك، قم في الحال بغسلهما بالماء لمدة لا تقل عن ١٥ دقيقة. إذا ما وجدت أي أعراض بعد الغسل اطلب عندئذ المساعدة الطبية.

لتجنب التعرض لأي صدمات، لا تقم بإزالة الغطاء البلاستيكي الذي يحمي الجزء الأسفل من بطاقة العاكس.

على الرغم من أن البطاريات الرئيسية يكون لها جهد منخفض، إلا أنه قد تقوم البطاريات التي حدث قصور بها أو التي تم توصيلها أرضيا بإصدار تيار يكفي لحدوث حروق للأفراد أو تعرض المواد القابلة للاشتعال للحريق.

ما لم يتم السماح بالتبديل الفوري لأي FRU الجاري استبداله بدون ضرورة اغلاق النظام، قم بتنفيذ ما يلي قبل ازالته. قم بإيقاف تشغيل الحاسب ونزع كل أسلاك الطاقة من المخارج الكهربائية وقم أيضا بإزالة حزمة البطارية ثم قم بفصل أي كابلات متصلة.

PERIGO

Antes de ligar o computador após a substituição da FRU, certifique-se de que todos os parafusos, molas e outras peças pequenas estejam no lugar e não estejam soltos dentro do computador. Verifique isso sacudindo o computador e procurando ouvir sons de peças soltas. Peças metálicas ou lascas de metal podem causar curto-circuito.

PERIGO

Algumas baterias reserva contêm uma pequena quantidade de níquel e cádmio. Não desmonte uma bateria reserva, recarregue-a, jogue-a no fogo ou na água, ou deixe-a entrar em curto-circuito. Descarte a bateria conforme requerido pelas leis ou regulamentos locais. Use somente a bateria nas partes listadas apropriadas. O uso de uma bateria incorreta pode resultar em combustão ou explosão da bateria.

PERIGO

O pacote da bateria contém uma pequena quantidade de níquel. Não o desmonte, jogue-o no fogo ou na água, ou deixe-o entrar em curto-circuito. Descarte o pacote da bateria conforme requerido pelas leis ou regulamentos locais. Use somente a bateria nas partes listadas apropriadas ao substituir o pacote da bateria. O uso de uma bateria incorreta pode resultar em combustão ou explosão da bateria.

PERIGO

A bateria de lítio pode causar incêndio, explosão ou graves queimaduras. Não a recarregue, remova seu conector polarizado, desmonte-a, aqueça-a acima de 100°C (212°F), incinere-a, ou exponha o conteúdo de sua célula à água. Descarte a bateria conforme requerido pelas leis ou regulamentos locais. Use somente a bateria nas partes listadas apropriadas. O uso de uma bateria incorreta pode resultar em combustão ou explosão da bateria.

PERIGO

Se o LCD quebrar e o fluido de dentro dele entrar em contato com seus olhos ou com suas mãos, lave as áreas afetadas imediatamente com água durante pelo menos 15 minutos. Procure cuidados médicos se algum sintoma causado pelo fluido surgir após a lavagem.

PERIGO

Para evitar choque elétrico, não remova a capa plástica que protege a parte inferior da placa inversora.

PERIGO

Embora as principais baterias possuam baixa voltagem, uma bateria em curto-circuito ou aterrada pode produzir corrente o bastante para queimar materiais de pessoal ou inflamáveis.

PERIGO

A menos que uma hot swap seja permitida para a FRU que está sendo substituída, faça o seguinte antes de removê-la: desligue o computador, desconecte todos os cabos de energia das tomadas, remova o pacote de baterias e desconecte quaisquer cabos de interconexão.

DANGER

Avant de remettre l'ordinateur sous tension après remplacement d'une unité en clientèle, vérifiez que tous les ressorts, vis et autres pièces sont bien en place et bien fixées. Pour ce faire, secouez l'unité et assurez-vous qu'aucun bruit suspect ne se produit. Des pièces métalliques ou des copeaux de métal pourraient causer un court-circuit.

DANGER

Certaines batteries de secours contiennent du nickel et du cadmium. Ne les démontez pas, ne les rechargez pas, ne les exposez ni au feu ni à l'eau. Ne les mettez pas en court-circuit. Pour les mettre au rebut, conformez-vous à la réglementation en vigueur. Lorsque vous remplacez la pile de sauvegarde ou celle de l'horloge temps réel, veillez à n'utiliser que les modèles cités dans la liste de pièces détachées adéquate. Une batterie ou une pile inappropriée risque de prendre feu ou d'exploser.

DANGER

La batterie contient du nickel. Ne la démontez pas, ne l'exposez ni au feu ni à l'eau. Ne la mettez pas en court-circuit. Pour la mettre au rebut, conformez-vous à la réglementation en vigueur. Lorsque vous remplacez la batterie, veillez à n'utiliser que les modèles cités dans la liste de pièces détachées adéquate. En effet, une batterie inappropriée risque de prendre feu ou d'exploser.

DANGER

La pile de sauvegarde contient du lithium. Elle présente des risques d'incendie, d'explosion ou de brûlures graves. Ne la rechargez pas, ne retirez pas son connecteur polarisé et ne la démontez pas. Ne l'exposez pas à une température supérieure à 100°C, ne la faites pas brûler et n'en exposez pas le contenu à l'eau. Mettez la pile au rebut conformément à la réglementation en vigueur. Une pile inappropriée risque de prendre feu ou d'exploser.

DANGER

Si le panneau d'affichage à cristaux liquides se brise et que vous recevez dans les yeux ou sur les mains une partie du fluide, rincez-les abondamment pendant au moins quinze minutes. Consultez un médecin si des symptômes persistent après le lavage.

DANGER

Afin d'éviter tout risque de choc électrique, ne retirez pas le cache en plastique protégeant la partie inférieure de la carte d'alimentation.

DANGER

Bien que le voltage des batteries principales soit peu élevé, le court-circuit ou la mise à la masse d'une batterie peut produire suffisamment de courant pour brûler des matériaux combustibles ou causer des brûlures corporelles graves.

DANGER

Si le remplacement à chaud n'est pas autorisé pour l'unité remplaçable sur site que vous remplacez, procédez comme suit avant de retirer l'unité : mettez l'ordinateur hors tension, débranchez tous les cordons d'alimentation des prises de courant, retirez le bloc de batterie et déconnectez tous les câbles d'interconnexion.

VORSICHT

Bevor nach einem FRU-Austausch der Computer wieder angeschlossen wird, muß sichergestellt werden, daß keine Schrauben, Federn oder andere Kleinteile fehlen oder im Gehäuse vergessen wurden. Der Computer muß geschüttelt und auf Klappergeräusche geprüft werden. Metallteile oder-splitter können Kurzschlüsse erzeugen.

VORSICHT

Die Bereitschaftsbatterie, die sich unter dem Diskettenlaufwerk befindet, kann geringe Mengen Nickel und Cadmium enthalten. Sie darf nur durch die Verkaufsstelle oder den IBM Kundendienst ausgetauscht werden. Sie darf nicht zerlegt, wiederaufgeladen, kurzgeschlossen, oder Feuer oder Wasser ausgesetzt werden. Die Batterie kann schwere Verbrennungen oder Verätzungen verursachen. Bei der Entsorgung die örtlichen Bestimmungen für Sondermüll beachten. Beim Ersetzen der Bereitschafts- oder Systembatterie nur Batterien des Typs verwenden, der in der Ersatzteilliste aufgeführt ist. Der Einsatz falscher Batterien kann zu Entzündung oder Explosion führen.

VORSICHT

Akkus enthalten geringe Mengen von Nickel. Sie dürfen nicht zerlegt, wiederaufgeladen, kurzgeschlossen, oder Feuer oder Wasser ausgesetzt werden. Bei der Entsorgung die örtlichen Bestimmungen für Sondermüll beachten. Beim Ersetzen der Batterie nur Batterien des Typs verwenden, der in der Ersatzteilliste aufgeführt ist. Der Einsatz falscher Batterien kann zu Entzündung oder Explosion führen.

VORSICHT

Die Systembatterie ist eine Lithiumbatterie. Sie kann sich entzünden, explodieren oder schwere Verbrennungen hervorrufen. Batterien dieses Typs dürfen nicht aufgeladen, zerlegt, über 100°C erhitzt oder verbrannt werden. Auch darf ihr Inhalt nicht mit Wasser in Verbindung gebracht oder der zur richtigen Polung angebrachte Verbindungsstecker entfernt werden. Bei der Entsorgung die örtlichen Bestimmungen für Sondermüll beachten. Beim Ersetzen der Batterie nur Batterien des Typs verwenden, der in der Ersatzteilliste aufgeführt ist. Der Einsatz falscher Batterien kann zu Entzündung oder Explosion führen.

VORSICHT

Die Leuchtstoffröhre im LCD-Bildschirm enthält Quecksilber. Bei der Entsorgung die örtlichen Bestimmungen für Sondermüll beachten. Der LCD-Bildschirm besteht aus Glas und kann zerbrechen, wenn er unsachgemäß behandelt wird oder der Computer auf den Boden fällt. Wenn der Bildschirm beschädigt ist und die darin befindliche Flüssigkeit in Kontakt mit Haut und Augen gerät, sollten die betroffenen Stellen mindestens 15 Minuten mit Wasser abgespült und bei Beschwerden anschließend ein Arzt aufgesucht werden.

VORSICHT

Aus Sicherheitsgründen die Kunststoffabdeckung, die den unteren Teil der Spannungswandlerplatine umgibt, nicht entfernen.

VORSICHT

Obwohl Hauptbatterien eine niedrige Spannung haben, können sie doch bei Kurzschluß oder Erdung genug Strom abgeben, um brennbare Materialien zu entzünden oder Verletzungen bei Personen hervorzurufen.

VORSICHT

Wenn ein Austausch der FRU bei laufendem Betrieb nicht erlaubt ist, gehen Sie beim Austausch der FRU wie folgt vor: Schalten Sie den Computer aus, ziehen Sie alle Netzkabel von den Netzsteckdosen ab, entfernen Sie den Akku und ziehen Sie alle miteinander verbundenen Kabel ab.

סכנה

למני הפעלת המחשב לאחר החלפת FRU יש לוודא שכל חברגים, חקפזים, וחלקים קטנים אחרים נמצאים במקומם ואינם חופשיים לזוז בתוך המחשב. כדי לוודא זאת, יש לטלטל את המחשב ולחשיב לגילוי קולות שקשוק. חלקי או שבבי מתכת עלולים לגרום לקצרים חשמליים.

סכנה

סוללות המתנה מסוימות מכילות כמויות קטנות של ניקל וקדמיום. אין לפרק סוללות המתנה, לטעון אותה מחדש, להשליך אותה לאש או למים או לקצר אותה. יש לסלק את הסוללה כנדרש על ידי התקנות והחוקים המקומיים. יש להשתמש רק בסוללה המופיעה ברשימת החלקים המתאימה. שימוש בסוללה לא מתאימה עלול לגרום להצתה או התפוצצות של הסוללה.

סכנה

מארו הסוללה מכיל כמויות קטנות של ניקל וקדמיום. אין לפרק את מארו הסוללה, להשליך אותה לאש או למים או לקצר אותה. יש לסלק את מארו הסוללה כנדרש על ידי התקנות והחוקים המקומיים. יש להשתמש רק בסוללה המופיעה ברשימת החלקים המתאימה בזמן החלפת מארו הסוללה. שימוש בסוללה לא מתאימה עלול לגרום להצתה או התפוצצות של הסוללה.

סכנה

סוללות חליתיום עלולות לגרום לשריפה, להתפוצצות או לכוויות קשות. אין לטעון אותה מחדש, לסלק את המחבר המקוטב שלה, לפרק אותה או לחמם אותה לטמפרטורה העולה על 100 מעלות צלזיוס. אין לשרוף את הסוללה ואין לחשוף את תוכן התא למים. יש לסלק את הסוללה כנדרש בתקנות ובחוקים המקומיים. יש להשתמש רק בסוללה המופיעה ברשימת החלקים המתאימים. שימוש בסוללה אחרת עלול לגרום לסכנת שריפה או התפוצצות.

סכנה

אם מסך הנביש חנוזלי (LCD) נשבר וחנוזל מתוך חמסך בא במגע עם עיניים או ידיכם, שטפו את חאזורים הננועים מיד במים במשך 15 דקות לפחות. פנו לקבלת עזרה רפואית אם תסמינים חנובעים מחמגע עם חנוזל נמשכים לאחר חשטיפו.

סכנה

כדי למנוע התחשמלות, אין להסיר את מכסה הפלסטיק המגן על חלקו התחתון של הכרטיס החפוף.

סכנה

אף שהסוללות הראשיות הן בעלות מתח נמוך, סוללה מקוצרת או מוארכת עלולה להפיק זרם מספיק לגרימת כוויות או להצתת חומרים דליקים.

סכנה

אלא אם כן מותרת 'החלפה חמה' של ה-FRU המוחלף, פעלו כדלהלן לפני חסרתו: כבו את המחשב, נתקו את כל כבלי החשמל מחשקעים, הוציאו את מארז הסוללות ונתקו את כל הכבלים מחוברים.

危険

FRU 的交換後、ThinkPad の電源を入れる前に、ねじ、パネ、その他の小さな部品がすべて正しい位置にあり、また ThinkPad の内部で緩んでいないことを確認してください。これを確認するには、ThinkPad を振って、カチャカチャと音がしないか確かめます。金属部品や金属破片はショートの原因になることがあります。

危険

予備バッテリーの中には少量のニッケルとカドミウムが含まれているものがあります。したがって、予備バッテリーの分解、再充電、火または水の中への投棄、またはショートさせることは決して行わないでください。バッテリーを廃棄する場合は地方自治体の条例に従ってください。適切なパーツ・リストにあるバッテリーだけを使用してください。誤ったバッテリーを使用すると、バッテリーが発火したり、爆発したりすることがあります。

危険

バッテリー・パックには少量のニッケルが含まれています。バッテリー・パックを分解したり、火または水の中に投げ込んだり、ショートさせないでください。バッテリー・パックの廃棄にあたっては、地方自治体の条例または規則に従ってください。バッテリー・パックを交換するときは、適切なパーツ・リストにあるバッテリーだけを使用してください。誤ったバッテリーを使用すると、バッテリーが発火したり、爆発したりすることがあります。

危険

リチウム・バッテリーは、火災、爆発、または重症のやけどを引き起こすことがあります。バックアップ・バッテリーの充電、その極性コネクターの取り外し、バッテリー本体の分解、100℃ (212°F) 以上への加熱、焼却、電池の中身を水に浸すことはしないでください。バッテリーを廃棄する場合は地方自治体の条例に従ってください。適切なパーツ・リストにあるバッテリーだけを使用してください。誤ったバッテリーを使用すると、バッテリーが発火したり、爆発したりすることがあります。

危険

LCD が破損し、LCD 中の液体が目に入ったり、手に触れたりした場合は、液体が触れた部分を少なくとも 15 分間洗い流してください。洗い流した後に、液体によって何らかの症状が現れた場合は、医師の治療を受けてください。

危険

感電を防ぐため、インバーター・カードの下部を保護しているプラスチック・カバーを外さないでください。

危険

メイン・バッテリーの電圧は低くても、ショートしたり、接地したバッテリーが、作業者にやけどを負わせたり、可燃物を燃やすだけの電流を発生させる場合があります。

危険

交換しようとしている FRU がホット・スワップに対応していない場合、それを取り外す前に、コンピューターの電源をオフにし、すべての電源コードをコンセントから抜き、バッテリー・パックを取り外して、相互接続しているケーブルをすべて切り離してください。

위험

FRU를 교체하고 나서 컴퓨터 전원을 켜기 전에 모든 나사, 스프링 및 기타 작은 부품들이 올바른 위치에 있는지, 컴퓨터 내부에 단단하게 연결되어 있는지 확인하십시오. 컴퓨터를 흔들어 달각거리는 소리가 나지 않는지 확인하십시오. 금속 부품 또는 금속 조각은 누전을 일으킬 수 있습니다.

위험

일부 보조 배터리에는 소량의 니켈 및 카드뮴이 포함되어 있습니다. 보조 배터리를 분해하거나, 다시 충전하거나, 불 또는 물에 던지거나, 단락시키지 마십시오. 배터리 팩을 폐기할 때에는 해당 지역의 법률 규정을 따르십시오. 배터리 팩을 교체할 때에는 올바른 배터리만 사용하십시오. 올바르게 않은 배터리를 사용하면 배터리가 발화되거나 폭발할 수 있습니다.

위험

배터리 팩에는 소량의 니켈이 포함되어 있습니다. 배터리 팩을 분해하거나, 불 또는 물에 던지거나, 단락시키지 마십시오. 배터리 팩을 폐기할 때에는 해당 지역의 법률 규정을 따르십시오. 배터리 팩을 교체할 때에는 올바른 배터리만 사용하십시오. 올바르게 않은 배터리를 사용하면 배터리가 발화되거나 폭발할 수 있습니다.

위험

리튬 배터리는 화재, 폭발 또는 심각한 화상을 일으킬 수 있습니다. 리튬 배터리를 다시 충전하거나, 극성 커넥터를 제거하거나, 분해하거나, 100C(212F) 이상으로 가열하거나, 소각하거나, 전지 내용물을 물에 노출시키지 마십시오. 배터리를 폐기할 때에는 해당 지역을 법률 규정을 따르십시오. 올바른 배터리만 사용하십시오. 올바르게 않은 배터리를 사용하면 배터리가 발화되거나 폭발할 수 있습니다.

위험

LCD가 파손되어 LCD 내부의 액체가 눈에 들어가거나 손에 묻으면 즉시 깨끗한 물로 15분 이상 닦아 내십시오. 씻은 후에 조금이라도 이상을 느끼면 즉시 병원에 가서 의사의 진찰을 받아야 합니다.

위험

전기적 위험을 방지하려면 인버터 카드의 아래 부분을 보호하는 플라스틱 덮개를 제거하지 마십시오.

위험

기본 배터리의 전압은 낮지만, 단락되거나 접지된 배터리는 화상을 입히기에 충분한 전류와 가연성 물질을 발생시킬 수 있습니다.

위험

FRU 교체 시 Hot Swap이 지원되지 않는 경우, FRU를 제거하기 전에 컴퓨터의 전원을 끄고, 전기 콘센트에서 전원 코드를 분리하고, 배터리를 제거한 후, 연결된 모든 케이블을 분리하십시오.

PELIGRO

Antes de encender el sistema despues de sustituir una FRU, compruebe que todos los tornillos, muelles y demás piezas pequeñas se encuentran en su sitio y no se encuentran sueltas dentro del sistema. Compruébelo agitando el sistema y escuchando los posibles ruidos que provocarían. Las piezas metálicas pueden causar cortocircuitos eléctricos.

PELIGRO

Algunas baterías de reserva contienen una pequeña cantidad de níquel y cadmio. No las desmonte, ni recargue, ni las eche al fuego o al agua ni las cortocircuite. Deséchelas tal como dispone la normativa local. Utilice sólo baterías que se encuentren en la lista de piezas. La utilización de una batería no apropiada puede provocar la ignición o explosión de la misma.

PELIGRO

Las baterías contienen pequeñas cantidades de níquel. No las desmonte, ni recargue, ni las eche al fuego o al agua ni las cortocircuite. Deséchelas tal como dispone la normativa local. Utilice sólo baterías que se encuentren en la lista de piezas al sustituir la batería. La utilización de una batería no apropiada puede provocar la ignición o explosión de la misma.

PELIGRO

La batería de repuesto es una batería de litio y puede provocar incendios, explosiones o quemaduras graves. No la recargue, ni quite el conector polarizado, ni la desmonte, ni caliente por encima de los 100°C (212°F), ni la incinere ni exponga el contenido de sus celdas al agua. Deséchela tal como dispone la normativa local.

PELIGRO

Si la LCD se rompe y el fluido de su interior entra en contacto con sus ojos o sus manos, lave inmediatamente las áreas afectadas con agua durante 15 minutos como mínimo. Obtenga atención medica si se presenta algún síntoma del fluido despues de lavarse.

PELIGRO

Para evitar descargas, no quite la cubierta de plástico que rodea la parte baja de la tarjeta invertida.

PELIGRO

Aunque las baterías principales tienen un voltaje bajo, una batería cortocircuitada o con contacto a tierra puede producir la corriente suficiente como para quemar material combustible o provocar quemaduras en el personal.

PELIGRO

Salvo que se permita el intercambio en caliente para la unidad sustituible localmente, realice lo siguiente antes de extraerla: apague el sistema, desconecte todos los cables de alimentación de las tomas de alimentación eléctrica, extraiga la batería y desconecte los cables de interconexión.

危險

完成 FRU 更換之後，在開啟電腦的電源之前，請確定所有螺絲、彈簧及其他小零件都已歸位，沒有遺留在電腦內部。
若要確認這一點，請搖晃電腦，聽聽看是否有卡嗒的聲音。
金屬零件或鐵鍊的火花會造成電線短路。

危險

部分備用電池含有微量的鎳和鎘。請勿拆開備用電池、再充電、丟入火或水中，或使其形成短路。請按照當地法令或規定來棄置電池。
僅限使用零件清單中的電池。使用不適當的電池會導致電池起火或爆炸。

危險

電池套件含有微量的鎳。請勿拆開電池套件、丟入火或水中，或使其形成短路。請按照當地法令或規定來棄置電池套件。
更換電池套件時，僅限使用零件清單中的電池。使用不適當的電池會導致電池起火或爆炸。

危險

鋰電池會導致起火、爆炸或嚴重燒傷。請勿再充電、拔除其電極接頭、拆開、加熱超過 100°C (212°F)、焚燒，或讓電池組成物浸到水。請按照當地法令或規定來棄置電池。
僅限使用零件清單中的電池。使用不適當的電池會導致電池起火或爆炸。

危險

如果 LCD 破裂導致 LCD 流出的液體沾到您的眼睛或手，請立即以清水沖洗沾染部位至少 15 分鐘。如果在清洗後出現該液體所造成的任何症狀，請就醫治療。

危險

為避免電擊，請勿拆下轉換卡下面的塑膠護蓋。

危險

雖然主電池的電壓很低，但短路或接地電池所產生的電流，仍足以使人燒傷或使可燃物質起火。

危險

除非 FRU 允許以熱抽換來替換，否則請依下列方式將其移除：將電腦關機，拔除插座上所有電源線，移除電池包，並拔開任何交互連接的線材。

Chapter 2. General checkout

This chapter contains the following topics:

Before you go to the checkout instructions, ensure that you read the following important notes.

Important notes:

- **Only certified trained personnel should service the computer.**
- **Before replacing any FRU, read the entire page on removing and replacing FRUs.**
- **Be extremely careful during such write operations as copying, saving, or formatting.** Drives in the computer that you are servicing sequence might have been altered. If you select an incorrect drive, data or programs might be overwritten.
- **Replace a FRU only with another FRU of the correct model.** When you replace a FRU, make sure that the model of the machine and the FRU part number are correct by referring to the FRU parts list.
- **A FRU should not be replaced because of a single, unreproducible failure.** Single failures can occur for a variety of reasons that have nothing to do with a hardware defect, such as cosmic radiation, electrostatic discharge, or software errors. Consider replacing an FRU only when a problem recurs. If you suspect that a FRU is defective, clear the error log and run the test again. If the error does not recur, do not replace the FRU.
- **Be careful not to replace a nondefective FRU.**

What to do first

When you return a FRU, you must include the following information in the parts exchange form or parts return form that you attach to it:

1. Name and phone number of service technician
2. Date of service
3. Date on which the machine failed
4. Date of purchase
5. Failure symptoms, error codes appearing on the display, and beep symptoms
6. Procedure index and page number in which the failing FRU was detected
7. Failing FRU name and part number
8. Machine type, model number, and serial number
9. Customer's name and address

Note: During the warranty period, the customer may be responsible for repair costs if the computer damage was caused by misuse, accident, modification, unsuitable physical or operating environment, or improper maintenance by the customer. Following is a list of some common items that are not covered under warranty and some symptoms that might indicate that the system was subjected to stress beyond normal use.

Before checking problems with the computer, determine whether the damage is covered under the warranty by referring to the following list:

The following are not covered under warranty:

- LCD panel cracked from the application of excessive force or from being dropped
- Scratched (cosmetic) parts
- Distortion, deformation, or discoloration of the cosmetic parts
- Plastic parts, latches, pins, or connectors that have been cracked or broken by excessive force

- Damage caused by liquid spilled into the system
- Damage caused by the improper insertion of a personal-computer card (PC card) or the installation of an incompatible card
- Improper disc insertion or use of an external optical drive
- Fuses blown by attachment of a non-supported device
- Forgotten computer password (making the computer unusable)
- Sticky keys caused by spilling a liquid onto the keyboard
- Use of an incorrect ac power adapter on laptop products

The following symptoms might indicate damage caused by non-warranted activities:

- Missing parts might be a symptom of unauthorized service or modification.
- Check for obvious damage to a hard disk drive. If the spindle of a hard disk drive becomes noisy, the hard disk drive might have been dropped or subject to excessive force.

CRU list

Table 1. Model: Yoga Book 9 13IMU9 and Yoga Book 9 13IMU9 1 (Machine type: 83FF)

CRU	Type
ac power adapter	self-service
Yoga Book 9 Bluetooth KB	self-service
Yoga Book 9 folio case	self-service
Lenovo Digital Pen 3	self-service
Lenovo 600 Bluetooth Silent Mouse	self-service

Chapter 3. Identifying FRUs (CRUs)

Locate FRUs and CRUs

The exploded illustrations help Lenovo service technicians identify FRUs or CRUs that they may need to replace when servicing a customer's computer.

Figure 1. Exploded view

Table 2. FRU (CRU) categories

No.	FRU (CRU) category
1	Top screen LCD module Note: The LCD module as a whole is not a FRU, it contains FRUs as its components.
2	C cover LCD panel
3	Shielding mylar
4	Heat sink
5	Motor cable rubber
6	Solid-state drive (SSD) absorber
7	Solid-state drive (SSD)
8	I/O board FPC (R)
9	I/O board (R)
10	I/O board cable (R)
11	Power board
12	Speakers
13	Battery pack
14	Removable tape
15	Force bracket (R)
16	Strip/Hinge covers
17	Hinge rubbers
18	Lower case
19	LED rubber
20	Force bracket (L)
21	Power board cable
22	I/O board cable (L)
23	System board
24	I/O board (L)
25	I/O board FPC (L)
26	Fan modules
27	EDP cable assembly
a	Lenovo Digital Pen 3
b	Yoga Book 9 folio case
c	Lenovo 600 Bluetooth Silent Mouse
d	Yoga Book 9 Bluetooth KB
e	ac power adapter
f	Screw kit

Figure 2. Top screen LCD module - exploded view

Table 3. FRU categories for the top screen LCD module

No.	FRU (CRU) category
1	B cover LCD panel
2	ToF rubber
3	Microphone rubbers
4	Camera board
5	Camera cable
6	Sound bar hinge with cable assembly
7	Removable tape
8	Strip/Hinge covers
9	LCD cover

Chapter 4. Removing a FRU or CRU

Service tools

The following table lists tools for servicing Lenovo computers. Tools with a cross mark are needed for servicing the product models as described by this publication. Prepare them before you service the product.

Table 4. Service tools

Service tool and consumable	Model applicability
Screw driver (Phillips head) (PH1/PH0)	X
Screw driver (Torx head) (T5)	
Screw driver (Torx head) (T30)	
Pry tool 1	X
Tweezers (conductive)	X
Tweezers (isolated)	
Suction cup	
Hexagonal socket	
Thermal interface materials	X
Acetate tape	
Polyamide tape	
Mylar tape	
Electrical tape	
Double-sided tape	
Conductive tape	
Eraser	
Heat gun	
Brown brush	

Notes:

- T30 screw drivers are used to service the new Intel Xeon CPUs.
- Hexagonal sockets are used to remove antenna connectors.

General guidelines

When removing or replacing a FRU, ensure that you observe the following general guidelines:

1. Do not try to service any computer unless you have been trained and certified. An untrained person runs the risk of damaging parts.
2. Begin by removing any FRUs that have to be removed before replacing the failing FRU. Any such FRUs are listed at the beginning of each FRU replacement procedure. Remove them in the order in which they are listed.

3. Follow the correct sequence in the steps for removing a FRU, as shown in the illustrations by the numbers in square callouts.
4. When removing a FRU, move it in the direction as shown by the arrow in the illustration.
5. To install a new FRU in place, perform the removal procedure in reverse and follow any notes that pertain to replacement.
6. When replacing a FRU, carefully retain and reuse all screws.
7. When replacing the base cover, reapply all labels that come with the replacement base cover. If some original labels are not included with the replacement base cover, peel them off from the original base cover and paste them on the replacement base cover.

Before removing any FRU or CRU, shut down the computer and unplug all power cords from electrical outlets.

Attention: After replacing a FRU, do not turn on the computer until you have ensured that all screws, springs, and other small parts are in place and none are loose inside the computer. Verify this by shaking the computer gently and listening for rattling sounds. Metallic parts or metal flakes can cause electrical short circuits.

Attention: The system board is sensitive to and can be damaged by ESD. Before touching it, establish personal grounding by touching a ground point with one hand or by using an ESD strap (P/N 6405959).

Handling thermal interface materials

Thermal interface materials are typically applied between a heat sink and a CPU (and/or GPU) die to enhance the heat transfer capability of the heat sink. If thermal interface materials are exposed during computer servicing, such as when replacing the heat sink or system board, it is important to handle the thermal interface materials properly.

- You need to completely remove the old thermal interface materials from the CPU and/or GPU die.
- You need to apply new thermal interface materials onto the heat sink according to the type, quantity, and application areas specified in this publication.

Type, quantity, and areas of thermal interface materials application on the heat sink

The table and figure below provide information on the type and quantity of thermal interface materials, as well as the specific areas on the heat sink where these materials should be applied.

Area	Type	Quantity
a	8160	0.35 g, 25.7 mm × 9.4 mm × 0.2 mm

Figure 3. Areas on the heat sink where thermal interface materials should be applied

Areas on the system board where thermal interface materials are applied

The following figure shows the areas on the system board where thermal interface materials are applied.

Figure 4. Areas on the system board where thermal interface materials are applied

Set the battery in Shipping Mode

Before disassembling the computer, set the battery in Shipping Mode by any of the following approaches.

Note: Once in Shipping Mode, the computer can only be turned on after connecting it to an electrical outlet by the ac power adapter.

Approach 1 for setting the battery in Shipping Mode

- Step 1. Shut down the computer and unplug all power cords from electrical outlets.
- Step 2. Press the Novo button for 4 seconds with a SIM card ejection pin.

Approach 2 for setting the battery in Shipping Mode

- Step 1. Shut down the computer and unplug all power cords from electrical outlets.
- Step 2. Press the Novo button for a second with a SIM card ejection pin.
- Step 3. From the Novo Button Menu, select **Battery Shipping Mode → Yes: The machine is about to enter shipping mode.**

Removable tape as a FRU

Removable tape as a FRU consists of five types of tape. When assembling the compartment, choose the correct removable tape according to the following figure and table.

Figure 5. Removable tape as a FRU

Table 5. Removable tape as a FRU

No.	Quantity	Used between	Related topic
1	5	force bracket (L) and C cover LCD panel	"Remove the C cover LCD panel" on page 29
2	5	force bracket (R) and C cover LCD panel	"Remove the C cover LCD panel" on page 29
3	5	the left protruding part of LCD cover and B cover LCD panel	"Remove the B cover LCD panel" on page 44
4	5	the right protruding part of LCD cover and B cover LCD panel	"Remove the B cover LCD panel" on page 44
5	5	the lower protruding part of LCD cover and B cover LCD panel	"Remove the B cover LCD panel" on page 44

Remove the hinge covers

Make sure the battery has entered Shipping Mode before servicing the computer.

Note: Refer to "Set the battery in Shipping Mode" on page 27.

Step 1. Rotate the upper part of the computer to make two covers touch together so that the screen of the lower part is revealed upwards (1).

Figure 6. Rotate the computer

- Step 2. Put a pair of tweezers in the gap between the screen and the left hinge cover (2). Pry the left hinge cover up and then remove it (3).

Figure 7. Remove the hinge covers

- Step 3. Repeat Step 2 for the right hinge cover.

Go to <https://support.lenovo.com/partslookup> to look up the Lenovo part number of the following replacement part:

Strip/Hinge covers

Remove the C cover LCD panel

Make sure the following FRUs (or CRUs) have been removed.

“Remove the hinge covers” on page 28

- Step 1. Use a pair of tweezers to take the tab of the left removable tape out of the compartment (1). Hold the tab firmly between your thumb and forefinger and pull the tape steadily outwards until it is completely removed (2).

Note: Once the removable tape is removed, it cannot be reused. Refer to “Removable tape as a FRU” on page 28 for choosing the correct removable tape when assembling the compartment.

Figure 8. Remove the removable tape

- Step 2. Repeat Step 1 for the right removable tape.
- Step 3. Rotate the C cover LCD panel gently until the motor cable connector can be seen (3). Detach the motor cable from the connector and then release the cable (4).

Figure 9. Release the motor cable

- Step 4. Remove two screws (5). Detach the EDP cable assembly from the cable connector and then release the cable assembly (6). Remove the C cover LCD panel (7).

Figure 10. Remove screws, release the EDP cable assembly, and remove the C cover LCD panel

Screw specifications	Number of screws	Torque force (kgf.cm)
M1.2 x L1.4	2	0.6 ± 0.1

- Step 5. On the removed C cover LCD panel, lift the tab of the panel control board connector (8) and then disconnect the control board cable from the connector (9).

Figure 11. Remove the EDP cable assembly

- Step 6. Lift the latch fastened on the connector of the EDP cable (10). Slowly tear the EDP cable from the LCD panel (11). Disconnect the cable from the connector (12) and the EDP cable assembly is therewith removed from the LCD panel.

Note: The EDP cable is fixed to the LCD panel with an adhesive tape on its back.

Attention: When assembling the computer, avoid the C cover LCD panel bumping against the sharp points of the lower case.

Figure 12. Avoid bumping against the sharp points

Go to <https://support.lenovo.com/partslookup> to look up the Lenovo part number of the following replacement parts:

- C cover LCD panel
- EDP cable assembly

Remove the battery pack

Make sure the following FRUs (or CRUs) have been removed.

- “Remove the hinge covers” on page 28
- “Remove the C cover LCD panel” on page 29

Step 1. Disconnect the two antenna cables (1) and then release them out of the cable groove (2).

Figure 13. Release the antenna cables

Step 2. Remove seven screws (3).

Figure 14. Remove screws

Screw specifications	Number of screws	Torque force (kgf.cm)
M2 x L3.5	7	1.85 ± 0.15

- Step 3. Lift the battery pack (4). Press the battery pack connector with one finger, detach the battery pack cable from the connector carefully, and then remove the battery pack (5).

Figure 15. Detach the battery pack cable and remove the battery pack

Go to <https://support.lenovo.com/partslookup> to look up the Lenovo part number of the following replacement part:

Battery pack

Remove the force brackets

Make sure the following FRUs (or CRUs) have been removed.

“Remove the hinge covers” on page 28

“Remove the C cover LCD panel” on page 29

- Step 1. Remove five screws from the left force bracket (1) and then remove the bracket (2).

Figure 16. Remove screws and remove the force brackets

Screw specifications	Number of screws	Torque force (kgf.cm)
M2 x L3.5	10	1.85 ± 0.15

Step 2. Repeat Step 1 for the right force bracket.

Go to <https://support.lenovo.com/partslookup> to look up the Lenovo part number of the following replacement part:

Force bracket (L)

Force bracket (R)

Remove the fan modules

Make sure the following FRUs (or CRUs) have been removed.

“Remove the hinge covers” on page 28

“Remove the C cover LCD panel” on page 29

“Remove the force brackets” on page 33

Step 1. Disconnect the camera cable from the cable connector on the system board (1).

Figure 17. Disconnect and release the camera cable

Step 2. Slowly tear the camera cable off and release the cable (2).

Note: The camera cable is fixed to the left fan module with an adhesive tape on its back.

- Step 3. Disconnect the EDP cable from one cable connector on the system board (3) and the other connector on the right I/O board (4).

Figure 18. Disconnect and release the EDP cable

- Step 4. Slowly tear the EDP cable off and release the cable (5).

Note: The EDP cable is fixed to the right fan module with an adhesive tape on its back.

- Step 5. Detach the left fan module cable from the cable connector (6).

Figure 19. Detach the fan module cables, remove screws and remove the fan modules

- Step 6. Remove two screws and then remove the left fan module (7).

Screw specifications	Number of screws	Torque force (kgf.cm)
M2 x L3.5	4	1.85 ± 0.15

- Step 7. Repeat Step 5 and 6 for the right fan module.

Go to <https://support.lenovo.com/partslookup> to look up the Lenovo part number of the following replacement parts:

Sound bar hinge with cable assembly
Fan modules

Remove the heat sink

Make sure the following FRUs (or CRUs) have been removed.

“Remove the hinge covers” on page 28

“Remove the C cover LCD panel” on page 29

“Remove the force brackets” on page 33

Step 1. Tear the two pieces of shielding mylar from the heat sink (1).

Note: The shielding mylar is reusable if it is not damaged.

Figure 20. Remove the shielding mylar

Step 2. Loosen four screws under the two pieces of shielding mylar (2). Remove two screws (3) and then remove the heat sink (4).

Note: When removing the heat sink, overturn it to avoid thermal interface materials on the back are stained.

Figure 21. Remove screws and remove the heat sink

Screw specifications	Number of screws	Torque force (kgf.cm)
M2 x L2.5	2	1.85 ± 0.15

Go to <https://support.lenovo.com/partslookup> to look up the Lenovo part number of the following replacement parts:

Shielding mylar

Heat sink

Remove the solid-state drive (SSD)

Make sure the following FRUs (or CRUs) have been removed.

“Remove the hinge covers” on page 28

“Remove the C cover LCD panel” on page 29

Step 1. Remove one screw (1). Tear the tab of the SSD absorber from the SSD slot (2) and then remove the SSD by pulling it away from the slot (3).

Note: The tab of the SSD absorber is fixed to the SSD slot with an adhesive tape on its back.

Figure 22. Remove one screw, remove the SSD, and remove the SSD absorber

Screw specifications	Number of screws	Torque force (kgf.cm)
M2 x L1.6	1	1.85 ± 0.15

Step 2. Peel away the absorber around the SSD (4).

Go to <https://support.lenovo.com/partslookup> to look up the Lenovo part number of the following replacement parts:

Solid-state drive (SSD) absorber

Solid-state drive (SSD)

Remove the speakers

Make sure the following FRUs (or CRUs) have been removed.

“Remove the hinge covers” on page 28

“Remove the C cover LCD panel” on page 29

“Remove the force brackets” on page 33

Step 1. Detach the left speaker cable from the cable connector (1).

Figure 23. Detach the speaker cables, remove screws and remove the speakers

Step 2. Remove three screws (2) and then remove the left speaker (3).

Screw specifications	Number of screws	Torque force (kgf.cm)
M2 x L1.6	6	1.85 ± 0.15

Step 3. Repeat Step 1 and 2 for the right speaker.

Go to <https://support.lenovo.com/partslookup> to look up the Lenovo part number of the following replacement part:

Speakers

Remove the power board

Make sure the following FRUs (or CRUs) have been removed.

“Remove the hinge covers” on page 28

“Remove the C cover LCD panel” on page 29

“Remove the battery pack” on page 32

“Remove the force brackets” on page 33

“Remove the speakers” on page 37

Step 1. Lift the tab of the cable connector on the system board (1). Disconnect one end of the power board cable from the cable connector (2).

Figure 24. Disconnect the power board cable

Step 2. Lift the tab of the cable connector on the power board (3). Disconnect the other end of the power board cable from the cable connector (4).

Note: The power board cable can be torn from the lower case.

Step 3. Remove one screw (5) and then remove the power board (6).

Figure 25. Remove one screw and remove the power board

Screw specifications	Number of screws	Torque force (kgf.cm)
M2 x L2.5	1	1.85 ± 0.15

Go to <https://support.lenovo.com/partslookup> to look up the Lenovo part number of the following replacement parts:

Power board

Power board cable

Remove the system board and the I/O boards

Make sure the following FRUs (or CRUs) have been removed.

“Remove the hinge covers” on page 28

“Remove the C cover LCD panel” on page 29

“Remove the battery pack” on page 32

“Remove the force brackets” on page 33

“Remove the fan modules” on page 34

“Remove the heat sink” on page 35

“Remove the solid-state drive (SSD)” on page 37

“Remove the speakers” on page 37

“Remove the power board” on page 38

Step 1. Remove thirteen screws (1,2) and then remove the system board with the two I/O boards (3).

Figure 26. Remove screws and remove the system board with the I/O boards

Screw specifications	Number of screws	Torque force (kgf.cm)
M2 x L1.6	6	1.85 ± 0.15
M2 x L2.5	7	1.85 ± 0.15

Note: The motor cable rubber can be removed from the system board.

Step 2. Overturn the system board with the two I/O boards (4).

Figure 27. Overturn the system board with the I/O boards

Step 3. Remove four screws (5) and then remove the left I/O board FPC (6).

Figure 28. Remove the I/O board FPC, the I/O board cables, and the I/O boards

Screw specifications	Number of screws	Torque force (kgf.cm)
M1.2 x L1.4	8	0.6 ± 0.1

- Step 4. Lift the latch fastened on the connector of the left I/O board cable (7) and then disconnect one end of the cable from the left I/O board (8). Repeat the step for the other end connected to the system board.
- Step 5. Remove the left I/O board cable (9) and then the left I/O board is therewith removed.
- Step 6. Repeat Step 3,4,5 for the right I/O board FPC, the right I/O board cable, and the right I/O board.

Go to <https://support.lenovo.com/partslookup> to look up the Lenovo part number of the following replacement parts:

- System board
- I/O board (L)
- I/O board (R)
- I/O board FPC (L)
- I/O board FPC (R)
- I/O board cable (L)
- I/O board cable (R)
- Motor cable rubber

Use a Golden Key U1 tool to flash-write key id information

After replacing the system board and re-assembling the computer, use a pre-made Golden Key U1 tool to start the computer and flash-write the serial number (SN), machine type (MT), product name (PN), and UUID to the new system board.

The Golden Key U1 tool is prepared by running the U1 Update software on a FAT32-formatted USB thumb drive. Go to <https://support.lenovo.com/us/en/solutions/ht102004> for detailed instructions on how to create and use a Golden Key U1 tool.

Remove the top screen LCD module

Make sure the following FRUs (or CRUs) have been removed.

“Remove the hinge covers” on page 28

“Remove the C cover LCD panel” on page 29

“Remove the force brackets” on page 33

Note: Make sure the camera cable and the EDP cable have been torn from the fan modules.

Step 1. Remove the two hinge rubbers (1).

Figure 29. Remove the hinge rubbers

Step 2. Rotate the top screen LCD module until it is vertical (2).

Figure 30. Rotate the top screen LCD module

Step 3. Remove six screws (3) and then remove the top screen LCD module (4).

Figure 31. Remove screws and remove the top screen LCD module

Screw specifications	Number of screws	Torque force (kgf.cm)
M2 x L3.5	6	1.85 ± 0.15

Note: The LED rubber can be removed from the lower case.

Go to <https://support.lenovo.com/partslookup> to look up the Lenovo part number of the following replacement parts:

- Hinge rubbers
- LED rubber
- Lower case

Disassemble the top screen LCD module

The top screen LCD module as a whole is not a FRU. Instead, it contains FRUs as its components. Before disassembling the LCD module, make sure it has been detached from the lower case.

Remove the strip covers

Make sure the following FRUs (or CRUs) have been removed.

- “Remove the hinge covers” on page 28
- “Remove the C cover LCD panel” on page 29
- “Remove the force brackets” on page 33
- “Remove the top screen LCD module” on page 41

Step 1. Put a pair of tweezers in the gap between the screen and the left strip cover (1). Pry the left strip cover up and then remove it (2).

Figure 32. Remove the strip covers

Step 2. Repeat the step for the right strip cover.

Go to <https://support.lenovo.com/partslookup> to look up the Lenovo part number of the following replacement parts:

Strip/Hinge covers

Remove the B cover LCD panel

Make sure the following FRUs (or CRUs) have been removed.

- “Remove the hinge covers” on page 28
- “Remove the C cover LCD panel” on page 29
- “Remove the force brackets” on page 33
- “Remove the top screen LCD module” on page 41
- “Remove the strip covers” on page 43

Step 1. Use a pair of tweezers to take the black tab of the left removable tape out of the compartment (1). Hold the tab firmly between your thumb and forefinger and pull the tape steadily outwards until it is completely removed (2).

Note: There are two tabs revealed in the left space, with the black tab lying above the white one. Remove the left removable tape with the black tab in Step 1 and remove the middle one with the white tab in Step 3.

Figure 33. Remove the left and right removable tape

- Step 2. Repeat Step 1 for the right removable tape.
- Step 3. Use a pair of tweezers to take the white tab of the middle removable tape out of the compartment (3). Hold the tab firmly between your thumb and forefinger and pull the tape steadily to the left until it is completely removed (4).

Note: Once the removable tape is removed, it cannot be reused. Refer to “Removable tape as a FRU” on page 28 for choosing the correct removable tape when assembling the compartment.

Figure 34. Remove the middle removable tape

- Step 4. Overturn the B cover LCD panel to make the display screen downwards (5).

Figure 35. Overturn the B cover LCD panel

- Step 5. Lift the latch fastened on the connector of the camera cable (6) and then disconnect the cable from the connector (7).

Figure 36. Release the camera cable

- Step 6. Slowly tear the camera cable off and release the cable (8).

Note: The camera cable is fixed to the LCD panel with an adhesive tape on its back.

- Step 7. Lift the latch fastened on the connector of the EDP cable (9) and then disconnect the cable from the connector (10).

Figure 37. Release the EDP cable and the panel control board cable

- Step 8. Lift the tab of the panel control board connector (11) and then disconnect the control board cable from the connector (12).
- Step 9. Slowly tear the EDP cable and the panel control board cable off and release the cable assembly (13). The B cover LCD panel is therewith removed.

Note: The EDP cable and the panel control board cable is fixed to the LCD panel with an adhesive tape on the back.

Attention: When assembling the computer, avoid the B cover LCD panel bumping against the sharp points of the LCD cover.

Figure 38. Avoid bumping against the sharp points

Go to <https://support.lenovo.com/partslookup> to look up the Lenovo part number of the following replacement parts:

- B cover LCD panel
- Sound bar hinge with cable assembly

Remove the camera board

Make sure the following FRUs (or CRUs) have been removed.

- “Remove the hinge covers” on page 28
- “Remove the C cover LCD panel” on page 29
- “Remove the force brackets” on page 33
- “Remove the top screen LCD module” on page 41
- “Remove the strip covers” on page 43
- “Remove the B cover LCD panel” on page 44

- Step 1. On the removed B cover LCD panel, pull the camera board from the frame (1).

Note: The microphone rubbers and the ToF rubber can be removed from the camera board.

Figure 39. Remove the camera board with the camera cable

Step 2. Remove the camera board with the camera cable by slowly tearing the cable off (2).

Note: The camera cable is fixed to the LCD panel with an adhesive tape on its back.

Step 3. Overturn the camera board with the camera cable (3).

Figure 40. Overturn the camera board with the camera cable

Step 4. Lift the tab of the camera board connector (4). Disconnect the camera cable and the camera board is therewith removed from the camera cable (5).

Figure 41. Remove the camera board from the camera cable

Go to <https://support.lenovo.com/partslookup> to look up the Lenovo part number of the following replacement parts:

Camera board

Camera cable
Microphone rubbers
ToF rubber

Remove the sound bar hinge with cable assembly

Make sure the following FRUs (or CRUs) have been removed.

- “Remove the hinge covers” on page 28
- “Remove the C cover LCD panel” on page 29
- “Remove the force brackets” on page 33
- “Remove the top screen LCD module” on page 41
- “Remove the strip covers” on page 43
- “Remove the B cover LCD panel” on page 44

Step 1. On the LCD cover, remove six screws (1).

Figure 42. Remove screws and remove the sound bar hinge with cable assembly

Screw specifications	Number of screws	Torque force (kgf.cm)
M2 x L1.6	6	1.85 ± 0.15

Step 2. Remove the sound bar hinge with cable assembly (2).

Go to <https://support.lenovo.com/partslookup> to look up the Lenovo part number of the following replacement part:

- Sound bar hinge with cable assembly
- LCD cover

Appendix A. Label locations

Figure 43. Label layout on the back side of the base cover

Labels attached to the base cover are country/region specific. Make sure to apply the appropriate labels to the replacement base cover.

Table 6. All base cover labels

Label	Label name	Applied country/region	Label dimensions
a	Rating label		
b	QR label	All	26.1 mm x 17 mm
c	Intel CPU label	All	27.99 mm x 15.11 mm
d	Carbon neutral label	All	43.11 mm x 16.2 mm
e	OS label	All	22.501 mm x 16.077 mm

Note: Depending on the country/region where the computer is purchased, the back cover may include one or more of the above listed labels. For the laser etched label, print the label and apply it to the replacement cover according to the label location illustrated above. The artworks for the laser etched labels are country/region specific and can be found in Appendix B “Artworks for laser etched labels” on page 53.
