¹ All battery life claims are approximate and based on two methods of testing: MobileMark® 2018 battery life benchmark @ 200 nits brightness and continuous 1080p video playback @ 150 nits brightness on the latest update of Windows 10. Actual battery life will vary and depends on many factors such as product configuration and usage, software use, wireless functionality, power management settings, and screen brightness. The maximum capacity of the battery will decrease with time and use.

² Height is calculated using T2 measurements and should be considered 'as thin as'.

³ The actual transfer speed of the USB 3.2 will vary and, depending on many factors, such as the processing capability of host and peripheral devices, file attributes and other factors related to system configuration and your operating environments, may be slower than a speed of 20 Gbit/s.

⁴ EPEAT®-registered where applicable - see www.epeat.net for registration status by country.
