- Ironing with 60% less noise*
- Smooth ironing without water drips on the floor
- Easy shirt ironing: unique ShoulderWing System

*From previous version of GC240
**Reduction in sound power versus multilayer board cover

Highlights

1 kg Lighter

The ironing board is now 1 kg lighter compared to the previous version for more convenient movement before your ironing session

Clothes hanger

No need to look for a place around you to hang your freshly ironed shirts. You can hang garments directly after ironing on the convenient hanging rail.

Transport lock and feet caps

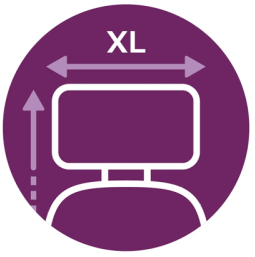

Transport lock prevents accidental collapsing of the board during ironing and also keeps the board closed during storage. The ironing board is supported by a double-leg construction with anti-slip feet caps that provides extra stability.

XL iron tray

The stable and extra-large iron tray is perfect for steam generators. It is also heat resistant and can be safely used with steam irons.

XL Board and XL Tray

Iron more in one go with the Philips XL board shape (120 x 45 cm). It is also ideal for ironing big items such as bed linen and tablecloths. The stable and extra-large iron tray is perfect for steam generators. It is also heat resistant and can be safely used with steam irons.

Ironing with 60% less noise

The ironing experience is more convenient with the ironing board cover that provides quieter ironing with a 60% noise reduction in sound power versus a multilayer board cover

AquaBlock anti-drip cover

AquaBlock is a unique technology that prevents condensed steam from dripping onto the floor, making this board cover the ideal ironing surface for steam generator irons.

Unique ShoulderWing System

With the unique ShoulderWing system, shirt ironing is easier than ever. This innovative system helps you iron shirts with little rearranging, saving you time and effort. The retractable ShoulderWing System can be opened and closed, depending on the type of garment to be ironed.
