Item Code: **FREEMOTION**

Gimbal video stabilizer for smartphone

Technical Features:

- Selfie and stabilizer function with motion stabilization;
- Stabilizer with intelligent anti-shake for stable videos;
- Use without an app;
- Horizontal and vertical shooting;
- High-stability aluminum alloy pole;
- USB-C Cable;
- Bluetooth remote controller with battery.

Compatibility:

For all smartphone

DESCRIPTION:

FREEMOTION combines the functionalities of a gimbal, selfie stick and tripod, offering motion stabilization for smooth, vibration-free shots. The anti-shake technology ensures stable results even in moving conditions.

The device is designed for immediate use, without the need for an app. It supports both horizontal and vertical shooting, making it versatile for various applications. The structure includes a lightweight yet sturdy aluminum alloy pole for greater stability. Additionally, it comes with a Bluetooth remote for remote control of photos and videos.

Freemotion is the ideal option for those seeking high performance in a compact format.
