Streamline digital workflows with automated batch capture

For organisations that need a more efficient way to capture information, **PaperStream Capture** software makes it easy to automate the batch capture process and distribute the resulting images and data, helping organisations to build more streamlined and economical digital workflows.

PaperStream Capture Pro & PaperStream Capture Pro Premium: Advanced automation, for any scanner

The world's most popular capture application* is now enhanced with the most advanced tech, and supports all TWAIN† scanners, irrespective of brand.

PaperStream Capture Pro and **Capture Pro Premium** deliver high-speed form recognition via a new, low annual subscription model.

This powerful, user-friendly capture solution is simple to operate with an intuitive new user interface. Utilising the Batch Manager and Wizard-Based profile management and operation functionality, tasks can be initiated with a single touch.

- **PaperStream Capture Pro** supports A4 desktop scanning.
- **PaperStream Capture Pro Premium** delivers the same benefits for A4 and A3 high-volume scanning and file importing.

This industry leading software seamlessly connects with all TWAIN scanner brands, and easily integrates with all the most popular document management systems, thanks to its range of off-the-shelf connectors. For the development of new connectors, there's an API available. And for bespoke solutions we have a dedicated Co-Creation team, plus our Imaging Alliance Programme provides access to tools, sample code and expert developer-to-developer advice.

AI-optimised intelligent form recognition supports handwritten non-cursive text, as well as tick boxes. Form content is delivered with high accuracy OCR in 5 European languages. Content is provided as a digital data file with no need for additional applications, while the on-screen After Scan and Advanced Image Quality Checker functions mean scans are right first time. Organisations can now achieve faster digital workflows and increased productivity.

The application runs on the user's own PCs, making deployment easy. Set-up and running costs are minimal based on a low annual subscription. Users only pay for what they need, and software is automatically updated with the latest features and functionality.

Powerful, user-friendly capture

Advanced tech

The world's most trusted and popular scanning software has been enhanced with advanced tech that's designed to be utilised with any TWAIN supporting scanner.

Powerful capture made easy

Powerful capture functionality is easy to operate, thanks to its intuitive user-friendly interface and all-in-one post-scan review window.

Single touch simplicity

Batch Manager combined with Wizard-based profile management and operation means even complex tasks can be initiated with a single touch

For all types of business

PaperStream Capture Pro is ideal for businesses that use desktop scanning. For managing high-volume scanning, like production scanning and file importing, then **PaperStream Capture Pro Premium** is the right solution.

Comprehensive set of tools

With a raft of tools including automated separating, sorting, and releasing, quick profile creation and automatic image quality checks, document capture has never been easier.

Seamless integration, upstream and downstream

Seamless connectivity

PaperStream Capture Pro's multi brand connectivity means all TWAIN supporting scanners can benefit from this powerful software.

Easy integration

PaperStream's off-the-shelf connectors make it easy to integrate with popular document management systems and specialist software. And to develop new connectors there's a powerful API available.

Expert support

Where customised solutions are required, our dedicated Co-Creation team can help with bespoke builds and development. Additionally, our Imaging Alliance Programme provides access to tools, sample code and expert developer-to-developer advice.

***PaperStream Capture** software is bundled with fi Series scanners which hold the world's largest market share. Based on 2022 records collected by Keypoint Intelligence (InfoTrends) and infosource.

†**PaperStream Capture Pro** and **PaperStream Capture Pro Premium** are designed to work with TWAIN-compatible scanners that adhere to TWAIN specifications version 2.3 or newer. We recommend using the trial/evaluation version of the software to test your scanners and verify performance.

High-productivity form capture

High speed handwriting and text recognition

AI-optimised intelligent fixed form recognition means no pre-sorting required.

Printed text, handwritten non-cursive text and tick boxes can be captured at high speed with high accuracy OCR in 5 European languages.

No additional applications required

PaperStream Capture Pro provides form content as a digital data file, so there's no need for additional applications.

Check for great quality

After Scan Correction and the Advanced Image Quality Checker increase productivity by allowing quality assurance reviews on screen.

Cost effective

PC-based form capture solution that is more flexible, cost effective and secure than cloud-based alternatives.

Easy deployment

PC-based installation

Because **PaperStream Capture Pro** installs onto PC, deployment is straightforward.

Minimise set-up and running costs

A new, low annual subscription model means only ever paying for what's needed.

Stay updated with the latest software

When a subscription is active the software auto-updates to provide access to the latest features and functionality.

Optimised data

PaperStream Capture Pro allows you to optimise the data capture process. Usage data can be monitored, workloads can be managed, and scan, extract and release activities can be stacked to increase throughput.

Fast and easy profile creation

PaperStream software has an inbuilt Wizard, that makes creating and setting up profiles fast and simple.
