- Neodymium speakers for pure balanced sound
- Shielding technology to block mobile phone interference

Elegant and compact

- 360-degree design for gorgeous look from any angle
- Compact design for any space, any lifestyle

Advanced versatility

- PC synchronization with your iPod/iPhone
- Dock any iPod/iPhone, even in its case
- AUX-in for easy connection to almost any electronic device
- Battery or AC power option for music enjoyment anywhere
- Free DockStudio app for internet radio & other cool feature

PHILIPS

Features

Dynamic Bass Boost (DBB)

Dynamic Bass Boost maximizes your music enjoyment by emphasizing the bass content of the music throughout the range of volume settings - from low to high – at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost

can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.

Neodymium speakers

Neodymium is the best material for producing a strong magnetic field for greater sensitivity in a voice coil, better bass response and a pure balanced sound quality.

PC synchronization

Dock it, play it, sync it and charge it! Dig in to your favorite music on your iPod or iPhone while it charges and synchronizes with your PC via USB – and enjoy superb sound quality together with thoroughly unbeatable convenience. Let the great tunes go on and on – without ever running out of power.
