

docking speaker

• for iPod/iPhone

DS700/37

Designed to go places

Obsessed with sound

Perfect for the iPod nano, this pocket-sized speaker gets rich & powerful music going wherever you are - delivering maximum impact with minimum fuss. Powered by AC or batteries, it plays from all iPod/iPhone, including the new iPod nano.

Benefits

Crystal clear sound

- DBB to preserve low tones for deep bass at any volume level
- Neodymium speakers for pure balanced sound
- Shielding technology to block mobile phone interference

Ultra compact and truly portable

- Designed fit for iPod nano
- Slim and miniature design for any space, any lifestyle

Advanced versatility

- AUX-in for easy connection to almost any electronic device
- Battery or AC power option for music enjoyment anywhere
- Dock any iPod/iPhone, even in its case

Features

AUX-in for easy connection

Battery or AC powered

Designed for iPod nano

PHILIPS

Dock iPod/iPhone in its case

Smartly designed spring-loaded docking port effortlessly accommodates any iPod or iPhone, without special adaptors. What's more, it works even when most protective cases are on – just dock your iPod or iPhone as it is. Now you can truly have fuss-free enjoyment of your music.

Dynamic Bass Boost (DBB)

Dynamic Bass Boost maximizes your music enjoyment by emphasizing the bass content of the music throughout the range of volume settings - from low to high – at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.

Slim and miniature design
