

MPN: BNC58F

## BNC Crimp Plug f/ RG58

The BNC58F BNC crimp plug is designed for secure and reliable connections with RG58 coaxial cables. This high-quality connector ensures optimal signal transmission for various applications, including radio frequency, video, and data communication systems. Built to European standards, the BNC58F offers a durable crimp connection, guaranteeing long-lasting performance and minimizing signal loss. MicroConnect has been pioneering connectivity solutions for over 20 years, and this BNC crimp plug exemplifies our commitment to providing premium quality coaxial connectors at fair prices. Trust MicroConnect for all your coaxial connection needs, ensuring reliable performance and longevity for your equipment.
