# Safety instructions

Use the following safety guidelines to protect your monitor from potential damage and to ensure your personal safety. Unless otherwise noted, each procedure in this document assumes that you have read the safety information that is shipped with your monitor.

**NOTE:** Before using the monitor, read the safety information that is shipped with your monitor and printed on the product. Keep the documentation at a secure location for future reference.

**WARNING:** Use of controls, adjustments, or procedures other than those specified in this documentation may result in exposure to shock, electrical hazards and/or mechanical hazards.

**CAUTION:** The possible long-term effect of listening to audio at high volume through the headphones (on monitor that supports it) may damage your hearing ability.

- Place the monitor on a solid surface and handle it carefully. The screen is fragile and can be damaged if dropped or hit with a sharp object.
- Ensure that your monitor is electrically rated to operate with the AC power available in your location.
- Keep the monitor in room temperature. Excessive cold or hot conditions can have an adverse effect on the liquid crystal of the display.
- Connect the power cable from the monitor to a wall outlet that is near and accessible. See [Connecting your monitor](#).
- Do not place and use the monitor on a wet surface or near water.
- Do not subject the monitor to severe vibration or high impact conditions. For example, do not place the monitor inside a car trunk.
- Unplug the monitor when it is going to be left unused for an extended period.
- To avoid electric shock, do not attempt to remove any cover or touch the inside of the monitor.
- Read these instructions carefully. Keep this document for future reference. Follow all warnings and instructions that are marked on the product.
- Certain monitors can be wall mounted using the VESA mount that is sold separately. Ensure to use the correct VESA specifications as mentioned in the wall mounting section of the User's Guide.

For information about safety instructions, see the Safety, Environmental and Regulatory Information (SERI) document that is shipped with your monitor.

# About your monitor

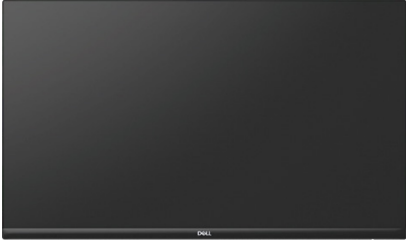

## Package contents

The following table provides the list of components that are shipped with your monitor. If any component is missing, contact Dell. For more information, see [Contacting Dell](#).

**NOTE:** Some components may be optional and may not ship with your monitor. Some features may not be available in certain countries.

**NOTE:** To set up the stand from any other source, see the documentation that comes with the stand for instructions.

# Product features

The Dell P2425D flat panel monitor has an active matrix, Thin-Film Transistor (TFT), Liquid Crystal Display (LCD) panel with LED backlight. The monitor features include:

- 604.5 mm (23.8 in.) viewable area display (measured diagonally).
  - 2560 x 1440 resolution, with full-screen support for lower resolutions.
  - Wide viewing angles of 178 degrees in vertical and horizontal directions.
  - Color gamut of sRGB 99% (CIE 1931) (typical).
  - Digital connectivity with DisplayPort and HDMI ports.
  - Tilt, swivel, height, and pivot adjustment capabilities.
  - Ultra-thin bezel minimizes the bezel gap in multi-monitor usage, enabling easier setup with an elegant viewing experience.
  - Removable stand and Video Electronics Standards Association (VESA) 100 mm mounting holes for flexible mounting solutions.
  - Equipped with:
    - One USB 5Gbps Type-B upstream port
    - One USB-C 5Gbps downstream port
    - Three USB 5Gbps Type-A downstream ports
  - Plug and play is capable if supported by your computer.
  - On-Screen Display (OSD) adjustments for ease of set-up and screen optimization.
  - Power and joystick buttons lock.
  - Security-lock slot for Kensington locks (sold separately).
  - Stand lock.
  - ≤0.3 W in Standby Mode.
  - Supports Dell Display and Peripheral Manager.
  - Optimize eye comfort with a flicker-free screen.
  - Dell ComfortView Plus is an integrated low blue light screen feature that improves eye comfort by reducing potentially harmful blue light emissions without compromising color. Through ComfortView Plus technology, Dell has reduced harmful blue light exposure to ≤35%.
  - This monitor is certified with TÜV Rheinland Eye Comfort 3.0 with a 4-star rating. It incorporates key technologies that also deliver a flicker-free screen, up to 100 Hz refresh rate, a color gamut of minimum sRGB 95%. Dell ComfortView Plus feature is enabled by default on your monitor.
  - This monitor uses a low blue light panel. When the monitor is reset to factory settings or default setting, it is in compliance with TÜV Rheinland's hardware low blue light certification.\*
- \* This monitor is in compliance with TÜV Rheinland hardware low blue light certification under Category 2.

**Blue light ratio:**  
The ratio of light in the range from 415nm-455nm compared to 400nm-500nm is less than 50%.

**Table 2. Blue light ratio**

Category	Blue light ratio
1	≤ 20%
2	20% < R ≤ 35%
3	35% < R ≤ 50%

- Decreases the level of hazard blue light emitted from the screen to make viewing more comfortable for your eyes without distortion of color accuracy.
- The monitor features Flicker-Free technology, which eliminates visible flicker to ensure a comfortable viewing experience and helps prevent eye strain and fatigue.

### About TÜV Rheinland Eye Comfort 3.0

TÜV Rheinland Eye Comfort 3.0 certification program presents a consumer-friendly star rating scheme to the display industry thereby promoting eye wellness from safety to eye care. Compared to existing certifications, the 5-star-rating program adds rigorous testing requirements on overall eye care attributes such as low blue-light, flicker-free, refresh rate, color gamut, color accuracy, and ambient light sensor performance. It lays out requirement metrics and rates the product performance on five levels, and the sophisticated technical assessment process provides consumers and buyers with indicators that are easier to judge.

The eye wellness factors being considered remain constant, however, the standards for the various star ratings are different. The higher the star rating, the more stringent the standards. The table below lists the major eye comfort requirements which apply in addition to the basic eye comfort requirements (such as pixel density, uniformity of luminance and color, and freedom of movement).

For more information around **TÜV Eye Comfort certification**, see [eye-comfort website](https://www.tuv.com/eye-comfort).

Remark	<p><sup>1</sup> Software controls the blue light emission by reducing excessive blue light, resulting in a more yellow tone.</p> <p><sup>2</sup> Color gamut describes the availability of colors in the display. Various standards were developed for specific purposes. 100% corresponds to the full color space as defined in the standard.</p> <p><sup>3</sup> NTSC stands for National Television Standards Committee, which developed a color space for the television system that is used in the United States.</p> <p><sup>4</sup> sRGB is a standard red, green, and blue color space that is in use on monitors, printers, and the World Wide Web.</p> <p><sup>5</sup> DCI-P3, short for Digital Cinema Initiatives - Protocol 3, is a color space used in digital cinema that encompasses a wider range of colors than the standard RGB color space.</p> <p><sup>6</sup> Adobe RGB is a color space which is created by Adobe Systems that encompasses a broader range of colors than the standard RGB color model, particularly in the cyans and greens.</p>			

# Operating system compatibility

- Windows 10/Windows 11 and later\*
- \*The operating system compatibility on Dell branded monitors may vary based on factors such as:
- Specific release date(s) when operating system versions, patches, or updates are available.
  - Specific release date(s) when Dell branded monitor firmware, software application, or driver updates are available on the Dell support website.

## Identifying parts and controls

### Front view

Figure 1. Front view

Table 4. Components and descriptions.

Label	Description	Use
1	Power LED indicator	Solid white light indicates that the monitor is turned on and is functioning. Blinking white light indicates that the monitor is in Standby Mode.
2	 Quick access USB-C 5Gbps downstream port (data only)	Connect your USB device* or charge your device. <b>i NOTE:</b> To use these ports, you must connect the USB cable (shipped with your monitor) to the USB upstream port on the monitor and to your computer.
3	 Quick access USB 5Gbps Type-A downstream port	Connect your USB device* or charge your device. <b>i NOTE:</b> To use these ports, you must connect the USB cable (shipped with your monitor) to the USB upstream port on the monitor and to your computer.

\*To avoid signal interference, when a wireless USB device has been connected to a USB downstream port, it is NOT recommended to connect any other USB devices to the adjacent port(s).

Back view

Figure 2. Back view

Table 5. Components and descriptions.

Label	Description	Use
1	VESA mounting holes (100 mm x 100 mm - behind attached VESA cover)	Wall mount the monitor using VESA-compatible wall mount kit. <b>NOTE:</b> Wall-mount kit is not shipped with your monitor and is sold separately.
2	Regulatory information label	Lists the regulatory approvals.
3	Stand release button	Releases the stand from the monitor.
4	Power button	To turn the monitor on or off.
5	Joystick	Use to control the OSD menu. For more information, see <a href="#">Operating the monitor</a> .
6	Regulatory label (including MyDell QR code, serial number, and Service Tag label)	See this label if you need to contact Dell for technical support. The Service Tag is a unique alphanumeric identifier that enables Dell service technicians to identify the hardware components in your monitor and access warranty information.
7	Cable-management slot	Use to organize cables by routing them through the slot.

Bottom view

Label	Description	Use
1	Security-lock slot (based on Kensington Security Slot)	Secure your monitor using a security lock (purchased separately) to prevent unauthorized movement of your monitor.
2	 Power connector	Connect the power cable (shipped with your monitor).
3	Stand-lock feature	Lock the stand to the monitor using a M3 x 6 mm screw (screw not included).
4	 HDMI port	Connect to your computer with the HDMI cable shipped with your monitor (for selected countries only).
5	 DisplayPort 1.4 port	Connect to your computer with the DisplayPort cable (shipped with your monitor).
6	 USB 5Gbps Type-B upstream port	Connect the USB cable that came with your monitor to the computer. Once this cable is connected, you can use the USB connectors on the monitor.
7	 USB 5Gbps Type-A downstream port	Connect your USB device.*  <b>i NOTE:</b> To use these ports, you must connect the USB cable (shipped with your monitor) to the USB upstream port on the monitor and to your computer.
8	Soundbar slots	Attach your external Soundbar (sold separately) to the monitor by aligning the magnetic tabs on the soundbar with the slots on the monitor.

\*To avoid signal interference, when a wireless USB device has been connected to a USB downstream port, it is NOT recommended to connect any other USB devices to the adjacent port(s).

## Dell Display and Peripheral Manager (DDPM) for Windows

DDPM is a software application that helps you set up and configure the Dell monitors and peripherals. Some of its features include:

1. Adjusting the monitor On-Screen Display (OSD) settings such as brightness, contrast, and resolution without needing to use the joystick on the monitor.
2. Arrange multiple applications on your screen by placing them into a template of your choice using **Easy Arrange**.
3. Assign applications or files to the partitions of **Easy Arrange**, save the layout as a profile, and restore the profile automatically with **Easy Arrange Memory** when needed.
4. Connect the Dell Monitor to multiple input sources and manage these video inputs using the **Input Source** feature.
5. Customize each application with its own distinct color mode using the **Color Preset** feature.
6. Replicate software application settings from one monitor to another identical monitor using the **Import/Export** application settings feature.
7. Receive notifications and update the firmware and software.

**i NOTE:** Some features of the DDPM mentioned above are available only on select monitor models. For more information about DDPM, and the recommended computer configuration to install it, go to [Dell Support Site](#).

This document is for informational purposes only and reflects laboratory performance. Your product's performance may vary based on the software, components, and peripherals you have ordered. There is no obligation to update this information.

Accordingly, the customer should not rely upon this information in making decisions about electrical tolerances or otherwise. No warranty as to accuracy or completeness is expressed or implied.

**NOTE:** This monitor is ENERGY STAR certified.

ENERGY STAR is a program run by the U.S. Environmental Protection Agency (EPA) and the U.S. Department of Energy (DOE) that promotes energy efficiency.

This product qualifies for ENERGY STAR in the factory default settings, and this is the setting in which power savings is achieved.

Changing the factory default picture settings or enabling other features increases the power consumption that could exceed the limits necessary to qualify for an ENERGY STAR rating.

For more information about the ENERGY STAR program, see [energystar website](https://energystar.gov).

Transfer speed	Data rate	Maximum power supported
USB 5Gbps	5 Gbps	15 W
USB 2.0	480 Mbps	15 W
USB 1.0	12 Mbps	15 W

**NOTE:** USB 5Gbps functionality requires a USB 5Gbps-capable computer.

**NOTE:** The USB ports on the monitor work only when the monitor is turned on or is in standby mode. If you turn off the monitor and then turn it on, the attached peripherals may take a few seconds to resume normal functionality.

## Plug-and-play capability

You can connect the monitor to any Plug and Play-compatible system. The monitor automatically provides the computer with its Extended Display Identification Data (EDID) using Display Data Channel (DDC) protocols so that the computer can configure itself and optimize the monitor settings. Most monitor installations are automatic; you can select different settings as required. For more information about changing the monitor settings, see [Operating the monitor](#).

## LCD monitor quality and pixel policy

During the LCD Monitor manufacturing process, it is not uncommon for one or more pixels to become fixed in an unchanging state which are hard to see and do not affect the display quality or usability. For more information about Dell Monitor Quality and Pixel Policy, see [Dell Display Pixel Guidelines](#).

# Ergonomics

△ **CAUTION:** Improper or prolonged usage of keyboard may result in injury.

△ **CAUTION:** Viewing the monitor screen for extended periods of time may result in eye strain.

For comfort and efficiency, observe the following guidelines when setting up and using your computer workstation:

- Position your computer so that the monitor and keyboard are directly in front of you as you work. Special shelves are commercially available to help you correctly position your keyboard.
- To reduce the risk of eye strain and neck, arm, back, or shoulder pain from using the monitor for long period, we recommend you to:
  1. Set the distance of the screen between 20 to 28 in. (50 - 70 cm) from your eyes.
  2. Blink frequently to moisten your eyes or wet your eyes with water after prolonged usage of the monitor.
  3. Take regular and frequent breaks for 20 minutes every two hours.
  4. Look away from your monitor and gaze at a distant object that is 20 feet away for at least 20 seconds during the breaks.
  5. Perform stretches to relieve tension in the neck, arms, back, and shoulders during the breaks.
- Ensure that the monitor screen is at the eye level or slightly lower when you are sitting in front of the monitor.
- Adjust the tilt of the monitor, its contrast, and brightness settings.
- Adjust the ambient lighting around you (such as overhead lights, desk lamps, and the curtains, or blinds on nearby windows) to minimize reflections and glare on the monitor screen.
- Use a chair that provides good lower back support.
- Keep your forearms horizontal with your wrists in a neutral, comfortable position while using the keyboard or mouse.
- Always leave space to rest your hands while using the keyboard or mouse.
- Let your upper arms rest naturally on both sides of the chair.
- Ensure that your feet are resting flat on the floor.
- When sitting, make sure that the weight of your legs is on your feet and not on the front portion of your seat. Adjust your chair height or use a footrest if necessary to maintain a proper posture.
- Vary your work activities. Try to organize your work so that you do not have to sit and work for extended periods of time. Try to stand or get up and walk around at regular intervals.
- Keep the area under your desk clear of obstructions and cables or power cords that may interfere with comfortable seating or present a potential trip hazard.

**Figure 9. Ergonomics**

## Handling and moving your display

To ensure that the monitor is handled safely when lifting or moving it, follow these guidelines:

- Before moving or lifting the monitor, turn off your computer and the monitor.
- Disconnect all cables from the monitor.
- Place the monitor in the original box with the original packing materials.
- Hold the bottom edge and the side of the monitor firmly without applying excessive pressure when lifting or moving the monitor.

**Figure 10. Handling the display**

- When lifting or moving the monitor, ensure that the screen is facing away from you and do not press on the display area to avoid any scratches or damage.

**Figure 11. The screen is facing away from you**

- When transporting the monitor, avoid any sudden shock or vibration to it.
- When lifting or moving the monitor, do not turn the monitor upside down while holding the stand base or stand riser. It may result in accidental damage to the monitor or cause personal injury.

**Figure 12. Do not turn the monitor upside down**

## Maintenance guidelines

### Cleaning your monitor

⚠ **CAUTION:** Read and follow the [Safety instructions](#) before cleaning the monitor.

⚠ **WARNING:** Before cleaning the monitor, unplug the monitor power cable from the electrical outlet.

For best practices, follow the instructions that are listed below when unpacking, cleaning, or handling your monitor:

- Use a clean cloth that is slightly dampened with water to clean the stand assembly, the screen, and the chassis of your Dell monitor. If available, use a screen-cleaning tissue or solution suitable for cleaning Dell monitors.
- After cleaning the surface of the table, ensure that it is thoroughly dry and free from any moisture or cleaning agent before placing your Dell monitor on it.
- ⚠ **CAUTION:** Do not use detergents or other chemicals such as benzene, thinner, ammonia, abrasive cleaners, alcohol, or compressed air.
- ⚠ **CAUTION:** Using chemicals for cleaning may cause changes in the appearance of the monitor, such as color fading, milky film on the monitor, deformation, uneven dark shade, and peeling of screen area.
- ⚠ **WARNING:** Do not spray the cleaning solution or even water directly on the surface of the monitor. Doing so will allow liquids to accumulate at the bottom of the display panel and corrode the electronics resulting in permanent damage. Instead, apply the cleaning solution or water to a soft cloth and then clean the monitor.
- ① **NOTE:** Monitor damage due to improper cleaning methods and the use of benzene, thinner, ammonia, abrasive cleaners, alcohol, compressed air, detergent of any kind leads to a Customer Induced Damage (CID). CID is not covered under the standard Dell warranty.
- If you notice white residual powder when you unpack your monitor, wipe it off with a cloth.
- Handle your monitor with care as a darker-colored monitor may get scratched and show white scuff marks more than a lighter-colored monitor.
- To help maintain the best image quality on your monitor, use a dynamically changing screen saver and turn off your monitor when not in use.

# Setting up the monitor

## Connecting the stand

- ① **NOTE:** The stand is not attached when the monitor is shipped from the factory.
- ① **NOTE:** The following instructions are applicable only for the stand that was shipped with your monitor. If you are attaching a stand that you purchased from any other source, follow the setup instructions that are included with the stand.

1. Assemble the stand riser to stand base:
  - a. Open the front flap of the box to get the stand riser and stand base.
  - b. Remove the stand riser and stand base from the packaging cushion.

**Figure 13. Remove the stand riser and stand base**

- ① **NOTE:** The images are for the purpose of illustration only. The placement and appearance of the packaging cushion may vary by model.
- c. Align and place the stand riser on the stand base.
  - d. Open the screw handle at the bottom of the stand base and turn it clockwise to secure the stand assembly.
  - e. Close the screw handle.

**Figure 14. Install the stand riser and stand base**

- e. Open the protective cover on the monitor to access the VESA slot on the display back cover.

**Figure 15. Lift the protective cover**

- ① **NOTE:** Ensure that the front plate flap is fully opened before attaching the stand assembly to the display.

2. Attach the stand assembly to the display:
  - a. Carefully insert the tabs on the stand riser into the slots on the display back cover and lower the stand assembly to snap it into place.

**Figure 16. Attach the stand assembly to the display**

- b. Hold the stand riser and lift the monitor carefully, then place it on a flat surface.

**Figure 17. Hold the stand riser and lift the monitor**

**⚠ CAUTION:** Hold the stand riser firmly when lifting the monitor to avoid any accidental damage.

- c. Remove the protective cover from the monitor.

**Figure 18. Remove the cover from the monitor**

## Using the quick access ports

When you want to use the monitor's built-in quick access USB ports, press on the quick access port module and then release. The quick access port module slides down.

**Figure 19.** Using the quick access ports

## Connecting your monitor

**⚠ WARNING:** Before you begin any of the procedures in this section, follow the [Safety instructions](#).

**ⓘ NOTE:** Dell monitors are designed to work optimally with the Dell-supplied cables inside the box. Dell does not guarantee the video quality and performance if non-Dell cables are used.

**ⓘ NOTE:** Route the cables through the cable-management slot before connecting them.

**ⓘ NOTE:** Do not connect all the cables to the computer at the same time.

**ⓘ NOTE:** The images are for the purpose of illustration only. The appearance of the computer may vary.

To connect your monitor to the computer:

1. Turn off your computer and disconnect the power cable.
2. Connect the DisplayPort or HDMI cable from your monitor to the computer.
3. Connect the USB Type-B upstream port on the monitor and an appropriate USB port on your computer with the supplied USB cable (see [Bottom view](#) for details).
4. Connect the USB peripherals to the USB downstream ports on the monitor.
5. Plug the power cables from your computer and monitor into a wall outlet.
6. Turn on the monitor and the computer.

If your monitor displays an image, installation is complete. If it does not display an image, see [Common problems](#).

### Connecting the DisplayPort (DisplayPort to DisplayPort) cable

**Figure 20.** Connecting the DisplayPort cable

### Connecting the HDMI cable (for selected countries only)

**Figure 21.** Connecting the HDMI cable

## Organizing your cables

Route the cables through the cable management slot on the stand riser.

**Figure 22. Organizing your cables**

After connecting all necessary cables to your monitor and computer, (see [Connecting your monitor](#) for cable attachment) organize all cables as shown in the image.

If your cable is not able to reach your computer, you may connect directly to the computer without routing through the cable management guide on the monitor stand.

## Securing your monitor using Kensington lock (optional)

The security-lock slot is located at the bottom of the monitor (see [Security-lock slot](#)). Secure your monitor to a table using the Kensington security lock.

For more information about using the Kensington lock (sold separately), see the documentation that is shipped with the lock.

**Figure 23. Using Kensington lock**

**NOTE:** The image is for the purpose of illustration only. The appearance of the lock may vary.

## Removing the monitor stand

**NOTE:** To prevent scratches on the screen when removing the stand, ensure that the monitor is placed on a soft surface and handle it carefully.

**NOTE:** The following steps are specifically for removing the stand that is shipped with your monitor. If you are removing a stand that you purchased from any other source, follow the setup instructions that are included with the stand.

**NOTE:** Before removing the stand, ensure that you have disconnected all the cables from the monitor.

To remove the stand:

1. Turn off the monitor.
2. Disconnect the cables from the computer.
3. Place the monitor on a soft cloth or cushion.
4. Press and hold the stand release button at the back of the display.
5. Lift the stand assembly up and away from the monitor.

**Figure 24. Removing the monitor stand**

## Wall mounting (optional)

**Figure 25. Wall mounting**

**NOTE:** Use M4 x 10 mm screws to connect the monitor to the wall mounting kit.

See the documentation that is shipped with the VESA-compatible wall mounting kit.

1. Place the monitor panel on a soft cloth or cushion on a stable flat table.
2. Remove the monitor stand (see [Removing the monitor stand](#)).
3. Using a Phillips crosshead screwdriver, remove the four screws securing the plastic cover.
4. Attach the mounting bracket from the wall mounting kit to the monitor.
5. Mount the monitor on the wall. For more information, see the documentation that is shipped with the wall mounting kit.

**NOTE:** Mount the monitor using only UL/CSA/GS-listed wall mount bracket with minimum weight or load bearing capacity (12.80 kg).

## Using the tilt, swivel, pivot and height adjustment

① **NOTE:** The following instructions are applicable only for attaching the stand that was shipped with your monitor. If you are attaching a stand that you purchased from any other source, follow the setup instructions that are included with the stand.

### Tilt and swivel adjustment

With the stand attached to the monitor, you can tilt and swivel the monitor for the most comfortable viewing angle.

**Figure 26.** Tilt and swivel adjustment

① **NOTE:** The stand assembly is not pre-installed when the monitor is shipped from the factory.

### Height adjustment

① **NOTE:** The stand can extend vertically up to 150 mm.

The following image illustrates how to extend the stand vertically.

**Figure 27.** Height adjustment

### Pivot adjustment

Before you rotate the display, ensure it is completely extended vertically and completely tilted up to avoid hitting the bottom edge of the monitor.

**Figure 28.** Fully vertically extended and fully tilted up the monitor

## Rotate clockwise

**Figure 29. Rotate clockwise**

## Rotate counterclockwise

**Figure 30. Rotate counterclockwise**

- ① **NOTE:** To use the Display Rotation function (Landscape versus Portrait view) with your Dell computer, you require an updated graphics driver that is not included with this monitor. For latest driver updates, see the Download section for video drivers on [Dell Support Site](#).
- ① **NOTE:** In the Portrait mode, you may experience performance degradation when using graphic-intensive applications such as 3D gaming.

## Adjusting the rotation display settings of your system

After you have rotated your monitor, you need to complete the procedure below to adjust the Rotation Display Settings of your system.

- ① **NOTE:** If you are using the monitor with a non-Dell computer, you need to go to the graphics driver website or your computer manufacturer website for information on rotating the 'contents' on your display.

To adjust the rotation display settings:

1. Right-click on the desktop and click **Properties**.
  2. Select the **Settings** tab and click **Advanced**.
  3. If you have an AMD graphics card, select the **Rotation** tab and set the preferred rotation.
  4. If you have an NVIDIA graphics card, click the **NVIDIA** tab, in the left-hand column select **NVRotate**, and then select the preferred rotation.
  5. If you have an Intel graphics card, select the **Intel** graphics tab, click **Graphic Properties**, select the **Rotation** tab, and then set the preferred rotation.
- ① **NOTE:** If you do not see the rotation option or it is not working correctly, go to [Dell Support Site](#) and download the latest driver for your graphics card.

# Operating the monitor

## Turn on the monitor

Press the power button to turn on the monitor.

Figure 31. Turn on the monitor

## Using the joystick control

Use the joystick control on the rear of the monitor to make On-Screen Display (OSD) adjustments.

Figure 32. Using the joystick control

- 1. Press the joystick to launch the Menu Launcher.
- 2. Move the joystick up, down, left, or right to toggle through the options.
- 3. Press the joystick again to confirm the selection.

Control Buttons	Description
 Up	Use the <b>Up</b> navigation key to adjust (increase ranges) items in the OSD menu.
 Down	Use the <b>Down</b> navigation key to adjust (decrease ranges) items in the OSD menu.
 Left	For first level in the Menu list, use Left navigation key to exit/close the OSD menu.
 Right	For all other levels except first level in the Menu list, <b>Right</b> navigation key will go to the next level.
 OK	Press the joystick to confirm your selection.

**NOTE:** To exit the current menu item and return to the previous menu, move the joystick to the left until you exit.

## Accessing the menu system

**NOTE:** After you change the settings, press the joystick to save the changes before exiting or proceeding to another menu.

1. Select the  icon to launch the OSD and display the main menu.

**Figure 35. OSD main menu**

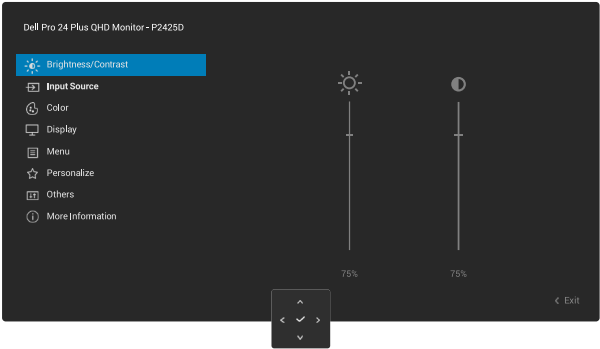

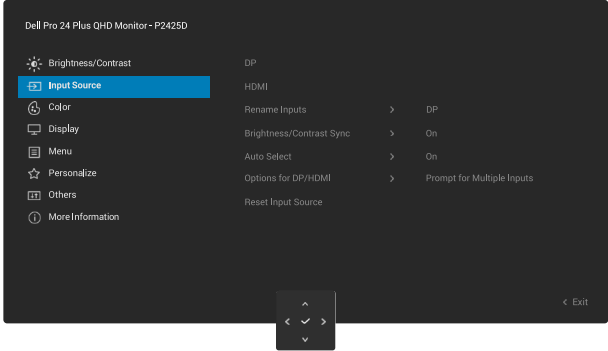

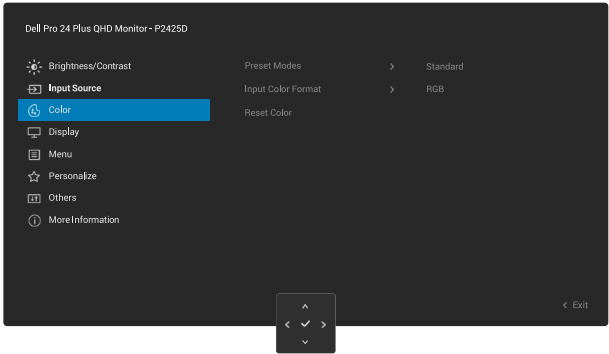

2. Press the joystick in  or  navigation key to activate the highlighted option.
3. Press the  and  navigation key to move between the setting options. As you move from one icon to another, the option is highlighted.
4. Press the  or  navigation key once to activate the highlighted option.
- NOTE:** The directional buttons (and the OK button) displayed may differ according to the menu you've selected. Use available buttons to make your selection.
5. Press  and  navigation key to select the desired parameter.
6. Press  and then use the  and  navigation key, according to the indicators on the menu, to make your changes.
7. Select the  to return to the main menu.

## OSD warning message

When the monitor does not support a particular resolution mode, the following message appears:

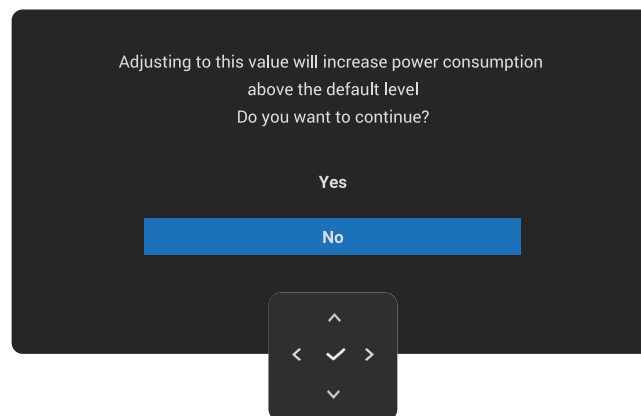

The current input timing is not supported by the monitor display.  
Please change your input timing to 2560x1440, 100Hz or any other  
monitor listed timing as per the monitor specifications.

**Figure 40. Warning message of not supported resolution mode**

This means that the monitor cannot synchronize with the signal that it is receiving from the computer. See [Monitor specifications](#) for the Horizontal and Vertical frequency ranges addressable by this monitor.

**NOTE:** The recommended mode is **2560 x 1440**.

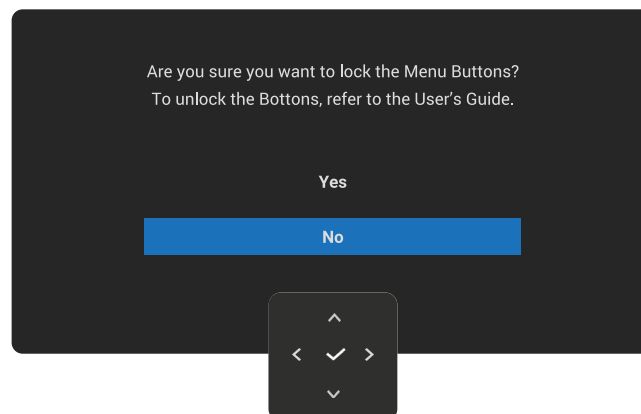

When you adjust the **Brightness** level above the default level for the first time, the following message appears:

**Figure 41. Warning message of adjusting the Brightness**

**NOTE:** If you select **Yes**, the message does not appear the next time you change the **Brightness** setting.

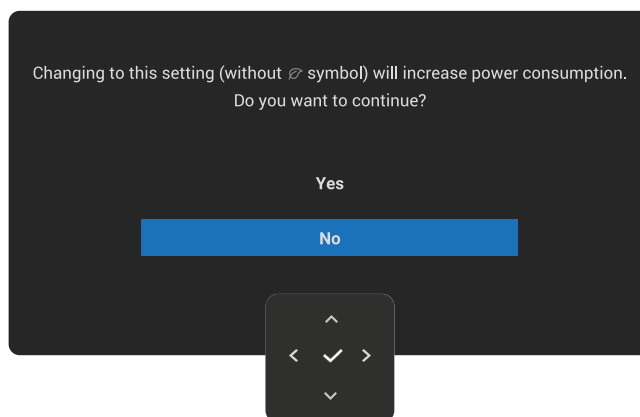

You will see the following message before the **Lock** function is activated:

**Figure 42. Warning message of activating the Lock function**

**NOTE:** The message may be slightly different according to the selected settings.

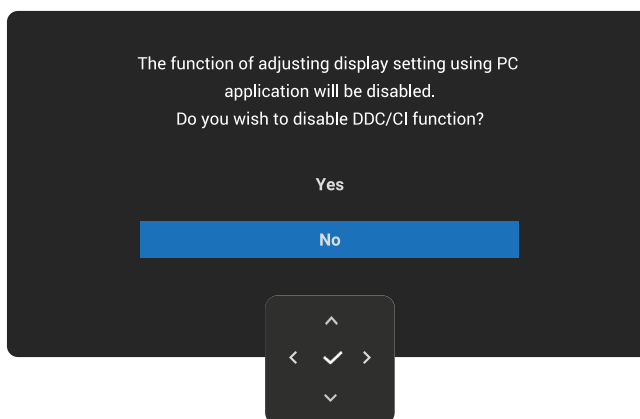

When you change the default **USB Charging** setting for the first time, the following message appears:

**Figure 43. Warning message of the increase power consumption**

**NOTE:** If you select **Yes**, the message will not appear the next time you change the **USB Charging** setting. When you perform the factory reset (see [Factory Reset](#)), the message will appear again.

You will see the following message before the **DDC/CI** function is disabled:

**Figure 44. Warning message of the DDC/CI**

When the monitor goes into Standby mode, the following message appears:

**Figure 45. The message of the Standby Mode**

Activate the computer and wake up the monitor to gain access to the [OSD](#).

The OSD functions only in the normal operation mode. If you press the joystick during the Standby mode, the following message appears depending on the selected input:

**Figure 46. Warning message of no signal input**

Activate the computer and the monitor to gain access to the [OSD](#).

**NOTE:** The message may be slightly different according to the connected input signal.

If DisplayPort, or HDMI input is selected and the corresponding cable is not connected, the following message appears:

**Figure 47. The message of No DP Cable**

or

**Figure 48. The message of No HDMI Cable**

**NOTE:** The message may slightly vary according to the selected input signal.

See [Troubleshooting](#) for more information.

## Locking the control buttons

You can lock the monitor control buttons to prevent access to the OSD menu and/or power button.

1. Move and hold the joystick up, down, left, or right for about four seconds until a pop-up menu appears.

**Figure 49.** The message of locking the control buttons

2. Move the joystick to select one of the following options:

: The OSD menu settings are locked and not accessible.

: The power button is locked.

: The OSD menu settings are not accessible and the power button is locked.

3. Press the joystick to confirm the configuration.

To unlock, move and hold the joystick up or down or left or right for about four seconds until a menu appears, and then select  to unlock and close the pop-up menu.

## Setting the maximum resolution

① **NOTE:** The steps may vary slightly depending on the version of Windows you have.

To set the maximum resolution for the monitor:

In Windows 10 and Windows 11:

1. Right-click on the desktop and click **Display settings**.
2. If you have more than one monitor connected, ensure to select **P2425D**.
3. Click the **Display Resolution** dropdown list and select **2560 x 1440**.
4. Click **Keep changes**.

① **NOTE:** If you do not see **2560 x 1440** as an option, you must update your graphics driver to the latest version.

Depending on your computer, complete one of the following procedures:

If you have a Dell desktop or laptop:

- Go to [Dell Support Site](#), enter your Service Tag, and download the latest driver for your graphics card.

If you are using a non-Dell computer (laptop or desktop):

- Go to the support site for your non-Dell computer and download the latest graphic card drivers.
- Go to the graphics card's website and download the latest graphic card drivers.

# Troubleshooting

**⚠ WARNING:** Before you begin any of the procedures in this section, follow the [Safety instructions](#).

## Self-Test

Your monitor provides a self-test feature that allows you to check whether your monitor is functioning properly. If your monitor and computer are properly connected but the monitor screen remains dark, run the monitor self-test by performing the following steps:

1. Turn off both your computer and the monitor.
2. Unplug the video cable from the computer.
3. Turn on the monitor.

If the monitor cannot sense a video signal and is working correctly, the following message appears:

**Figure 50.** The message of No DP Cable

or

**Figure 51.** The message of No HDMI Cable

- ① **NOTE:** The message may be slightly different according to the connected input signal.
  - ① **NOTE:** While in self-test mode, the power LED remains white.
4. This message can also appear during normal system operation if the video cable gets disconnected or damaged.
  5. Turn off your monitor, reconnect the video cable, and then then turn on both the computer and the monitor.

If your monitor screen still remains blank after performing the above steps, it indicates the monitor is functioning properly. Check the video controller and computer.

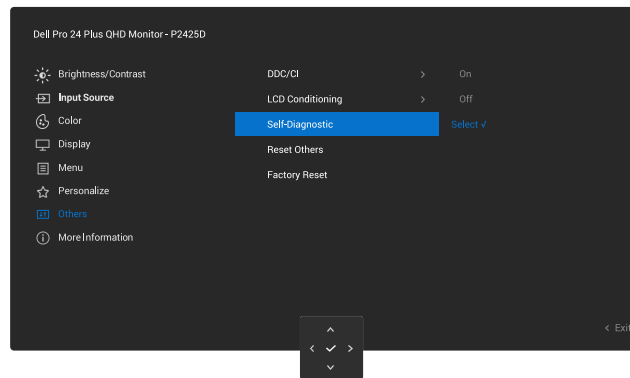

## Built-in diagnostics

Your monitor includes a built-in diagnostic tool to help you identify whether the screen abnormality is due to an issue with the monitor itself or with your computer and video card.

To run the built-in diagnostics:

1. Ensure that the screen is clean (no dust particles on the surface of the screen).
2. Press the joystick button to launch the OSD Main Menu.
3. Move the joystick button to select **Others > Self-Diagnostic** to initiate the self-diagnostic process.

**Figure 52. Built-in diagnostics**

4. When initiated, a gray screen appears. Inspect the screen for abnormalities.
5. Switch the joystick button. The color of the screen changes to red. Inspect the screen for abnormalities.
6. Repeat step 5 and inspect the screen when it displays the colors green, blue, black, and white followed by the on-screen text.
7. The test is complete when the text screen appears. To exit, toggle the joystick button again.

If you do not detect any screen abnormalities upon using the Built-in diagnostics tool, the monitor is functioning properly. Check the video card and computer.

## Common problems

The following table contains general information about common monitor problems that you might encounter and the possible solutions:

**Table 27. Common problems**

Common symptoms	What you experience	Possible solutions
No video/power LED off	No picture	<ul style="list-style-type: none"> <li>Ensure that the video cable connecting the monitor and the computer is properly connected and secure.</li> <li>Verify that the power outlet is functioning properly using any other electrical equipment.</li> <li>Ensure that the power button is pressed fully.</li> <li>Ensure that the correct input source is selected in the <a href="#">Input Source</a> menu.</li> </ul>
No video/power LED on	No picture	<p>Increase brightness and contrast controls using the OSD.</p> <p>Perform monitor self-test feature check.</p> <p>Check for bent or broken pins in the video cable connector.</p> <p>Run the built-in diagnostics. For more information, see <a href="#">Built-in diagnostics</a>.</p> <p>Ensure that the correct input source is selected in the <a href="#">Input Source</a> menu.</p>
Poor focus	Picture is fuzzy, blurry, or ghosting	<p>Eliminate video extension cables.</p> <p>Reset the monitor to factory settings (<b>Factory Reset</b>).</p> <p>Change the video resolution to the correct aspect ratio.</p>
Shaky/jittery video	Wavy picture or fine movement	<p>Reset the monitor to factory settings (<b>Factory Reset</b>).</p> <p>Check environmental factors.</p> <p>Relocate the monitor and test in another room.</p>
Missing pixels	LCD screen has spots	<p>Cycle power On-Off.</p> <p>Pixel that is permanently off is a natural defect that can occur in LCD technology.</p> <p>For more information about Dell Monitor Quality and Pixel Policy, see <a href="#">Dell Display Pixel Guidelines</a>.</p>
Stuck-on pixels	LCD screen has bright spots	<p>Cycle power On-Off.</p> <p>Pixel that is permanently off is a natural defect that can occur in LCD technology.</p> <p>For more information about Dell Monitor Quality and Pixel Policy, see <a href="#">Dell Display Pixel Guidelines</a>.</p>
Geometric distortion	Screen not centered correctly	<p>Reset the monitor to factory settings (<b>Factory Reset</b>).</p>
Horizontal or vertical lines	Screen has one or more lines	<p>Reset the monitor to factory settings (<b>Factory Reset</b>).</p> <p>Perform monitor self-test feature check (see <a href="#">Self-Test</a>) and determine if these lines are also in self-test mode.</p> <p>Check for bent or broken pins in the video cable connector.</p> <p>Run the built-in diagnostics. For more information, see <a href="#">Built-in diagnostics</a>.</p>
Synchronization problems	Screen is scrambled or appears torn	<p>Reset the monitor to factory settings (<b>Factory Reset</b>).</p> <p>Perform monitor self-test feature check (see <a href="#">Self-Test</a>) to determine if the scrambled screen appears in self-test mode.</p> <p>Check for bent or broken pins in the video cable connector.</p> <p>Restart the computer in the safe mode.</p>

Common symptoms	What you experience	Possible solutions
Safety related issues	Visible signs of smoke or sparks	Do not perform any troubleshooting steps. <a href="#">Contact Dell</a> immediately.
Intermittent problems	Monitor malfunctions on and off	Ensure that the video cable connecting the monitor to the computer is connected properly and is secure.  Reset the monitor to factory settings ( <b>Factory Reset</b> ).  Perform monitor self-test feature check (see <a href="#">Self-Test</a> ) to determine if the scrambled screen appears in self-test mode.
Missing color	Picture missing color	Perform monitor self-test feature check (see <a href="#">Self-Test</a> ).  Ensure that the video cable connecting the monitor to the computer is connected properly and is secure.  Check for bent or broken pins in the video cable connector.
Wrong color	Picture color not good	Change the settings of the <b>Preset Modes</b> in the <b>Color</b> menu OSD depending on the application.  Adjust the R/G/B values under <b>Custom Color</b> in the <b>Color</b> menu OSD.  Change the <b>Input Color Format</b> to <b>RGB</b> or <b>YCbCr</b> in the <b>Color</b> settings OSD.  Run the built-in diagnostics. For more information, see <a href="#">Built-in diagnostics</a> .
Image retention from a static image left on the monitor for a long period of time	A faint shadow from the static image displayed appears on the screen	Set the screen to turn off after a few minutes of screen idle time. These can be adjusted in Windows Power Options or Mac Energy Saver setting.  Alternatively, use a dynamically changing screensaver.
Video ghosting or overshooting	Video ghosting, shadows or color smear while scrolling	Change the <b>Response Time</b> in the <b>Display</b> menu OSD to <b>Normal</b> .
Screen image is too small	Image is centered on screen, but does not fill the entire viewing area	Check the <b>Aspect Ratio</b> setting in the <b>Display</b> menu OSD.  Reset the monitor to factory settings ( <b>Factory Reset</b> ).
Cannot adjust the monitor with the joystick	OSD does not appear on the screen	Turn off the monitor, unplug the power cable, plug it back, and then turn on the monitor.  Check whether the OSD menu is locked. If yes, move and hold the joystick up/down/left/right for four seconds to unlock (see <a href="#">Lock</a> and <a href="#">Locking the control buttons</a> ).
No input signal when you press the power button or toggle the joystick	No picture, the LED light is white	Check the signal source. Ensure the computer is not in the power saving mode by moving the mouse or pressing any key on the keyboard.  Check whether the signal cable is plugged in properly. Re-plug the signal cable if necessary.  Reset the computer or video player.
The picture does not fill the entire screen	The picture cannot fill the height or width of the screen	Due to different video formats (aspect ratio) of DVDs, the monitor may display in full screen.  Run the built-in diagnostics. For more information, see <a href="#">Built-in diagnostics</a> .
No video at HDMI/DisplayPort port	When connected to some dongle/docking device at the port, there is no video when unplugging/plugging the cable from the laptop	Unplug the HDMI/DisplayPort cable from dongle/docking device, then plug the docking HDMI/DisplayPort cable into the laptop.

## Universal Serial Bus (USB) specific problems

**Table 28. Universal Serial Bus (USB) specific problems**

Common symptoms	What you experience	Possible solutions
USB interface is not working	USB peripherals are not working	<ul style="list-style-type: none"><li>• Check that your monitor is turned on.</li><li>• Reconnect the upstream cable to your computer.</li><li>• Reconnect the USB peripherals (downstream connector).</li><li>• Turn the monitor off and then turn on again.</li><li>• Reboot the computer.</li><li>• Some USB devices like external portable hard drive require higher electric current; connect the device directly to the computer system.</li></ul>
USB 5Gbps interface is slow	USB 5Gbps peripherals working slowly or not working at all	<ul style="list-style-type: none"><li>• Check that your computer is USB 5Gbps compatible.</li><li>• Some computers have USB 5Gbps, USB 2.0, and USB 1.1 ports. Ensure that the correct USB port is used.</li><li>• Reconnect the upstream cable to your computer.</li><li>• Reconnect the USB peripherals (downstream connector).</li><li>• Reboot the computer.</li></ul>
Wireless USB peripherals stop working when a USB 5Gbps device is plugged in	Wireless USB peripherals responding slowly or only working as the distance between itself and its receiver decreases	<ul style="list-style-type: none"><li>• Increase the distance between the USB 5Gbps peripherals and the wireless USB receiver.</li><li>• Position your wireless USB receiver as close as possible to the wireless USB peripherals.</li><li>• Use a USB-extender cable to position the wireless USB receiver as far away as possible from the USB 5Gbps port.</li></ul>
Wireless USB mouse does not work properly	When plugged into one of the USB ports on the rear side of the monitor, the wireless USB mouse lags or freezes during use	<ul style="list-style-type: none"><li>• Unplug the wireless USB mouse receiver and re-plug it into one of the Quick Access USB ports at the bottom of the monitor.</li></ul>
