

Active USB 3.0 USB-A extension cable with signal booster chipset

Features:

- ▶ Extends the connection between a USB device such as computer, notebook or tablet and a USB 3.0 peripheral
- ▶ Designed with two additional USB signal booster chipsets in-line in the cable to boost the USB signal and thus provide maximum data rate for connected devices
- ▶ Each additional chipset has a DC power supply port for optional connection of an external power supply
- ▶ Extends the USB 3.0 signal beyond 10 or 20 meters depending on model
- ▶ The USB 3.0 standard guarantees a high data rate of 5 Gbit/s
- ▶ Molded, tear-proof male / female USB-A connectors
- ▶ Protects the USB sockets of devices from repeated connections and disconnections
- ▶ Backward compatible with USB 2.0
- ▶ With bright status LED
- ▶ Plug and play

Package contents:

- ▶ 1 x USB 3.0 extension cable with signal repeater
- ▶ 1 x user's manual
