i-tec Universal KVM HUB 2x USB-C + 2x USB-A 3.0

PRODUCT DESCRIPTION

If you need to connect USB devices and peripherals to two computers and even want to share them between them, you've found the perfect solution. This HUB gives you an additional 4 USB ports (2x USB-A and 2x USB-C) that you can easily - at the touch of a button - assign to PC 1 or PC 2. Connect an external keyboard and mouse, transfer data or movies from a USB flash drive at speeds of up to 5 Gbps, conveniently for up to two computers at the same time. The hub requires no drivers to install, just connect it with a USB-C or USB-A cable and you can start using it right away. The hub has built-in surge protection for your computer in case of short circuits on peripherals. An external USB-C adapter of up to 15W (5V, 3A) can be connected for higher power stability, especially if you want to use multiple HDDs or SSDs. However, the use of this adapter is not mandatory, and in most cases not necessary (NOTE: charging adapter not included).

PRODUCT FEATURES

- 2x USB-A port for connection to guest devices
- 2x USB-A 3.2 Gen.1 (5Gbps)
- 2x USB-C 3.2 Gen.1 (5Gbps)
