

34" IPS ultra-wide flat screen with PiP, PBp and height adjustable stand

With a 21:9 UWQHD resolution, the ProLite XUB3493WQSU provides an extended desktop space ideal for working with multiple applications side by side. The IPS panel ensures accurate colour reproduction and wide viewing angles, suitable for both detailed work and media consumption. Equipped with Picture-in-Picture (PiP) and Picture-by-Picture (PbP) functionalities, the monitor allows you to display content from two different sources simultaneously. This is especially useful for professionals who need to monitor multiple systems or compare data across devices without the need for a second screen.

The 150 mm height-adjustable stand helps you maintain an ergonomic posture, while flicker-free technology and a blue light reducer contribute to reduced eye fatigue. The XUB3493WQSU offers a practical and flexible solution for users who value efficiency, clarity, and comfort.

IPS Technology

IPS displays are best known for wide viewing angles and natural, highly accurate colours. They are especially suited for colour-critical applications.
