with Android, Power over  
Ethernet Technology, NFC/RFID  
reader and a RGB LED bar  
around the screen**

The ProLite TW1625LASC-B3PNR is a smart and intuitive 15.6" touch panel PC, designed for high-traffic environments such as meeting rooms, info points, or hospitality spaces. Its 10-point PCAP touch technology with Optical Bonding ensures smooth and precise interaction with reduced glare, while protecting the display from humidity and moisture build-up. Powered by Android 14, and equipped with powerful hardware, it allows easy installation of apps directly on the device - making it a all-in-one solution. Thanks to Power over Ethernet (PoE), both power and data are delivered through a single cable, simplifying installation and reducing additional cables.

The integrated NFC/RFID reader enables contactless interaction with compatible tags or devices – ideal for quick check-in to rooms, employee authentication or triggering automated actions such as starting a presentation. The RGB LED bar integrated into the bezel shows the availability of rooms at a glance. With a built-in 5MP camera, microphone, and speakers, the TW1625LASC-B3PNR delivers seamless, modern interaction in any smart space. Additionally, it integrates effortlessly with [iiSignage<sup>2</sup>](#), iiyama's Content Management System (CMS), giving you full control over your messages and advertising, in landscape portrait and face-up position.

## RGB Led bar

The RGB Led bar will clearly and intuitively indicate the room's availability status and can display a wide range of colors.

## NFC & RFID reader

Thanks to the NFC/RFID reader, the touch panel PC allows to communicate wirelessly with enabled devices or tags within close proximity.

## Connectivity

The RJ45 (LAN) connector supporting Power over Ethernet technology (POE) allows to provide both data connection and power by a single cable, which simplifies installation in areas where many cables would interfere with the environment.

## Android OS

Thanks to Android OS, you can easily customize the display to your needs by installing applications directly to it.
