

Power that performs. Reliability that lasts.

C21 - IEC Lock Locking Connector

When power continuity matters, compromise isn't an option. That's why the C21 IEC Lock™ is built to stay locked in under pressure, delivering unmatched security, heat resistance, and vibration-proof performance where failure isn't an option.

Prevents accidental disconnection

Ideal for data centres, broadcast & medical

Suitable with any C20 / C22 inlet

Vibration proof with side release button

Heat tolerance of up to 155°C

Capable of handling higher currents

Power that performs. Reliability that lasts.
