

MeetingBoard Pro Datasheet

All-in-one and Interactive Meeting Device

Yealink MeetingBoard Pro is the latest all-in-one meeting device with 3 sizes (65", 75", and 86") designed for small to large rooms. This intelligent meeting device integrates video conferencing, HD wireless content sharing, and an electronic whiteboard, supporting up to 4K video call quality. Its all-in-one design and flexible mounting options offer easy installation and are perfect for seamless video conferencing. This product delivers cutting-edge audio and video communication capabilities, powered by advanced AI technology, ensuring crystal-clear sound and ultra-HD visuals. With intelligent full-duplex, IntelliFocus, and video fence, it redefines the video conferencing experience, bringing unparalleled clarity and efficiency to every meeting. The MeetingBoard Pro also supports native Teams and Zoom and is certified by both platforms.

Streamline Installation and Deployment	Triple-eye Camera System (3*50MP)	IntelliFocus	
Video Fence	12-meter full duplex	AI Noise Cancellation	
native Teams, Zoom, and General Mode	Whiteboard Collaboration	Android or Windows	

Key Features

- Streamline Installation and Deployment
- Triple-eye Camera System (3*50MP)
- AI-Powered View: IntelliFocus, Video Fence
- Pro Sound: 12-meter full duplex (39 feet), noise cancellation, and noise reverberation
- Support native Teams, Zoom, and General Mode
- Dual-System (Windows/Android)
- Support whiteboard collaboration

All-In-One Design, Streamline Installation and Deployment

Yealink MeetingBoard Pro, with its all-in-one design and versatile mounting options (wall-mounted or floor-stand), offers simplified installation and deployment, making it the perfect choice for seamless video conferencing. The uncluttered design and simple deployment take only 12 minutes to set. At the same time, as the MeetingBoard Pro integrates the functions of meeting, display, and whiteboard, users only need to manage a single device, significantly reducing management complexity.

Built-in Triple-eye Camera with 50MP, Providing "Face-to-Face" Meetings

The MeetingBoard Pro has a built-in triple-camera system, each with 50MP resolution—one for wide-angle (1/1.56 Sony Sensor) and two for telephoto (1/2 Sony Sensor), ensuring high-resolution imaging across different focal lengths. The professional-grade lens delivers low grain, natural colors, and HD image quality. The IWB features a built-in automatic physical privacy shutter that blocks the camera when not in use, ensuring privacy protection for users. It also supports the external PTZ camera (MB-12X Pro) with optical zoom for long-distance tracking and 4K lossless zoom for close-ups.

Powerful Camera AI Tracking, Immersive Meeting Experience

With a dedicated AI video processor, MeetingBoard Pro supports auto framing, speaker tracking, Picture-in-Picture (PIP)*, IntelliFocus, video fence, and audio fence. All camera AI features are seamless, with fast tracking, ensuring a smooth overall meeting experience. IntelliFocus displays close-ups of the last active speakers separately, and also provides a panoramic view of all participants at the bottom of the screen, allowing more participants to appear on the screen and engage fully with the other party, thereby making the meeting more realistic. The Video Fence feature enables users to create virtual meeting spaces in semi-open environments, preventing non-participants from being mistakenly tracked.

Powerful AI Enhanced Audio, Enhanced Pro Sound

The built-in array of 16 microphones and stereo speakers with a dedicated AI audio processing chip ensures excellent sound pickup, noise cancellation, and reverberation. With powerful computational capabilities, it creates a groundbreaking experience. It supports 12-meter full-duplex calls covering every corner of the conference room. Intelligent noise cancellation (e.g., keyboard typing, door opening/closing, chair dragging), and noise reverberation (especially in rooms with glass walls), help reduce distractions and keep communication focused. MeetingBoard Pro also supports external microphones, including desktop microphones (wired and wireless) and ceiling microphones for extended pickup range, covering larger areas.

Intelligent Whiteboard, Ultra-Low Latency Writing, Sparking Team Creativity

It supports dual-person simultaneous writing and also supports one writing, and the other erases, without interfering with each other, significantly improving meeting efficiency. Palm rejection ensures clean, clear content. With the four-level stylus, users can experience fluid writing, pen tips for writing, and pen tails for erasing and simulating a paper-like experience. It also supports gesture controls for drawing and palm erasing. Intelligent charts, shapes, image insertions, and sticky notes make discussions more dynamic.

Open Ecosystem, Flexible Conferencing on Multiple Platforms

Supports certifications from leading domestic and international video conferencing platforms, such as Teams, Zoom, etc. (listed alphabetically). It also offers a USB peripheral mode (BYOD) that allows the device to function as an external display and audio device for your computer, enabling larger-screen conferencing experiences. It supports the OPS module by providing a Windows system and meeting professional application needs in some sectors such as education and manufacturing.

Supports Yealink Room Accessories for Various Meeting Room Sizes

Supports wireless (or wired) expansion microphones, external PTZ cameras (MB-12X Pro), touch panels, movable

stands, and 4K wireless presentation pods, providing a complete meeting room solution for different meeting needs.

Technical Specifications

Technical Parameter	Description
System Overview	<ul style="list-style-type: none"> · Operating System: Android 13.0 · Storage <ul style="list-style-type: none"> - Memory: 8GB - Flash: 64GB · CPU: 4 cores at 2.2GHz + 4 cores at 2.0GHz · AI Computing Power: 13.2T FLOPS

Picture-in-Picture*: In the Picture-in-Picture (PIP) Mode, it can realize the superimposed display of the speaker's close-up and the conference room's panoramic picture. The main window shows the view in the speaker tracking mode, and the small window shows the Auto Framing mode. When no one speaks, the window returns to the panoramic view.
