- Go Live for wireless video broadcast to website via UStream
- Wirelessly save your videos & photos on your computer

Bring it with you anywhere

- Small and slim design to fit easily into your pocket
- Extra long battery life lets you shoot more

PHILIPS

Features

Full HD (1080p) videos

Capture and enjoy videos in full high definition quality (full HD 1080p). "1080" refers to the display resolution, in terms of the number of horizontal lines on screen. "p" stands for progressive scan, or the sequential appearance of the lines in each frame. 1080p gives video quality that is superior to that found in typical mobile phones and digital cameras. In addition, the camcorder uses the same video format as Blu-ray players and discs – H.264. This highly sophisticated format delivers superb HD picture quality, letting you savor crystal clear memories on video.

Advanced anti-shake

Advanced anti-shake lets you take great videos that you will always be proud to share. Steady and undistorted videos are ensured by gyro sensors that are armed with advanced algorithms. The sensors take measurements of the distance between the ground and the camera lens, and make the necessary corrections whenever the camcorder wobbles. This advanced technology gives you blur-free pictures every time, letting you capture the best moments in life in amazing videos.

Built-in Wi-Fi

The camcorder has built-in Wi-Fi, letting you share your photos and videos instantly – without a computer and without wires. The camcorder connects wirelessly to Philips SimplyShare devices and DLNA compatible TVs, Blu-ray players, network media players, home cinema systems and photo frames, letting you enjoy your favourite moments on a bigger screen. You can also upload your shots and footages onto internet sites, with easy-to-use built-in applications for Facebook, Twitter, YouTube and Picassa. Philips ESee make sharing truly simple.

SimplySwipe

Simply swipe on the ESee camcorder's touchscreen to share photos and videos. As you browse through pictures and footages on your camcorder, you can decide what to share by simply swiping across the shot. Watch favorites directly on your Philips SimplyShare devices or DLNA compatible TVs, Blu-ray players, network media players and home cinema systems. You can even swipe and share your shots on Philips photo frames and tablets.

Instant upload to Facebook

Uploading directly from the camcorder to internet sites like YouTube, Facebook, Tweeter and Picassa is a breeze – all you have to do is swipe on the camcorder's touchscreen to share photos and videos to the selected social network and they will be uploaded wirelessly.

Go Live

Broadcast events live with the Esee camcorder, and share all that is happening, as they are happening. All you have to do is make a Wi-Fi connection and select 'Go Live'. What you are recording will then start streaming onto the Ustream website where it can be viewed by family and friends wherever they are. Let loved ones take part in your experiences and share all of life's greatest moments as they take place.

Up to 10 megapixel photos
