The NewStar KVM switch, model NS1631D, allows you to control up to 16 PC's/servers from one console. The NewStar models are designed to be the most compatible, reliable, and affordable single or multi-user KVM switches available.

Connected systems are quickly switched between using fast-switch buttons, hot key commands or OSD (On Screen Display).

This KVM switch does not include cables. These can be ordered separately in various lengths between 2-15 meters.

Its low cost, super small size, and high 1920x1440 maximum resolution display capability makes NewStar switches perfect for any application where reliability, compatibility, and faultless operation are important.
