

MPN: VLUSBCPOWER-H

USB-C Power Injector w/HDMI out supports up to 140W Charging

USB-C Power Injector supports up to 140W Charging. The charging requires a USB-C PD charger (not included).

The unit supports DP Alt Mode with 4K@60Hz 4:4:4 video and enables SST/MST, allowing dual-video output via USB-C and HDMI. This makes it ideal for setups requiring a second display signal directly from the injector.

Please order PD charger separately: VLUSBCPWR100

Injects up to 140W charging for USB host. Max total cable length in + out = 7 meters

we recommend Max 2 meter on PC side and 3 meter og Device side.

The USB-C connector in and output are with hole for USB-C cables with locking screw

we recommend Vivolink PROUSBCMMS

This injector occupies only one Tier in the USB connection.

- Supports SST/MST output USB-C w/ HDMI dual video output
- DP Alt mode w/ 4K@60Hz 4:4:4 video in and output
- Supports USB PD 3.1 protocol
- Injects up to 140W charging for USB host
- Switchable power for USB-C out (15w)
- Up to 10Gb USB 3.2 Gen2 data transfer rate

Specifications

Certificates	RoHS compliance	Yes
Features	Built-in display	No
