

**TOUCHSCREENS****INFORMATION****10.1" PCAP 10pt touch screen  
with Android, Power over  
Ethernet Technology, NFC/RFID  
reader and a RGB LED bar  
around the screen**

The ProLite TW1025LASC-B3PNR touch panel PC is a perfect choice for high-use environments such as booking rooms, information desks or other corporate and hospitality applications. The Optical Bonded Projective Capacitive (PCAP) 10-point touch technology ensures a seamless and accurate touch response and a lower light reflection, in addition, the display is protected against humidity and potential moisture development. Thanks to the pre-installed Android 13 operating system, it is possible to easily customize the monitor by installing applications directly to it. The Power over Ethernet technology (POE) allows to provide both data connection and power by a single cable, simplifying all installations.

Thanks to the NFC/RFID reader, the touch panel PC allows to communicate wirelessly with enabled devices or tags within close proximity and the RGB Led bar will clearly and intuitively indicate the availability status of the room. Additionally, it integrates effortlessly with [iiSignage<sup>2</sup>](#), Iiyama's Content Management System (CMS), giving you full control over your messages and advertising, in landscape portrait and face-up position. Together with the built-in 5 megapixel camera, microphone and speakers it offers limitless, interactive installation possibilities.

## RGB Led bar

The RGB Led bar will clearly and intuitively indicate the room's availability status and can display a wide range of colors.

## NFC & RFID reader

Thanks to the NFC/RFID reader, the touch panel PC allows to communicate wirelessly with enabled devices or tags within close proximity.

## Connectivity

The RJ45 (LAN) connector supporting Power over Ethernet technology (POE) allows to provide both data connection and power by a single cable, which simplifies installation in areas where many cables would interfere with the environment.

## Android OS

Thanks to Android OS, you can easily customize the display to your needs by installing applications directly to it.
