

HP Premium Support for Communication & Collaboration Devices

Poly+ Analyze

Service overview

It's premium support that delivers peace of mind only HP can deliver. Poly+ Analyze gives you access to support 24/7 to keep your HP Poly solution available and HP Lens Pro for Rooms features for your entire HP Poly estate.

Service feature highlights

- 24/7 global technical phone support¹
- Priority Support¹
- Advance hardware replacement with next business day parts shipment²
- Poly Lens Pro for Rooms features
- Software Upgrades and Updates

Specifications

Table 1. Service features

Feature	Delivery specifications
24/7 Priority Support ¹	Partners can contact HP to receive priority 24/7 support for the Customer's supported solution. Support is available via chat, phone, web and video; it is highly recommended that Customers create a MyHP account to submit support requests. HP support can be reached at the following link: Poly Support HP® Support .
Advance Parts Replacement – Next Business Day ² (NBD) Response	Availability and operations: HP will provide advance replacement for any failed hardware component covered under this Service Description. If HP's technical support representative determines that a replacement part is required to resolve a reported or diagnosed problem, a replacement part will be shipped by HP for next business day delivery (Monday through Friday, excluding holidays) for advance replacement using an expedited carrier service. HP will endeavour to process replacement part orders on the same day in order to meet local carrier pick-up schedules. The deadline for same-day processing is generally 15:00 local time, Monday to Friday (excluding holidays), to HP's regional parts depot. For products covered by this service, HP pays for all freight charges for advance parts replacement transactions. Customs and logistics delays may affect the actual delivery time of replacement parts to the Customer facility. The next business day delivery is only applicable in countries where an HP entity is the Importer of Record. Replacement parts: Replacement parts supplied by HP will be either new parts or parts equivalent in performance to new parts when used with the HP Poly Product and are warranted for ninety (90) days from shipment. Parts removed from HP Poly Products as part of the repair are the property of HP and must be received back to the local HP service facility (to the location listed on the pre-addressed return package provided by HP, if applicable) within ten (10) business days of receipt of the replacement part, or Customer will be invoiced at HP's then-current list price for the HP Poly Product or component, as published in HP's price book.

Table 1. Service features

Feature	Delivery specifications								
Escalation management	HP has formal escalation procedures to resolve complex Customer problems. The HP support management team coordinates the escalation of problems and rapidly engages the right solution specialists throughout HP. HP will execute internal notifications to alert HP service management when the Customer support cases age past established thresholds.								
Incident management	HP will acknowledge a call by logging a case, communicating the case ID to you and confirming the incident severity and time requirements for commencement of remedial action. Note: For events received via HP electronic remote support solutions, HP will contact you, ask you to define the incident severity and arrange access to the system before the hardware Call to Repair time or hardware onsite response time period can start. The hardware support onsite response time and Call to Repair time commitments may differ depending on incident severity. You determine the incident severity level. <table> <tr> <td>Severity 1: Critical Down</td><td>Production environment down; production system or production application down/at severe risk; Data corruption/ loss or risk; business severely affected; safety issues</td></tr> <tr> <td>Severity 2: Critically Degraded</td><td>Production environment severely impaired; production system or production application interrupted/compromised; risk of recurrence; significant impact on the business</td></tr> <tr> <td>Severity 3: Normal</td><td>Non-production system (e.g. test system) down or degraded; production system or production application degraded with workaround in place; non-critical functionality lost; limited impact on the business</td></tr> <tr> <td>Severity 4: Low</td><td>No business or user impact</td></tr> </table>	Severity 1: Critical Down	Production environment down; production system or production application down/at severe risk; Data corruption/ loss or risk; business severely affected; safety issues	Severity 2: Critically Degraded	Production environment severely impaired; production system or production application interrupted/compromised; risk of recurrence; significant impact on the business	Severity 3: Normal	Non-production system (e.g. test system) down or degraded; production system or production application degraded with workaround in place; non-critical functionality lost; limited impact on the business	Severity 4: Low	No business or user impact
Severity 1: Critical Down	Production environment down; production system or production application down/at severe risk; Data corruption/ loss or risk; business severely affected; safety issues

Severity 3: Normal	Non-production system (e.g. test system) down or degraded; production system or production application degraded with workaround in place; non-critical functionality lost; limited impact on the business								
Severity 4: Low	No business or user impact								
Software upgrades and updates	HP will make available system Software Upgrades and Updates at no additional charge. HP will post all generally available (GA) software at: Poly Support HP® Support or via Poly Lens ³ . Poly Lens and HP Poly Studio Apps can be used to deploy the latest device software updates.								
HP Support website for Poly	HP will provide 24/7 access to the HP Support website for HP Poly devices at: Poly Support HP® Support. This Online Support Centre will include the following functionality for Customer accounts: • Register Products and look up Product licensing. • Create service requests and review Support Ticket status. • Check the status of parts replacement including delivery tracking information. • Perform Knowledge Base searches. • Download the latest Product documentation. • Download the latest HP Poly endpoint software that is available for the current release and the latest version minus one								
Poly Lens ³ Pro for Rooms Features	Customers will have access to HP Poly Lens Pro for Rooms features as part of this service offer. For details about HP Poly Lens Pro for Rooms features, please visit: https://www.hp.com/us-en/poly/software-and-services/software/poly-lens/lens-pro.html								

Table 1. Service features

Feature	Delivery specifications
Ecosystem Cloud Partner Support ⁴ (ECPS)	ECPS improves response times in HP Poly-enabled ecosystem cloud solutions by acting as a primary point of contact to the Customer. The HP global support team has the skills, training, experience and processes needed to resolve technical issues in these complex environments. When the HP support team receives an incident request for HP Poly Product used in an approved Strategic Cloud Partner (Cloud Partner) environment, a Support Ticket will be created in HP's ticketing system for tracking purposes. Support Tickets are escalated and managed with appropriate internal HP teams, including engineering if deemed necessary, to determine cause and plan to reach resolution. If HP determines that the problem is caused by or related to the Cloud Partner environment, at the Customer's request, HP will attempt to open an incident request with the Cloud Partner, document findings, and provide the Cloud Partner's incident tracking number to the Customer. The Customer is responsible for having an existing support agreement with their Cloud Partner. HP will be responsible for working directly with the Cloud Partner (when permitted by the Cloud Partner) on resolution or future status updates to the Customer. If not possible to open an incident request, HP will provide the Customer with findings and refer the Customer to the Cloud Partner for resolution. If requested, the HP support team will participate in joint calls with the Cloud Partner to isolate and resolve problems on behalf of their mutual Customer using defined escalation processes in place with Cloud Partners. When permitted by the Cloud Partner and Customer, HP will: ▪ Communicate directly with the Cloud Partner. ▪ Open or close Incident Requests with the Cloud Partner. ▪ Provide Cloud Partner status updates to the Customer. ▪ Verify the Customer's entitlement and term with the Cloud Partner. When a solution can be restored by implementing a temporary workaround, such a fix will be facilitated and communicated back to the Customer. All software bugs and feature requests will be handled by HP or Cloud Partner engineering via standard bug fix and software release processes. HP and its Cloud Partners provide flexible video and voice collaboration through verified and approved multi-vendor integrated solutions. Contact your HP representative for the current list of HP approved Strategic Cloud Partners. The Customer must maintain a current service or subscriber agreement with Cloud Partners, operate and maintain applicable software as specified by the Cloud Partner and, if requested, give HP signed written approval to act on their behalf regarding ECPS services.

Customer responsibilities

The Customer will:

1. Provide a contact email address with their purchase order. The contact will be responsible for activating the HP Lens tenant. Please note that if an HP Authorized Reseller email is supplied then the reseller will take responsibility for providing the Poly+ Analyze licence key that they receive to their appropriate Customer. Any actions taken by the reseller on behalf of the Customer are between the reseller and the Customer.
2. Create HP Poly Lens tenant and register all HP Poly products with HP Poly Lens for Rooms that are covered by the Poly+ Analyze Service. Customer is expected to utilise Poly Lens or Poly Clariti Manager to manage inventory reporting, unless otherwise agreed with HP.
3. Provide inventory report from Poly Lens³ for quoting. Poly Clariti Manager will be used for RealPresence Group Series.
4. Provide updated inventory report from Poly Lens quarterly for true-up. Poly Clariti Manager will be used for RealPresence Group Series.
5. Within a reasonable time, register all new products to Poly Lens. Poly Clariti Manager will be used for RealPresence Group Series.
6. Purchases the same Service, including any options, for all new additional HP Poly Products purchased or discovered in production during the term of the Service. HP can, at its sole discretion, decline to provide Service support if the Customer does not include all its HP Poly Products under this Service.
7. When placing an order for an existing Poly+ Analyze account, please ensure you provide your PIN ID on all Purchase orders to ensure all your new products are added to an existing agreement. Please note, if you do not refer to your existing PIN ID, you may receive a new PIN ID for each order.
8. Install any Software Updates or Upgrades made available to the Customer for products covered by this Service.
9. As requested and applicable for support services, provide HP with information related to their HP Poly Products supported by the Service including, without limitation, network diagrams, system configurations, Customer Detail Records ("CDR"s), and operation procedures.
10. Notify HP of any changes made to the HP Poly Products if such changes were made using hardware or software purchased from a vendor other than HP.
11. Be responsible for replacing, at its own expense, any and all consumable items used in connection with the covered HP Products, including without limitation, bulbs and batteries.
12. For hardware replacement requests, Customer will provide the product serial number.

It is recommended that the Customer proactively provide HP technical support staff with remote access to all HP Poly Products covered by the HP Premium Service (Poly+ Analyze) as required. Such remote access allows HP to expedite the resolution of issues.

Optional Fee-based Services

The following optional capabilities are available to be purchased separately to enhance the HP Analyze support offering.

Customer Delivery Manager (CDM)

The Customer Delivery Management programme is delivered through a CDM assigned to the Customer. The CDM is an experienced service manager who serves as the non-technical management interface to a designated Customer representative for all HP service programme activities.

Serving as the Customer advocate within HP, the CDM will monitor, analyse, and report on aspects related to the service and support of the Customer's HP production solution. The CDM's objectives are ensuring that all service programme deliverables are completed to the Customer's satisfaction, monitoring that service deliverables are on time and in accordance with current HP standard operating procedures, policies and practices, continued effective communication with the Customer, and adherence to reporting schedules.

Customers may choose to purchase CDM. An additional CDM may be added to the support contract.

This global value-added service option is available to Customers that maintain an active HP support agreement on their HP Poly solution. The Customer Delivery Manager role does not replace HP programme managers, project managers, or any other roles that may be assigned to the Customer for the implementation, installation, maintenance, or management of the HP Poly solution.

Technical Customer Assurance Management

The Technical Customer Assurance Management programme is delivered through an assigned Technical Customer Assurance Manager (TCAM) who is responsible for proactively assisting Customers to maintain their HP solution and achieve desired response and reliability goals when technical assistance is required (the "Service"). The TCAM has immediate access to HP's knowledge base and is backed up by 24/7 remote expertise including Advance Services technical team, research and development, lab systems, and management escalation support to ensure a high level of support and response times. For full details of this service, please reach out to your HP representative.

Field Replaceable Unit Replace and Destroy (FRURAD)

For Government, Federal and Security conscious customers who cannot return hardware units when faulty, a FRURAD option is available at an additional charge. A separate Service Description for deliverables is available on request.

US-based call centre - optional add-on service for federal customers only

Federal customers may purchase an optional add-on service for support calls to be answered by a US-based call centre. This service purchased in conjunction with an HP support contract for HP Poly solutions provides remote access to a US soil-based telephone technical support centre during local business hours. Priced per device per annum.

Security management

HP's Information Security Management System (ISMS) is based on best practices and is aligned to the ISO27001 framework. To prevent security incidents and detect vulnerabilities, HP uses Security by Design (products are hardened and network ports are only allowed as necessary) and Privacy by Design (access is only allowed via least privileged and need-to-know methodologies and data is encrypted in transport and at rest as needed) principles. When anomalies are identified, they are promptly investigated to determine if a security or privacy incident has occurred. In the event that an incident is identified that affects the delivery of the Services or the confidentiality, integrity, or availability of end customer data, the Customer will be notified in a timely fashion. Privacy information is available at <https://www.hp.com/us-en/privacy/privacy-central.html>. Self-service information may exist on the HP Support Portal at [Poly Support | HP® Support](#).

Service eligibility

HP requires:

1. The majority of HP Poly voice and video products are eligible for this service level. There is no minimum quantity of products required to purchase this offer.
2. The Poly Lens tenant must be activated and all of the Customer's devices must be registered in Poly Lens. Poly Clariti Manager will be used for RealPresence Group Series.
3. Immersive Telepresence (ITP) and Infrastructure products require quoting under the standard offers or custom quote. Products that are end-of-life/end-of-service cannot be covered under this agreement.

Service limitations and dependencies

1. For all HP products including HP Poly products, compatibility with native applications and meeting services like Teams, Google Meet or Zoom is limited by the application or software providers' terms and certification policies.
2. To check your device model certification status, consult the application provider. Available information links at the time of publication included.
 - [Microsoft](#)
 - [Zoom](#)
 - [Google](#)
3. Customs and logistics delays may affect the actual delivery time of replacement parts to the Customer facility. The next business day delivery is only applicable in countries where an HP entity is the Importer of record.
4. Poly Lens³ features may not be available for all HP Poly products, and select premium features are not available at no charge in Poly Lens³.
5. On-site support is subject to Customer location and HP Poly product type. Contact your HP representative for On-site Support availability.

Terms and conditions

See complete HP [terms and conditions](#).

All capitalised terms used and not otherwise defined herein, excluding proper nouns and other grammatically required capitalisation, shall have the meaning set forth in the Glossary located at: https://support.hp.com/us-en/document/ish_9813257-9809439-16.

HP Support Services for Communication & Collaboration Devices provide access to Poly Lens, including HP Poly Lens Pro for Rooms enabled with HP Premium for Communication and Collaboration Devices and other service support offers, to help ensure proactive and predictive maintenance.

HP recommends the use of Poly Lens to proactively monitor connection status and device health. Poly Lens information can be found at: <https://www.hp.com/us-en/poly/software-and-services/software/poly-lens.html>.

Legal disclaimers

1. 24/7 English language support is available in all countries where Communication & Collaboration Services are sold. Customers can contact Poly to receive 24/7 English language support for the Customer's supported solution. Customers are required to provide their serial number <https://support.hp.com/us-en/contact/poly-serial-number> or product information <https://support.hp.com/us-en/contact/poly-product-info>. Contact options will vary depending on their region.
2. HP provides advance replacement for any failed hardware component under most maintenance service programmes. If HP's technical support representative determines that a replacement part is required to resolve a reported or diagnosed problem, the replacement part will be shipped by Poly (Monday to Friday) for advance replacement using an expedited carrier service. Poly will use its best effort to process replacement part orders on the same day in order to meet local carrier pick-up schedules. The deadline for same-day processing is generally 15:00 local time to Poly's regional parts depot.
3. Poly Lens is a cloud-based device management solution that provide actionable insights and analytics around unified communications endpoints such as Poly voice, video and headset devices and can be sold as a standalone service. Internet access is required. Additional Poly Lens information can be found at <https://www.hp.com/us-en/poly/software-and-services/software/poly-lens.html>.
4. ECPS improves response times in Poly-enabled ecosystem cloud solutions by acting as a primary point of contact to the Customer. If Poly determines that the problem is caused by or related to the Cloud Partner environment, at the Customer's request, Poly will attempt to open an incident request with the Cloud Partner, document findings and provide the Cloud Partner's incident tracking number to the Customer. Poly will be responsible for working directly with the Cloud Partner on resolution or future status updates to the Customer. If not possible to open an incident request, Poly will provide the Customer with findings and refer the Customer to the Cloud Partner for resolution. The Customer must maintain its current service or subscriber agreement with Cloud Partners, operate and maintain applicable software as specified by the Cloud Partner and, if requested, give Poly signed written approval to act on their behalf regarding ECPS services.
5. Service levels and response times for HP Services may vary depending on your geographic location. Service starts on the date of hardware purchase. Restrictions and limitations apply.
6. Requires Poly infrastructure or Lens activation.

HP Services are governed by the applicable HP terms and conditions of service provided or indicated to the Customer at the time of purchase. The Customer may have additional statutory rights according to applicable local laws, and such rights are not in any way affected by the HP terms and conditions of service or the HP Limited Warranty provided with an HP product.
