

Because one size doesn't fit all

Contour Mouse is an ergonomically designed mouse, available in six different sizes that support you comfortably, regardless of whether you are right or left handed. Contour Mouse allows your hand and arm to relax, while retaining precise control.

Perfect balance of ergonomics and productivity

- Pronounced arch promotes proper alignment of hand and wrist
- Elongated buttons for optimal button click
- Thumb rest for increased support
- "True" three-button design - good for design applications

How it all began

Contour Mouse, Contour Mouse, once known as the Perfit Mouse, went through over 120 different models before we found the perfect balance for your hand. The design has been helping to stop and prevent repetitive strain injuries such as Carpal Tunnel Syndrome and Tendonitis since its launch in 1995.

High precision:
1200 dpi
Plug-and-Play

17° neutral tilt for optimal comfort and control

Available for both right- and left-handed users

Top: Open hand relaxed posture
Bottom: Precision mode

Button functions

Contour Mouse has five buttons, including a proper, full-size third (middle click) button. The three buttons on top are elongated so that your fingers can rest and click without having to flex.

Find your size

Your hand should be able to rest upon the Contour Mouse and support your full palm from underneath. To find your perfect size, you should measure the length from the tip of the middle finger to the first crease of the wrist.

XL
21 cm or above

L
19 - 21 cm

M
17 - 19 cm

S
Under 17 cm
