USB-C to HDMI Multiport Adapter with 140W PD Charging, 4K 60Hz, USB 10Gbps Hub, Type-C Mini Dock for MacBook / Dell / Thinkpad / HP

Product ID: 164B-USBC-MULTIPORT

Turn one USB-C port into a complete mobile workstation with 4K video, 140W power delivery, and high-speed USB connectivity in a single compact adapter.

Drive a 4K 60Hz HDMI display while adding USB-C and USB-A data ports through one adapter. Replace multiple dongles in shared desks, hoteling stations, travel kits, and field deployments. Fewer accessories reduce setup time and cable clutter.

Deliver up to 140W USB-C Power Delivery passthrough to support high-powered and AI-focused laptops under load. A dedicated USB-A 2.0 port connects essential peripherals without consuming critical host ports.

Add a 10Gbps USB-A port with BC 1.2 for fast data transfers and optimized device charging, plus a 10Gbps USB-C port for modern peripherals and storage. Deploy instantly with driverless plug-and-play installation. The compact design fits easily into laptop bags, simplifying rollouts for hybrid teams and remote users.

Special Notes / Requirements

	System and Cable Requirements	A host device with an available USB-C port (to ensure full adapter functionality, the host device's USB-C port must support USB Power Delivery and DP alt mode).

		Optional: USB-C power adapter (for example, your laptop's USB-C based power adapter).
Note		Not all USB-C ports support the full functionality of the USB Type-C standard. Ensure that your host USB-C port supports USB Power Delivery and DP alt mode.
		If the USB-C Host does not support USB Power Delivery, the PD Power Port will not supply power to the USB-C Host.
		A 4K-capable display is required to achieve UHD resolution (4K is also known as 4K x 2K).
		Your laptop might have specific charging requirements. For example, if your laptop requires exactly 60W of power and an adapter consumes some of the 60W, your laptop might not recognize that it is getting enough power. For more information about Power Delivery, refer to the manufacturer of your hardware.
		USB 3.2 Gen 2 (10Gbps) is also known as USB 3.1 Gen 2 (10Gbps)
