

# Statement of Volatility-Dell Pro P 27 Monitor

## P2726H

 **CAUTION:** A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

The Dell P2726H monitor contains both volatile and non-volatile (NV) components. Volatile components lose their data immediately after power is removed from the component. Non-volatile (NV) components continue to retain their data even after power is removed from the component. The following NV components are present on the P2726H system board.

**Table 1. List of Non-Volatile Components on System Board**

\*P2726Ht

\*\*P2726Hf

Description	Reference Designator	Volatility Description	User Accessible for external data	Remedial Action (Action necessary to prevent loss of data)
*Serial Flash ROM GD25Q16ESIGR	U302	Non-volatile Flash memory, 16M bit. To store scaler firmware.	No	Part placed on main interface board which is hardware/software write protected.
*Serial Flash ROM GD25Q16ESIGR	U1909	Non-volatile Flash memory, 16M bit. To store intel HUB IC firmware.	No	Part placed on main interface board which is hardware/software write protected.
*EEPROM GT24C16H-2GLI-TR	U303	Non-volatile memory, 16K bit. To store scaler data.	No	Part placed on main interface board which is hardware/software write protected.
**System Flash ROM	U402	Non-volatile memory, 16 Kbit. For storage system setting.	No	Part placed on main interface board which is hardware/software write protected.
**System Flash ROM	U403	Non-volatile memory, 16 Mbit. For storage system firmware.	No	Part placed on main interface board which is hardware/software write protected.
**HUB Flash ROM	U21	Non-volatile memory, 16 Mbit. For storage HUB firmware.	No	Part placed on main interface board which is hardware/software write protected.

 **CAUTION:** All other components on the system board erase data if power is removed from the system.
