

Statement of Volatility – Dell Pro P 24 16:10 Monitor

P2426

 **CAUTION:** A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

The P2426 Monitor contains both volatile and non-volatile components. Volatile components erase their data immediately after power is removed from the component. Non-volatile components continue to retain their data even after power is removed from the component. The following non-volatile components are present on the P2426 Monitor system board.

Table 1. List of Non-Volatile Components on System Board

Description	Reference Designator	Volatility Description	User Accessible for external data	Remedial Action (Action necessary to prevent loss of data)
System EEPROM	U13	Non-Volatile memory, 16 Kbit For Storage of system setting (OSD)	No	Part placed on main interface board which is hardware/software write protected.
System Flash	U16	Non-Volatile memory, 16 Mbit For Storage of system firmware	No	Part placed on main interface board which is hardware/software write protected.
USB HUB Flash	U52	Non-Volatile memory, 16 Mbit For Storage of USB HUB firmware	No	Part placed on main interface board which is hardware/software write protected.

 **CAUTION:** All other components on the system board lose data if power is removed from the system.
