

ThinkEdge SE10

This next-level AI-edge platform is a powerful addition to an organization's IoT ecosystem and can modernize its surveillance system. Packed with Intel Atom X Series processor, up to 64GB DDR4 memory and up to 2 TB SSD storage, it's designed to empower enterprises and transform your normal IP camera into a computer-vision (CV)-enabled surveillance system. There are plenty of ports and wireless connectivity options to connect everything from sensors, IoT endpoints, and legacy devices to cloud-based servers.

Empowering the modern workforce with a streamlined desktop experience

Lenovo's range of globally certified ThinkEdge® PCs gives modern businesses greater power in a smaller footprint, so reliable processing power can be discreetly tucked away at the edge of the business, ready for action.

Lenovo ThinkShield security solutions including a discrete TPM 2.0 chip for data encryption provide comprehensive end-to-end security, whether protecting against any potential data breach attempts or ensuring the security of the device itself.

Connectivity options include Wi-Fi, Bluetooth, 4G LTE or WWAN for transporting IoT data to the business cloud without any hassle.

With an ultra-small form factor, the SE10 packs more computing power into a smaller footprint. Easy to mount, it can be tucked behind a monitor, placed under the desk, or mounted on the wall—wherever you like it.
