

# WAC-2014 Gigabit Wireless LAN Controller, 1 × 2.5GbE WAN Port, Up to 416 APs and 416 Clients

## Product Images

---

## Short Description

---

- Centralized management of up to 416 APs and 416 Clients.
- Captive Portal (Web Authentication) for secure user access, supporting both user-initiated and automatic redirection login.
- Client isolation allows strict control of access to wireless devices on the network.
- Flexible 2.5G WAN with multi-WAN load balancing, failover, and smart traffic routing.
- Enables Auto-Roaming for wireless networks.

## Description

---

The WAC-2014 is a high-performance wireless LAN controller designed to simplify and optimize the management of enterprise and large-scale wireless networks. With support

for centralized control of up to 416 access points and 416 clients, it enables efficient deployment, monitoring, and maintenance across distributed environments.

Equipped with a 2.5 Gigabit Ethernet WAN port, the controller ensures high-bandwidth connectivity while supporting advanced multi-WAN capabilities, including load balancing, failover, and intelligent traffic routing. This provides enhanced network resilience and optimized performance for mission-critical applications.

The WAC-2014 integrates essential enterprise-grade features such as captive portal authentication for secure user access, client isolation for improved network security, and seamless auto-roaming to deliver a consistent and uninterrupted wireless experience.

Ideal for offices, campuses, hospitality, and retail environments, the WAC-2014 offers a scalable, secure, and easy-to-manage solution for modern wireless network infrastructures.

## Additional Information

---

Color.	Black
Model Number.	WAC-2014
Power supply included.	No
