- **Use:** Splice box / fiber enclosure front panel.
- **Color:** Grey (RAL 7035).

Description

The equip® 337101 is a 24-port 1U fiber optic front panel for flexible, high-density connectivity in fiber enclosures and patch panels. It supports LC-Duplex / SC-Simplex coupler configurations for single-mode and multimode applications.

The modular design drops into existing fiber enclosures or splice boxes, and clearly labeled ports keep cabling organized for faster installation, troubleshooting, and maintenance in data centers, telecom rooms, and enterprise networks.

Built from sturdy steel and finished in grey (RAL 7035) for a clean, durable rack appearance.
