Clone any way you want

Cloning your storage shouldn't lock you into one direction. Spade Clone 3882 gives you full freedom by supporting both SSD/HDD to M.2 NVMe and M.2 NVMe to SSD/HDD workflows. Whether you're upgrading to faster NVMe storage or backing up to a large 3.5" HDD, it handles the transition smoothly. It supports common NVMe sizes from 2230 to 2280, so your existing drives fit without hassle. For people who work across different drive types, this flexibility makes upgrades, backups, and migrations far easier.

PC-free cloning made simple

Offline cloning gives you the freedom to duplicate your drive without turning on a computer at all. Just insert your SOURCE and TARGET drives, press the clone button, and let Spade Clone 3882 handle the rest. It's a clean, direct way to transfer data when setting up a new system, refreshing an old drive, or preparing backups. No software, no setup, just straightforward cloning whenever you need it.

Installation without tools

Getting started with Spade Clone 3882 takes almost no effort at all. Its toolless design lets you swap drives fast, making upgrades or quick data tasks feel effortless. Just open, insert, and go. No screwdriver, no small parts to keep track of. It's a straightforward setup that keeps your workflow moving without slowing you down.
