Dimensions

- Product dimensions (WxDxH): 120 x 47 x 76 mm
- Packaging dimensions (WxDxH): 130 x 59 x 84 mm
- Product weight: 0.26 kg
- Weight incl. Packaging: 0.32 kg

Highlights

Kinetic power generation

Harness your own power with the device's innovative, kinetically driven power source - an environmentally friendly alternative to battery-powered devices. Providing power for radio, flashlight or to charge up a phone or other device is an easy-to-use way to keep charged up.

Integrated flashlight

Don't be kept in the dark. With its built-in flashlight, the device keeps things going long after the sun has set. This device takes the risk out of poorly-lit nighttime activities and can be just the thing in the event of power outages. Kinetic power generation keeps things automatically charged and eliminates worries about batteries going flat.

Built in siren

Keeping safe often means being locatable. The device's built-in siren attracts attention, meaning that help is never far away. Kinetically powered to prevent unexpected battery problems, the siren is an addition designed to give you peace of mind and make your safety a top priority.

Built-in micro USB cable

It's difficult to unplug entirely - and now you don't have to. Finding a charger for a mobile phone or other device in the outdoors can be a hassle, which is why the device has a handy micro-USB built in, meaning you'll always have enough power for music and movies, or just for your peace of mind. It's also great to act as a backup in the case of power outages. Take advantage of the device's kinetically-charged power source to keep powered up and connected.
