

PHILIPS

Wired wall switch module (1-pack)

Hue

Keeps Hue lights reachable

Makes existing switches smart

Control lights, rooms and zones

No battery required

8721103140494

Easy smart lighting

The wired module keeps your Philips Hue lights powered and controllable – even when someone turns off the wall switch. Powered by your home's wiring – no need to replace batteries. Install it behind your wall switch, or in the ceiling above your light fixture, where a neutral wire is available. Once installed, you can use your existing switch to control lights in rooms and zones, or cycle through your favourite pre-set scenes with a simple flip. Requires a Hue Bridge, which uses a reliable Zigbee connection for local control, so your lights can respond even if Wi-Fi is down.
