KEY FEATURES

Instant screen control

With a dedicated button built into the dock, you can quickly pause your screen with a single press. It's a simple way to protect your privacy when someone walks by or when you step away from your desk. No need to dig through settings or menus. One touch is all it takes to hide your display and reduce distractions. Small feature, big difference.

Compact hub for everyday essentials

Spade Dock 4081 gives you all the ports you actually need in one small device. It's perfect for connecting a screen, a few accessories, and charging your notebook at the same time. This makes it ideal for travel, hot desks, or minimalist setups. You carry less gear and still stay fully connected. Sometimes less is indeed more.

One cable, less mess

Life is difficult enough. But handling your setup does not have to: keep your setup clean by handling data, display, and power through a single connection. You plug in once and your entire workspace is ready to go. No more messing around with multiple cables just to get started. This makes switching between home, office, and travel setups much easier.

PACKING CONTENT

- ▶ 1x Spade Dock 4081
