

Philips
docking speaker

- with 30-pin connector
- for iPod/iPhone
- 8 W

AD333/05

Enjoy music from your iPod/iPhone

Built-in with Bass Reflex speakers, this Philips docking station delivers rich, deep bass and powerful sound. Its smart dock lets you charge your iPod/iPhone without the need to remove its protective casing.

Benefits

Crystal clear sound

- Bass Reflex Speaker System delivers a powerful, deeper bass
- Shielding technology to block mobile phone interference
- 8 W RMS total output power

Enjoy your favourite music

- MP3 Link for portable music playback

- Play and charge your iPod/iPhone simultaneously

Advanced versatility

- Dock any iPod/iPhone, even in its case
- Compact design for any space, any lifestyle

Features

Bass Reflex Speaker System

Bass Reflex Speaker System delivers a deep bass experience from a compact loudspeaker box system. It differs from a conventional loudspeaker box

system in the addition of a bass pipe that is acoustically aligned to the woofer to optimise the low frequency roll-off of the system. The result is deeper controlled bass and lower distortion. The system works by causing the air mass in the bass pipe to vibrate like a conventional woofer. Combined with the response of the woofer, the system extends the overall low frequency sounds to create a completely new dimension of deep bass.

PHILIPS

MP3 Link

The MP3 link connectivity allows direct playback of MP3 content from portable media players. Besides the benefit of enjoying your favourite music in the superior sound quality delivered by the audio system, the MP3 link is also extremely convenient as all you have to do is to plug your portable MP3 player into the audio system.

Dock iPod/iPhone in its case

Smartly designed spring-loaded docking port effortlessly accommodates any iPod or iPhone, without special adapters. What's more, it works even when most protective cases are on – just dock your iPod or iPhone as it is. Now you can truly have fuss-free enjoyment of your music.
