- DBB to preserve low tones for deep bass at any volume level
- Shielding technology to block mobile phone interference
- 10 W RMS total output power

Elegant and compact

- 360-degree design for gorgeous look from any angle
- Compact design for any space, any lifestyle

Advanced versatility

- PC synchronisation with your iPod/iPhone
- Dock any iPod/iPhone, even in its case
- Free DockStudio app for Internet radio and other cool features
- AUX-in for easy connection to almost any electronic device
- Battery or AC power option for music enjoyment anywhere

PHILIPS

Features

Dynamic Bass Boost (DBB)

Dynamic Bass Boost maximises your music enjoyment by emphasising the bass content of the music throughout the range of volume settings - from low to high - at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.

PC synchronisation

Dock it, play it, sync it and charge it! Dig in to your favourite music on your iPod or iPhone while it charges and synchronises with your PC via USB — and enjoy superb sound quality together with thoroughly unbeatable convenience. Let the great tunes go on and on — without ever running out of power.

Dock iPod/iPhone in its case

Smartly designed spring-loaded docking port effortlessly accommodates any iPod or iPhone, without special adapters. What's more, it works even when most protective cases are on — just dock your iPod or iPhone as it is. Now you can truly have fuss-free enjoyment of your music.

DockStudio app on App Store

The free app adds an array of exclusive cool features to your docking speaker. You can check the weather, tell the time and even use your favourite images as wallpaper. DockStudio also lets you listen to thousands of Internet radio stations worldwide. More updates on skin styles and new functions on the way.
