- Dynamic room-filling sound

Versatility

- Bluetooth streaming
- Swipe sensor to skip songs

- Built-in mic for speakerphone
- Voice prompt for feedback

Portability

- Built-in lithium battery
- Play anytime, anywhere

PHILIPS

Features

Powered by 4 neodymium drivers

Bluetooth portable speakers

Bluetooth is a short range wireless communication technology that is both robust and energy-efficient. The technology allows easy wireless connection to other Bluetooth devices, so you can play your favourite music from any smartphones, tablets or even laptops including iPod or iPhone on Bluetooth-enabled speaker easily.

Motion sensor

SHOQBOX is equipped with a motion sensor. Simply swipe over the sensor from left to right or right to left, to skip to the next or last track. Put your hand over the sensor for a second to pause the music. Do it again to put it back on. Easy gesture control allows you to control your music the simplest way.

Built-in mic

With its built-in microphone, it also works as a speaker phone. When a call comes in, the music is put on pause and you can talk via the speaker. Call for a business meeting. Or call your friend from a party. Either way, it works great.

Specifications

Please note that this is a pre-sales leaflet. The contents of this leaflet reflect the best of our knowledge per date and country mentioned above. The contents of this leaflet are subject to change without notice. Philips does not accept any liability as to the contents of this leaflet.
