1U 4 Bay Server i7-12700, 16GB, 1TB NVMe, 2x 2.5GbE, IPMI, 1x 500W, Windows 11 Pro

1U Rack Server with Hot-Swap Storage — Intel Core i7-12700

A full-featured 1U rack server built for deployments where storage capacity and serviceability matter as much as processing power. Four front-accessible 3.5" hot-swap bays let drives be replaced without opening the chassis or taking the system out of the rack.

The Intel Core i7-12700 provides 12 cores and 20 threads with boost up to 4.9 GHz, paired with 16 GB DDR5 4000 MT/s memory and a 1 TB Samsung 990 Pro NVMe SSD, which keeps the operating system on its own fast drive and leaves all four bays free for data. The Supermicro X13SAZ-F embedded motherboard adds dual 2.5 Gigabit LAN with vPro, onboard TPM 2.0, and four SATA3 ports with RAID 0/1/5/10.

Full remote management is included via IPMI 2.0 with KVM over a dedicated LAN port, so the system can be power-cycled, re-imaged or accessed at BIOS level from anywhere — no site visit required.

Cooling is handled by four PWM fans with front-to-back airflow, and power comes from a 500 W 80 PLUS Platinum supply with PMBus monitoring. One full-height, full-length expansion slot is available for capture cards, additional network interfaces or a storage controller. Memory expands to 128 GB across four DIMM slots.

Delivered with Windows 11 Pro pre-installed and ready to deploy.
