Safe cooking

- Auto pressure release function for shorter wait times
- Sensible valve locks up upper lid under high pressure
- Insulation under cover prevents lid from over-heat

PHILIPS

Highlights

Auto pressure release device

Controlled by micro-chip, the pressure regulator valve is automatically turned on to release the pressure right after cooking, so there's no need to discharge the pressure manually or wait for the pressure to drop naturally as the cooker cools - you can enjoy the great food immediately!

Dual-handle lid

Innovative dual handle design, free to hang on wall.
