

In some applications, a signal booster (Model Number: B120-000-SL) should be used with this cable to ensure a signal strong enough for your display. An alternate, more cost effective solution is to use a Tripp Lite DVI over Cat5 Extender (Model Number: B140-101X) in place of a 100 ft. DVI cable and signal booster.

DVI High Definition Single Link Digital TMDS Monitor Cable (DVI-D M/M), 100 ft. (30.5 m)

MODEL NUMBER: P561-100-HD

Description

Tripp Lite's 100-ft. (30.5 m), High Definition DVI Single Link TMDS cable delivers the high performance and high bandwidth needed for today's digital video displays. 24AWG wire and gold-plated contacts ensure excellent conductivity, while double shielding (foil and braid) provides maximum EMI/RFI protection. Use in conjunction with DVI video cards that are specified as single Link. Both DVI connectors are molded, have integral strain relief for long life reliability, and ferrite collars to drain off extraneous electrical interference. In most applications, a signal booster (B120-000-SL) will need to be used with this cable to ensure a signal strong enough for your display.

Features

- 24AWG High Definition Cable
- Superior molded cables with foil/braid shielding for maximum EMI/RFI protection
- Dual Link digital signalling for transmission speeds to 9.9Gbps
- Meets DVI DDWG Standard
- PC and Mac compatible
