

Philips

Blu-ray Soundbar Home theater

- 3D Blu-ray
- Wireless subwoofer
- Built-in WiFi

HTB5151K/51

Powerful surround sound, no clutter

Obsessed with Sound

Enjoy wide surround sound without the clutter. Philips SoundBar with Virtual Surround Sound incorporates a complete home theater system, including high definition Blu-ray disc Playback in a single unit!

Benefits

Great listening experience

- Virtual Surround Sound for a realistic movie experience
- 550W RMS power delivers great sound for movies and music

Designed to enhance your cinema at home

- Wireless subwoofer for clutter free placement

Simply enjoy all your entertainment

- CinemaPerfect HD for clearer and sharper video playback
- Instant 2D to 3D conversion for a lifelike movie experience

- Internet radio to enjoy the world of online radio channels
- Turn your Smartphone into a remote for Philips AV products
- Built-in WiFi to enjoy your connected media wirelessly
- Karaoke for endless singing entertainment at home
- Connect to HDMI x 2 for great picture and sound quality
- Full HD 3D Blu-ray for a truly immersive 3D movie experience

PHILIPS

Features

Virtual Surround Sound

Philips Virtual Surround Sound produces rich and immersive surround sound from less than five-speaker system. Highly advanced spatial algorithms faithfully replicate the sonic characteristics that occur in an ideal 5.1-channel environment. Any high quality stereo source is transformed into true-to-life, multi-channel surround sound. No need to purchase extra speakers, wires or speaker stands to appreciate room-filling sound.

CinemaPerfect HD

Philips' CinemaPerfect HD engine offers a new standard in clear and sharp video playback. This intelligent engine reduces noise and sharpens images to bring you higher quality video images than previously seen. Video noise reduction and super scaling work to reduce the noise that is produced when video is compressed into MPEG format. With improved color processing, the engine produces sharp, deep images on screen.

Instant 2D to 3D conversion

Enjoy 3D movie excitement in your home using your existing 2D movie collection. Instant 3D conversion uses the latest digital technology to analyze 2D video content to distinguish between foreground and background objects. This detail generates a depth map that converts normal 2D video formats, into exciting 3D. Along with your compatible 3D TV, you are now ready to experience full HD 3D.

Internet radio

Internet radio is an audio broadcasting service that is transmitted via the Internet. Some internet stations are affiliated with a traditional (terrestrial) radio station or network while others are internet-only radio stations, which are independent and devote their broadcasts only to the World Wide Web. With Internet Radio, you can enjoy access to online radio stations from anywhere in the world and listen to a wide variety of genres, news, sports and entertainment updates, or connect to favourite or niche stations.

Philips MyRemote

The Philips MyRemote app lets you use your smartphone or tablet as a remote to control your Philips AV products that are connected to your home Wi-Fi network, and gives you instant control from anywhere in your home. It also comes with useful functions such as SimplyShare to connect and stream all entertainment wirelessly; and MySound to customize your listening preferences.

Karaoke for endless singing

HDMI x 2

Enjoy larger-than-life 3D playback and crystal-clear 5.1 or 7.1 audio by simply plugging our player's audio HDMI x 2 output to the connection in your non-3D AV receiver.
