Highlights

Smart Android display

Open up a new world of opportunities with Philips smart Android display with multi-touch 21.5" screen. Direct access to dedicated Philips App store enables you to download and install your favourite Apps. Its large screen and stereo speakers makes watching HD movies, playing games or listening to MP3 music an enjoyable experience. Thanks to its built-in VGA and HDMI connectors, it can be used as a fully functional computer monitor. With its versatile capabilities, this smart monitor can also be used in business environment like hotel lobbies, education segments and other suitable areas.

Big multi-touch screen

This Philips smart monitor has a large 21.5" display with a multi-touch capability. Its

generous, large screen frees you from squinting on a small size smart display. Thanks to its built in advanced optical technology, you can now manipulate your content with pinch, zoom, rotate, swipe or scroll. Reading ebooks or newspapers is easy on your eyes thanks to its large font and picture capabilities. Its large touch screen is just the right tool to allow young children to express their creativity with e-painting, learn their ABC's, or use interactive educational apps.

App store

Enjoy great applications from the dedicated Philips App store. A single touch on the App icon will take you to the store via Wi-Fi or Ethernet connection. Download and install Apps for entertainment, games, utilities, office, photos, video, news, social network, etc. which are available and updated from the store for free or for a small sum. The clear, easy to use interface helps you to browse intuitively which can be sorted by rating, category or popularity.

SmartSound

SmartSound allows you to select various modes like Dynamic, Standard, Soft etc thereby automatically activating pre defined

S220E1AFB/93

frequencies to enhance the sound related to the function

Built-in stereo speakers

Now you can enjoy all your multimedia and social applications with stereo sound. These built in speakers not only sound great, but also helps you to get rid of external wire clutter and save valuable desktop space.

HDMI Ready

HDMI-ready

An HDMI-ready device has all the required hardware to accept High-Definition Multimedia Interface (HDMI) input. A HDMI cable enables high-quality digital video and audio all transmitted over a single cable from a PC or any number of AV sources (including set-top boxes, DVD players, A/V receivers and video cameras).
