Highlights

Advanced filtration system

The advanced filtration system cleans air of harmful agents in four stages: In stage 1, the antibacterial pre-filter catches big particles like human hair and regular house dust. In stage 2, the activated carbon filter effectively removes odors and harmful gases. In stage 3, the HEPA filter with an antibacterial coating filters out fine dust and eliminates germs and mould. In stage 4, the humidification filter with its antibacterial coating eliminates germs and mould.

Intelligent dual sensors

Intelligent dual sensors give total feedback on indoor air quality.

Smart air and humidity control

Smart air and humidity control purifies and moistens air

Healthy air protect alert

Healthy air protect alert gives you a timely warning when to replace the filter. When the filter is not replaced in time, the appliance stops functioning to avoid running with no effect since filter is full. It is your assurance of healthy air always.

Healthy air protect lock

Healthy air protect lock function ensures you healthy air always. It shuts off the purifier when healthy air can no longer be guaranteed. When

one of the filters is almost full and has to be cleaned or replaced, the Healthy air protect alert warns you to replace or clean filter. When users do not replace concerned filter, the appliance stops operating and the appliance is locked.

Smart air quality sensor

The built-in sensor (particle) measures the air quality in the room and automatically selects the appropriate speed setting to guarantee the best possible air quality in your rooms. The multiple color indicators inform you on the actual air quality, and will be red, purple if the air quality is not yet good enough, and blue when the air is clean and healthy again.

Fully automatic operation
