Highlights

Digital Black Stretch

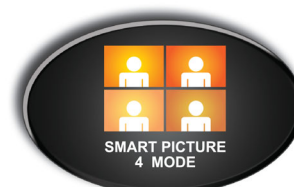

Philips Slim TV uses a slimmer CRT tube to give an overall slimmer TV that is up to 40% thinner than a traditional CRT TV while delivering the better contrast and superior picture quality with built in Digital Black Stretch circuitry

Digital Noise Reduction (DNR)

During weak signal transmission , random noise will appear on the image. When viewed, the image contains dark and white dots. Noise reduction significantly reduces the appearance of these dots , hence creating a pleasant viewing experience

Smart Picture - 4 Mode

Picture button on the remote control enables one-touch selection of various preset optimized image settings to suit different TV program that will maximise your enjoyment of movies

English OSD language

You can enjoy and relax with the simple and easy GUI

Auto Volume Leveler

The Auto Volume Leveler moderates sudden volume increases when switching broadcast channels or when commercials come on. It suppresses the volume increases in the sound modulation. The Auto Volume Leveler is great new feature!
