WHAT THIS PRODUCT DOES

Expand your home network with D-Link's 5-Port 10/100M Desktop Switch, by connecting up to five devices at speeds. With the latest power-saving technology, this switch is ideal for connecting your media player or game console to your network.

ENERGY EFFICIENT ETHERNET

This switch provides extra power savings, by supplying power to ports depending on the length of the Ethernet cables. Additionally, this switch will place ports without network traffic on stand-by mode to further reduce power consumption.
