

Cordless phone

- D150
- 1.6" display/amber backlight
- Black

D1501B/05

Keep it simple

Designed for complete simplicity, this phone gives you all the benefits of long-lasting ergonomic comfort, and great sound reproduction. A true plug-and-play device with an intuitive menu, it is simplicity itself.

Benefits

Nice and simple

- Ultimate convenience through easy setup
- Menu in multiple local languages
- Programmable hot keys for quick dial
- Textured back cover for non-slip grip
- Caller ID – so you always know who is calling*
- Up to 16 hours of talk time on a single charge
- Easy to read 1.6" (4.1 cm) display with backlight

Crystal clear sound

- Optimised antenna layout for great reception in any room
- The Parametric Equaliser delivers pure and clear sound
- Automatic Volume Control offsets unwanted volume variation
- Advanced sound testing and tuning for superb voice quality

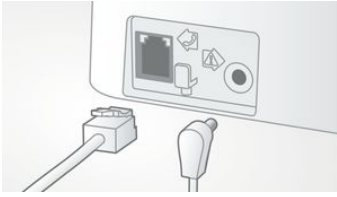

Eco-conscious product

- Low radiation and power consumption

PHILIPS

Features

Easy setup

Ultimate convenience through easy set up. Simplified installation - Plug and Play product

Optimised antenna layout

Our optimised antenna layout ensures strong and stable reception, even in areas of the house where cordless transmission is difficult. Now you can take a call wherever you are in the house, and enjoy a long, uninterrupted conversation even as you walk around.

Parametric Equaliser

Our telephones use parametric equalisation in the digital sound processing to fine tune the sound response back to the intended linear frequency response curve, delivering sound that is pure and clear, for each conversation.

Automatic Volume Control

Automatic Volume Control offsets variations in sound signal, which can be caused by distance, signal strength or the caller's phone — so what you hear always remains consistent. Reducing the audio amplification for strong signals, and increasing it for weak ones, means you can enjoy a smooth conversation without unwanted sound volume variation.

Eco-conscious product

Philips phones are energy efficient and designed to be respectful to the environment.

Menu in local languages

Enjoy easy setup, navigation and control with intuitive menu available in local languages.

Programmable hot keys

Now calling the people you care about most is easier than ever. With simple one-touch dialling, you will never have to search for their number again. You can programme up to 2 keys for instant calling.

Non-slip grip

The rear of the handset is treated with a special texture for added comfort and better grip.

Caller ID*

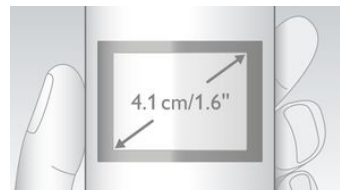

Sometimes it's good to know who's calling before you answer. And our Caller ID lets you keep track of who's on the other end of the line.

Up to 16 hours talk time

4.1 cm (1.6") display

Advanced sound testing

We test the sound quality of our DECT phones the same way as high-end headphone manufacturers do. Using an advanced ear simulator, we can accurately re-create the way people actually hear. This helps our acoustic

engineers to measure and fine-tune things like frequency response, distortion and overall hearing perception, to create perfect voice reproduction.

Specifications
