Wake up with light, feeling more refreshed

with a Wake-up Light that wakes you up naturally

Inspired by nature's sunrise, the Philips Wake-up Light uses a unique combination of light and sound to wake you in a more natural way. It helps you to feel more refreshed so that it is easier to get out of bed.

Natural light wakes you gradually

- Sunrise Simulation wakes you gradually
- Bedside light with 10 light settings
- Colour flow of sunrise: Bright Yellow

Natural sounds wake you gently

- Choice of 2 different natural wake-up sounds

Naturally designed around you

- Snooze function
- 4 display brightness levels - adjust to your preference

Naturally proven to work

- Developed by Philips, experts in light for over 100 years.
- The only Wake-up Light clinically proven to work

Highlights

2 natural sounds

At your set wake up time a natural sound will play to complete the wake up experience and ensure you are awake. The selected sound gradually increases in volume to your selected level within one and a half minutes. There are two natural bird sounds you can choose from.

Bedside Light

The sensitivity to light differs per person. In general, when using a higher light intensity a person needs less time to become fully awake. The 10 light intensities of the Wake-up light can be personalised and even set up to 200 lux.

Developed by Philips

Philips was founded over 100 years ago as a company that produced and sold light bulbs. Over 100 years Philips grew into a global company that brings innovation in lots of different areas. To this day lighting still is the soul of Philips. The Wake-up Light is proud to continue its heritage by building on years of knowledge and expertise of the world's most well-known lighting expert.

Light; Yellow (1)

The light of the sunrise simulation moves from Yellow to bright Yellow.

Proven by scientists

At this moment in time the Philips wake-up light is the only one scientifically proven to work. In order to make the Wake-up Light the best possible product it can be in genuinely waking you up naturally and energised, we have done a lot of clinical research. This research was conducted by independent science facilities to study and prove the effects of the wake-up light on the overall wake-up experience. This way we have proven, among other things, that the Philips Wake-up Light not only wakes you more naturally, but also more energised and that it improves your mood in the morning.

Snooze function

The sound stops when you tap the top of the product. After 9 minutes the sound will gently start playing again.

Sunrise Simulation

Inspired by nature's sunrise, light gradually increases within 30 minutes until your room is filled with bright yellow light. This process of changing an increasing light stimulates your body to wake up naturally. By the time light has filled the room your chosen natural sound completes the wake up experience, leaving you ready for the day ahead.

4 display brightness levels

The brightness of the display can change from high-medium-low-very low-none.
