# PHILIPS

## Dear Customer,

With the purchase of this device, you have chosen a quality PHILIPS product brand. Their device fulfils the most varied requirements for private use or in your office and business everyday.

Your device is delivered with an already inserted free ink film for a few test pages. For this film, you do not require any Plug'n'Print card (= chip card with information regarding ink film capacity).

In the telephone book of your machine, you can save entries with multiple numbers and collect multiple entries into groups. You can assign various ring tones to the entries.

You can assign the speed dial buttons to frequently dialled telephone numbers. You can load these telephone numbers quickly with the speed dial buttons.

The cordless telephone is provided with its own telephone book. With the cordless telephone you can send and read SMS messages (function is not supported in all countries and networks). You can hear messages on the answering machine of the device and record new outgoing messages.

You can individually set ringer tones and notification tones, wallpaper and menu colours of the cordless telephone. Additional functions such as alarms, timer, birthday reminder or a room monitoring function are also available to you. You can register up to five cordless telephones with your device.

The built-in answering machine stores up to 30 minutes of messages. You can record internal and external voice messages (= memos). Using remote message retrieval, you can call new messages from each telephone. With the VIP code, callers can also reach you even while the answering machine is switched on.

You can send fax messages in different resolutions to one or more recipients or a group. You can also poll faxes and prepare documents for polling.

Five fax templates, which you can use, are stored in your device. With these templates you can quickly create, for example, a short fax note or an invitation.

Select the resolution for text and photo in order to copy documents with your machine. You can also create multiple copies.

You can send SMS messages from your machine if this service is activated for your telephone line (this function is not supported in all countries and networks). Received SMS messages can be managed with the extensive functions of the SMS menu.

Activate notification by SMS to receive an SMS message, for instance on your mobile phone, when calls, fax transmissions or other messages arrive in your absence (this function is not supported in all countries and networks).

If you want, your device can print Sudoku puzzles in four different difficulty levels with solution.

We hope you enjoy your machine and its many functions!

## About this User Manual

With the installation guide on the following pages, you can start using your machine quickly and easily. Detailed descriptions can be found in the following sections of this user manual.

Read the entire user manual carefully. Follow all safety instructions in order to ensure proper operation of your machine. The manufacturer accepts no liability if these instructions are not followed.

Multiple models of this machine series are described in this user manual. Please note that some functions are only available with specific models.

### Symbols Used

Warns about dangers for people, damage to the device or other objects as well as possible loss of data. Injuries or damage can result from improper handling.

This symbol designates tips that will help you to use your machine more effectively and easily.

# 1 General Safety Information

Your device has been tested in conformity with standards EN 60950-1 and IEC 60950-1 and should only be operated with telephone systems and power equipment that meet these standards. The device was built exclusively for use in the indicated sales region.

Do not make any changes or settings that are not described in this user manual.

## Setting Up the Machine

The device should rest securely on a stable, flat surface. If the device should fall, it can be damaged or can cause injury to people, especially small children. Position all cables in such a way that no one will stumble on them, thus avoiding possible injuries to persons or damage to the device itself.

The distance between the device and other devices or objects must be at least 15 centimetres; this also applies to the use of additional cordless telephones. Do not place the device in the vicinity of radios or televisions.

Lock the cover of the device completely into place when opening the device. You could be injured if the cover falls while you are working on the device.

Protect the device against direct sunlight, heat, large temperature fluctuations and moisture. Do not place the device in the vicinity of heaters or air conditioners. Observe the information on temperature and humidity in the technical data.

The device must have sufficient ventilation and may not be covered. Do not put your device in closed cabinets or boxes. Do not place the machine on soft surfaces such as tablecloths or carpets and do not cover the ventilation slits. Otherwise, the device can overheat and catch on fire.

In the event that the device becomes too hot, or if you see smoke coming from the device, you must immediately pull the power cable out of the power socket. Have your device examined by trained professionals at a technical service location. To prevent the spread of fire, open flames should be kept away from the device.

Do not plug in the device in moist rooms. Never touch the mains cable, the mains connection or the telephone socket with wet hands.

Do not allow liquids to enter into the device. Disconnect the device from the power socket if liquids or foreign objects have entered the device and have your device examined by trained professionals at a technical service location.

Do not allow children to handle the device without supervision. The packing materials should be kept out of the hands of children.

The telephone handset of the device is magnetic. Caution, small metallic objects (paper clips) may be retained if placed near or on the telephone handset.

## Power Supply

Check whether the mains voltage of your device (indicated on the type label) matches the mains voltage available at the setup location.

Use only the power and telephones cables supplied.

Set up your device so that the power socket is easily accessible. The device does not have an on/off button. In an emergency, disconnect your device from the power supply by pulling the power plug.

Never touch the power or telephone cable if the insulation is damaged.

Disconnect your device from the power and telephone networks during an electrical storm. If this is not possible, do not use the device during an electrical storm.

Before cleaning the surface of your device, disconnect it from the power and telephone networks. Never use liquid, gaseous or easily flammable cleansers (sprays, abrasives, polishes, alcohol).

Only clean the display with a dry, soft cloth. If the display breaks, a mildly corrosive liquid may escape. Avoid all contact with your skin and eyes.

In the event of a power failure, your device will not function; saved data is retained.

## Repairs

Should disruptions occur, follow the instructions on the display and on the error report.

Do not make any repairs to the device yourself. Improper maintenance can result in injuries or damage to the device. Only have your device repaired by an authorised service centre.

Do not remove the type label from your device; this would void the warranty.

## Consumable Materials

Use only original consumable materials. These are available from a specialised retailer or through our order service (see back side of this user manual). Other consumable materials could damage the device or shorten its service life.

Dispose of old consumable materials according to the waste regulations of your country.

## Cordless Telephone

Never place the cordless telephone in the charging station without rechargeable batteries or with non-rechargeable batteries.

Do not install or use your cordless telephone in a damp environment. Never touch the cordless telephone with wet hands.

The functioning of security systems, medical equipment or sensitive devices can be disrupted by the transmission power of the cordless telephone. Observe any usage regulations (or restrictions) in the vicinity of such equipment.

The batteries used should be disposed of according to the recycling regulations of your country.

## Contained in the Packing

- 1 Device
- 2 Telephone handset
- 3 Spiral cable for telephone handset
- 4 Paper tray
- 5 Mains cable with plug (country-specific)
- 6 Telephone cable with plug (country-specific)
- 7 Charging station
- 8 Three batteries
- 9 Cordless telephone

User manual with installation guide (not depicted)

Depending upon model several cordless telephones are included.

 If one of the parts is missing or damaged, please contact your retailer or our customer service.

## Attaching the Paper Tray

Insert the paper tray into the openings behind the paper feed mechanism.

## Inserting Paper

Before you can receive documents or make copies, you must load paper into the device. Please use only appropriate paper in standard format **A4** (210 × 297 millimetre · preferably 80 g/m<sup>2</sup>). Follow the specifications in the technical data.

Separate the paper sheets by fanning them out, then align them by tapping edge of the stack lightly against a flat surface. This will prevent several sheets of paper from being drawn in all at once.

- 1 Fold open the lever on the right beside the paper feed towards front.
- 2 Insert paper in the paper feeder. You can insert **maximum 50 sheets** (A4 · 80 g/m<sup>2</sup>).
- 3 Fold open the lever on the right beside the paper feed backward in order to enclose the paper.

## Connecting the Handset

Plug one end of the spiral cable into the socket on the telephone handset. Insert the other end into the socket designated with the  symbol.

## Connecting the Telephone Cord

 Your device is an analogue fax device (Group 3). It is not an ISDN device (Group 4), and therefore it cannot be operated directly on an ISDN connection. In order to do this, you need either an analogue adapter or a connection for analogue terminals.

Connect the telephone cable to the device by inserting it in the socket designated with **LINE** (RJ-11-Connector). Insert the telephone plug into your PTT line socket.

 If you connect your device as extension to a telephone system, you must set it for working as an extension (also see Chapter "Telephone connections and additional devices, page 43).

## Connecting the Power Cord

 Check whether the mains voltage of your device (indicated on the type label) matches the mains voltage available at the setup location.

### Connecting power cord of the device

Insert the mains cable into the connection located on the rear side of the device. Connect the mains cable to the electrical socket.

### Connecting the power cord of the charging station

Connect the mains cable of the charging station to the electrical socket.

## Initial Installation

After you connect your device to the mains voltage, the initial installation commences. Press **[1]**. Your device prints a help page.

### Selecting the Language

- 1 Use **▲/▼** to select the desired display language.
- 2 Confirm with **OK**.

### Selecting the Country

 Always set the country in which you are operating the machine. Otherwise, your machine is not adapted to the telephone network. If your country is not included in the list, you must select a different setting and use the correct telephone cable for the country. Consult your retailer.

- 1 Use **▲/▼** to select the country in which you are operating the machine.
- 2 Confirm with **OK**.

After this input, the machine prints another help page and checks the telephone line.

### Entering Your Number

Your name and number are added together with date, time and page number at the top edge of each fax transmission (= header).

- 1 Enter your number. Using **[#]** or **[\*]** you can enter a plus sign.
- 2 Confirm with **OK**.

### Entering Your Name

- 1 Enter your name. You can enter characters using the numeric keys (see button labels). Enter special characters using **[0]**. Press the respective button several times until the desired character or special character appears on the display.

 You can move the cursor using **▲/▼**. Use **C** to delete individual characters.

- 2 Confirm with **OK**.

After the input, the machine prints an overview of the functions.

### Entering the Time and Date

- 1 Enter the time, e.g. **[1][4][0][0]** for 2 pm.
- 2 Enter the date (two digits each) e.g. **[0][8][0][6][0][7]** for 8 June 2007.
- 3 Confirm with **OK**.

 You can restart the initial installation process any time. Press **[1]** and **[2]**.

## Inserting batteries in cordless telephone

- 1 Insert the new batteries in the battery compartment with the positive and negative poles as shown in the picture in the battery compartment.

 **Never** use non-rechargeable batteries in the cordless telephone. Follow the specifications in the technical data.

- 2 Place the cover on the battery compartment and slide it upward until it snaps into place.
- 3 Place the cordless telephone into the charging station.

 Never place the cordless telephone into the charging station without batteries.

 Leave the cordless telephone in the charging station for at least twelve hours. The batteries will heat up slightly during charging; this is not dangerous.

## Putting cordless telephone in operation

Press the green  button for at least two seconds for switching on your cordless telephone.

Normally your cordless telephone is registered with your device in the factory. In the starting mode, press **OK**. The display shows on which base unit and with which number the cordless telephone is registered.

 If you acquired a model with several cordless telephones, only one cordless telephone is registered with your device in the factory. Insert the batteries as described above and register the cordless telephones with your device (also see Chapter "Telephone Connections and Additional Devices", page 43).

# 4 Telephone functions

For information on how to connect additional cordless telephones and another device and which functions are available to you, please refer the chapter on Telephone Connections and additional devices, Page 43.

 In the fax only reception mode (F on the display) the device rings twice. Then the fax reception switches on. You can only accept an incoming telephone call whilst it is ringing (also see chapter Setting the Fax Switch, page 38) (this function is not supported in all countries and networks).

## Making Telephone Calls on the Machine

Dial the desired telephone number. There are multiple ways to do this. Then lift up the handset.

 You can also lift up the receiver first, then dial a number. The dialling process begins immediately.

**Manual dialling:** Dial the desired telephone number with the number pad.

### Telephone book:

1 Press  **A-Z**

 You can also load telephone book entries by pressing **OK**,   and **OK**.

2 Select an entry using /. Enter the starting letters with the numeric keypad to quickly navigate through the telephone book.

 You can save an entry multiple times with the same name but in a different category. In the telephone book, the first letter of the category appears after the entry.

**Speed Dialling:** Press the desired speed dial button (1...6).

**Redial list:** Press . Use / to select an entry from the list of the dialled numbers.

 You can also load the redial list by pressing **OK**,   and **OK**.

**Caller list:** Press and hold  (at least two seconds). Use the / to select an entry from the list of callers.

 You can also load the caller list by pressing **OK**,   and **OK**.

 For this function to work, the caller line identification (CLIP) must be activated for your telephone connection (country and network dependent). The number and name will not be shown if the caller suppresses his number.

### Getting outside line

Private branch exchanges (PABX) are typical in many offices and some households. You must dial an outside line access code in order to get a connection to the public telephone network (PSTN) from a PABX.

Enter the outside line access code with which you reach the public telephone network before you enter the desired number or select a stored entry. The outside line access code is usually .

 In rare cases, the outside line access code may be a different number or a two-digit number. For older telephone systems, the outside line access code can be R (= Flash). Press **R** to enter this outside line access code. If the connection to the public telephone network is not possible, contact your telephone system supplier.

 If you operate your device permanently at an extension, store the outside line access code with the 96 function (see page 43).

### Chain Dialling

You can combine and edit manually entered digits and saved entries, before the dialling process starts. If you have saved, for example, the telephone number prefix of an inexpensive telephone service provider (call-by-call) as a telephone book entry, select this entry and manually enter the subsequent telephone number or select another saved entry.

### Insert dialling pause

It may be necessary to insert a dial pause in telephone number, for example, for a direct-inward dialling number, a sub-address or in a long distance number. Hold **R** pressed (for at least two seconds).  appears on the display. The second part of the number is dialled only after a short pause.

## Putting a call from cordless telephone

Dial the desired number. There are several ways to do this: Then press .

 You can also press  first and then dial a number. The dialling process begins immediately.

 If you receive a call on the cordless telephone and hear that it is a fax call (whistling tone or silence), you can start the fax reception on the device. Press either **START** on the device or   on the cordless telephone.

**Manual dialling:** Dial the desired number using the numeric keypad.

### Telephone Book of the Cordless Telephone:

1 Hold  pressed (for at least two seconds).

2 Select an entry using /. Enter the starting letters with the numeric keypad to quickly navigate through the telephone book.

 If you have added an additional number to an entry, this entry appears twice in the telephone book. The symbol of the category appears before the name.

### Telephone Book of the Device:

1 Press .

2 Select an entry using /. Enter the starting letters with the numeric keypad to quickly navigate through the telephone book.

**Redial list:** Press and hold **☎** (at least two seconds). Use **▲/▼** to select an entry from the list of the dialled numbers.

#### Caller List:

- 1 Press **▲/▼**, and using **▲/▼** **CALLS** select **PERSONALIS..**
- 2 Confirm with **OK**.
- 3 Using **▲/▼**, select from which list you would like to dial a number.
- 4 Confirm with **OK**.
- 5 Select the desired number using **▲/▼**.

 You can adjust the volume level of the speaker on the cordless telephone using **▲/▼** even during a call.

#### Looking up Numbers

During a call, you can look up the telephone book entries.

- 1 During a call, press **●● Menu**.
- 2 Use **▲/▼** to select **PHONEBOOK**.
- 3 Using **▲/▼**, dial the desired entry.

 Press **● Return** to return to the previous menu level.

### Calling additional telephone functions

**(Function is not supported in all countries and networks)**

You can use additional telephone functions with your device for example call on hold, three-way call or forwarding. ## 9 Fax

 Press **[1]** and **[4]** to print the instructions for sending faxes and for fax switch settings.

 Do not insert any documents into the machine that...

... are wet, have been edited with correction fluid, are soiled or have a coated surface.

... are written on with a soft pencil, with paint, chalk or charcoal.

... originate from newspapers or magazines (printing ink).

... are held together with office or notebook staples or with tape or glue.

... are pasted with note papers.

... are creased, crumpled or torn.

Use documents with sizes **A5** or **A4** with 60 to 100 g/m<sup>2</sup> weight. You can insert **up to 10 documents** at a time.

 Press **STOP** to eject the documents without sending them.

### Sending fax

- 1 Insert the documents face up into the document feeder. The top most document will be fed in first.

- 2 Set the desired resolution. You can choose between **RESOL. : STANDARD** (for documents without special features), **RESOL. : FINE** (for texts with small print or drawings) and **RESOL. : PHOTO** (for photos). Press **[F]**. The configured resolution appears on the display. Press **[F]** again to change the resolution.

 They can adjust the preset contrast (also see Chapter "Settings", page 37).

- 3 Dial the desired number. There are several ways to do this:

- 4 Press **START**.

 If the subscriber is busy, the device dials the number again after some time. Press **STOP**, in order to cancel the transmission process. After the transmission, the machine prints out a transmission report depending on the settings.

**Manual dialling:** Dial the desired telephone number with the number pad.

### Telephone book:

- 1 Press **[A-Z]**

 You can also load telephone book entries by pressing **OK**, **[1][1]** and **OK**.

- 2 Select an entry using **▲/▼**. Enter the starting letters with the numeric keypad to quickly navigate through the telephone book.

 You can save an entry multiple times with the same name but in a different category. In the telephone book, the first letter of the category appears after the entry.

**Speed Dialling:** Press the desired speed dial button (**1 ... 6**).

**Redial list:** Press **[●]**. Use **▲/▼** to select an entry from the list of the dialled numbers.

 You can also load the redial list by pressing **OK**, **[2][2]** and **OK**.

**Caller list:** Press and hold **[●]** (at least two seconds). Use the **▲/▼** to select an entry from the list of callers.

 You can also load the caller list by pressing **OK**, **[2][1]** and **OK**.

 For this function to work, the caller line identification (CLIP) must be activated for your telephone connection (country and network dependent). The number and name will not be shown if the caller suppresses his number.

### Manually Sending a Fax

- 1 Insert the document.
- 2 Enter the desired number using the numeric keypad or select a saved entry.
- 3 Press **[\*]**.
- 4 Press **START**.

### Direct inward dialling or selecting sub-address

You can send a fax to a direct-inward dialling number or a sub address or call from a direct-inward dialling number or sub address - for example to use a certain service of a fax database provider. For this purpose, attach the direct-inward dialling number or sub address with a short dialling pause to the fax number.

- 1 Enter the desired number using the numeric keypad or select a saved entry.
- 2 Hold **R** pressed (for at least two seconds).
- 3 Enter the direct-inward dialling number or sub address.
- 4 Press **START**. The direct-inward dialling number or sub address is dialled only after a short pause.

## Broadcasting

You can send one fax to multiple recipients in succession.

### Entering Recipients Individually

- 1 Insert the document.
- 2 Press **OK**, **[3][4]** and **OK**. The document is now read.
- 3 Enter the desired number using the numeric keypad or select a saved entry.
- 4 Confirm with **OK**.
- 5 Enter the next telephone numbers.
- 6 Confirm with **OK**. You can enter up to 25 recipients.
- 7 Press **START**. The device transmits the fax message successively to all recipients.

### Sending a Fax to a Group

- 1 Insert the document.
- 2 Press **OK**, **[1][3]** and **OK**.
- 3 Use **▲/▼** to select the group to which you would like to send a fax.
- 4 Confirm with **OK**.
- 5 Using **▲/▼** select **SEND FAX?**.
- 6 Confirm with **OK**.

 If your machine cannot reach a recipient, the fax message is sent to the other recipients. After the machine has called all recipients, it once again dials the numbers that previously could not be reached.

## Delayed Fax Transmission

If you would like to make use of the lower telephone tariffs or if the recipient can be reached at some specific time only, you can send the fax at a later time – within 24 hours.

- 1 Insert the document.
- 2 Press **OK**, **[3][3]** and **OK**.
- 3 Enter the time, at which the document should be transmitted, e.g. **[1][4][0][0]** for 2 pm.
- 4 Confirm with **OK**.
- 5 Enter the desired number using the numeric keypad or select a saved entry.
- 6 **Selecting a saved entry:** Confirm the selected entry using **OK**.
- 7 Press **START**. The device goes into standby mode and transmits the fax at the entered time. You can continue to make telephone calls and receive faxes.

 Press **STOP** to eject the document. This interrupts the standby mode.

## Receiving Faxes

If you have not changed the factory settings, received faxes will be printed out automatically. If no paper or no ink film is inserted, the machine saves the incoming faxes. The  - button blinks. Once paper or a new ink film is inserted, the saved faxes are printed out.

 Check whether you have inserted and clamped in the paper correctly. The lever on the right next to the paper feed mechanism must be pushed back.

If the message memory is full, no additional messages can be received. A warning appears on the display. Observe the information in the technical data.

 If there are problems with printing out saved fax messages, a service code is available (see also section Service, page 50).

## Receiving fax automatically (fax only reception mode) (Function is not supported in all countries and networks)

You should select this mode if you primarily receive faxes at your device. In the fax only reception mode (**F** on the display) the device rings twice. Then the fax reception switches on. You can only accept an incoming telephone call whilst it is ringing. You cannot switch on the answering machine in this mode (also see chapter Setting the Fax Switch, page 38).

## Receiving fax manually

Select manual reception under number of rings of the fax switch (see Chapter Setting the Fax Switch, page 38). The device will not receive faxes on its own. This setting is useful, when you want to receive faxes via a modem connected to a computer.

You can start fax reception manually, by pressing **START**.

## Polling Faxes

With the fax polling function, you can retrieve faxes that lie ready in the dialled fax machine. You can also provide documents on your machine to be polled by others.

### Polling Faxes Directly

- 1 Enter the desired number using the numeric keypad or select a saved entry.
- 2 Hold **START** pressed (for at least two seconds).

### Polling Secure Faxes

 Press **STOP** to eject the documents without copying them.

# 11 SMS

**(Function is not supported in all countries and networks)**

 Press **[1]** and **[8]** to print the instructions for SMS functions.

## SMS Requirements

Your device is preset for using the SMS (Short Messaging Service) services. Caller Line Identification (CLIP) must be activated for the SMS to work. It is possible that you will not be able to send and receive SMS messages from a private branch exchange (depending on the country and network).

 Should you face problems in sending SMS, the reason for the same could be that you are using a secret number or that the device is connected to an old ISDN System.

 Ask your telephone service provider...

- ... whether you must register for the SMS Service.
- ... to which mobile telephone service providers you can send SMS
- ... which costs are applicable.
- ... which functions are available.

# 12 Fun and Games

 Press **[i]** and **[7]** to print the instructions for the Games and Fun functions of your device.

## Sudoku

Sudoku is a Japanese number puzzle. The game has  $3 \times 3$  squares divided into  $3 \times 3$  fields. Depending on the difficulty level, lesser or more digits are already given at the beginning of the game. The aim of the game is to fill digits from 1 to 9 in the game field in such a way that each digit appears only once in a row, a column and each of the nine blocks. There is only one solution.

 The solution of the last printed game is saved. The solutions of earlier games are no longer available.

### Printing a Game

- 1 Press **OK**, **[4]****[8]** and **OK**.
- 2 Using **▲/▼** select **SUDOKU: NEW**.
- 3 Confirm with **OK**.
- 4 Using **▲/▼** select the difficulty level.
- 5 Confirm with **OK**.
- 6 Enter, how many copies of the Sudoku you would like to print (maximum 9 copies).
- 7 Confirm with **OK**.
- 8 Using **▲/▼** select if you would like to print the solution.
- 9 Confirm with **OK**.

### Printing the Last Game Again

- 1 Press **OK**, **[4]****[8]** and **OK**.
- 2 Using **▲/▼** select **SUDOKU: LAST**.
- 3 Confirm with **OK**.
- 4 Enter, how many copies of the Sudoku you would like to print (maximum 9 copies).
- 5 Confirm with **OK**.
- 6 Using **▲/▼** select if you would like to print the solution.
- 7 Confirm with **OK**.

### Printing the Solution

- 1 Press **OK**, **[4]****[8]** and **OK**.
- 2 Using **▲/▼** select **SUDOKU: SOLUTION**.
- 3 Confirm with **OK**.

### Sudoku for Every Day

You can have a new Sudoku automatically printed each day.

- 1 Press **OK**, **[4]****[8]** and **OK**.
- 2 Using **▲/▼** select **SUDOKU: AUTO**.
- 3 Confirm with **OK**.
- 4 Enter the time, e.g. **[1]****[4]** **[0]****[0]** for 2 pm.
- 5 Confirm with **OK**.
- 6 Using **▲/▼** select the difficulty level.
- 7 Confirm with **OK**.

- 8 Enter, how many copies of the Sudoku you would like to print (maximum 9 copies).
- 9 Confirm with **OK**.
- 10 Using **▲/▼** select if you would like to print the solution.
- 11 Confirm with **OK**.
- 12 Using **▲/▼** indicate whether you would like to turn printing on or off.
- 13 Confirm with **OK**.

 You can turn off the daily Sudoku print by selecting the function as described above and by switching off the automatic printing under point 12.

# 13 Settings on the device

 You can move the cursor using ▲/▼. Use **C** to delete individual characters. Press **STOP** to close the menu and return to the starting mode.

## Entering the Date and Time

- 1 Press **OK**, **[9][1]** and **OK**.
- 2 Enter the time, for example **[1][4][0][0]** for 2 o'clock p.m.
- 3 Enter the date (two digits for each field), for example **[0][8][0][6][0][7]** for June 8th, 2007.
- 4 Confirm with **OK**.

 You must check the time and date after a short power failure. Confirm with **OK**.

## Selecting the Language

- 1 Press **OK**, **[9][2]** and **OK**.
- 2 Use ▲/▼ to select the desired display language.
- 3 Confirm with **OK**.

## Selecting the Country

 Always set the country in which you are operating the machine. Otherwise, your machine is not adapted to the telephone network. If your country is not included in the list, you must select a different setting and use the correct telephone cable for the country. Consult your retailer.

 When you select a new country, all settings are reset to the factory defaults for that country. Saved data is retained. Check the number entered for the header.

- 1 Press **OK**, **[9][3]** and **OK**.
- 2 Use ▲/▼ to select the country in which you are operating the machine.
- 3 Confirm with **OK**.
- 4 Using ▲/▼ select **SURE: YES**.
- 5 Confirm with **OK**.

## Entering Your Number

Your name and number are added together with date, time and page number at the top edge of each fax transmission (= header).

- 1 Press **OK**, **[9][4]** and **OK**.
- 2 Enter your number. Using **[#]** or **[\*]** you can enter a plus sign.
- 3 Confirm with **OK**.

## Entering Your Name

- 1 Press **OK**, **[9][5]** and **OK**.
- 2 Enter your name. You can enter characters using the numeric keys (see button labels). Enter special characters using **[0]**. Press the respective key several times until the desired character or special character appears on the display.
- 3 Confirm using **OK**.

## Setting the Contrast

For copying and printing of fax messages, you can select different contrast levels.

- 1 Press **OK**, **[4][4]** and **OK**.
- 2 Using ▲/▼, select the desired contrast:  
**CONTR. : LIGHT**—For brighter copies and fax transmission  
**CONTR. : NEUTRAL**—For all types of originals (for example white text on black background or documents with coloured background)  
**CONTR. : OPTIMISED** (Factory settings)—Optimized adaptation for text and photo printing  
**CONTR. : DARK**—For darker copies and fax transmission (for example documents with faint printing)
- 3 Confirm with **OK**.

 The changed settings are stored as new default settings. If you select a special function for a one-time process, take care to restore the default settings or factory settings after that.

## Lowering the Transmission Speed

The machine adapts the transmission speed to the line quality. This may take some time, especially for overseas connections. Set a lower transmission speed if you are sending faxes into networks with poor line quality.

- 1 Press **OK**, **[3][8]** and **OK**.
- 2 Use ▲/▼ to set whether you would like to use a lower transmission speed.
- 3 Confirm with **OK**.

## Switching Page Adjustment On and Off

In order that no information is lost, received faxes are reduced in size when printed.

- 1 Press **OK**, **[3][7]** and **OK**.
- 2 Use ▲/▼ to select whether you would like to switch size reduction on or off.
- 3 Confirm with **OK**.

## Setting line interruption

**(Function is not supported in all countries and networks)**

The necessary length of the short line interruption (Hook Flash) depends on the country and telephone network. The Hook Flash period is set in the device by the factory, if you have selected the correct country, in which you operate your device. If you cannot call special functions or dial outside from an extension, you must probably change the Hook Flash time (country and network-dependent). Inquire with your telephone company or find out by trial and error with which settings these services function.

- 1 Press **OK**, **[2][4]** and **OK**.
- 2 Using the **▲/▼** key, select the length of the Hook Flash signal to the switching centre in the public switched telephone network (PSTN). Change this setting, if you cannot call additional telephone functions such as call on hold, three-way call or forwarding.
- 3 Confirm with **OK**.
- 4 Using the **▲/▼** key, select the length of the Hook Flash signal to the switching centre of a private automatic branch exchange (PABX). If the outside line access code of your telephone system is **R** (= Flash), set here-with the length of the signal for getting the outside line.

If your device is not connected to a PABX or if your PABX system uses another outside line access code (for example **[0]**), this setting has no effect.

- 5 Confirm with **OK**.

## Setting the Ring Tone

### Selecting the Ring Tone

You can select from among ten different ring tones.

- 1 Press **OK**, **[5][5]** and **OK**.
- 2 Use the number buttons **[0]** to **[9]** to select a ring tone. Using **▲/▼**, set the volume.
- 3 Confirm with **OK**.

### Setting the Volume

You can adjust the volume of the ring tone when the device is ringing or when you set the ring tone. You can save different volumes for the **\*** (day) and **☾** (night) modes, (also see Chapter Fax Switch).

Using **▲/▼** you can set adjust the volume when the device is ringing.

## Setting the Fax Switch

The built-in fax switch of your device distinguishes between fax messages and telephone calls. Faxes are automatically received, telephone calls can be received—even on additionally connected devices. While the device is checking the call, it continues to ring.

You can set how often the device should ring before picking up separately for the modes **\*** (day) and **☾** (night). This makes it possible for you to receive faxes silently at night without getting disturbed.

Press **☺/☼/☾** to switch between day and night mode. With the activated timer **☺**, the device switches between the modes **\*** (day) and **☾** (night) at the configured times.

In the fax only reception mode (**F** on the display) the device rings twice. Then the fax reception switches on (this function is not supported in all countries and networks).

### Configuring Day Mode

- 1 Press **OK**, **[5][1]** and **OK**.
- 2 Using **▲/▼** select the number of rings for the answering machine. The answering machine responds after these many number of rings.

If you select the **5/2** option for the number of rings of the answering machine, the answering machine switches on after two rings, when you have received new messages. If there are no new messages, the device rings five times. If the device does not pick up after two rings, you have no new messages. You can terminate the remote access without incurring any telephone costs.

- 3 Confirm with **OK**.
- 4 Use **▲/▼** to select the number of rings for the fax switch. After the number of rings, the fax switch switches on and distinguishes between fax transmissions and telephone calls. While the device is checking the call, it continues to ring.
- 5 Confirm with **OK**.
- 6 Using **▲/▼**, set the volume.
- 7 Confirm with **OK**.

Older devices do not transmit any fax-tone (= CNG tone) as an announcement for fax transmission (= silent fax transmission). If the total number of rings has been set to a value using **7**, silent fax transmissions cannot be received automatically.

### Configuring Night Mode

- 1 Press **OK**, **[5][2]** and **OK**.
- 2 Configure the same settings as for the day mode (see steps **2** to **7**).

## Setting the Fax Only Reception Mode (Function is not supported in all countries and networks)

You should select this mode if you primarily receive faxes at your device. In the fax only reception mode the device rings twice. Then the fax reception switches on. You can only accept an incoming telephone call whilst it is ringing. The answering machine of the device is switched off. You cannot switch on the answering machine in this mode.

Press several times until **F** appears on the display.

### Setting the Timer

The timer switches between the modes **\*** (day) and **☾** (night) at the configured times.

- 1 Press **OK**, and **OK**.
- 2 Enter the time at which the machine should switch to **\*** (day) mode, for example for 6 o'clock a.m.
- 3 Confirm with **OK**.
- 4 Enter the time at which the machine should switch to **☾** (day) mode, for example for 2 o'clock a.m.
- 5 Confirm with **OK**.

### Special Settings

#### Silent Fax Reception

If you would like to accept a fax without preceding rings, set the number of rings of the fax switch to **0**.

#### Switching Off All Rings

If you don't want to be disturbed, e.g. in the night, by any incoming calls, you can set the number of rings to **0**. The device switches immediately to silent fax reception.

You can set, whether you would like to be informed about new events (SMSs, missed calls) with a message on the display.

- 1 Press ▲/▼, and using ▲/▼ CALLS select PERSONALIS..
- 2 Confirm with **OK**.
- 3 Dial using ▲/▼ EVENTS.
- 4 Confirm using **OK**.
- 5 Use ▲/▼ to select whether you would like to turn the function on or off.
- 6 Confirm with **OK**.

# 15 Telephone Lines and Additional Devices

## Configuring Telephone Lines and Services

### PABX Systems

Private branch exchanges (PABX) are typical in many of-fices and some households. You must dial an outside line access code in order to get a connection to the public telephone network (PSTN) from a PABX.

 An additional telephone connected to the machine on a telephone socket is not considered an extension.

- 1 Press **OK**, **[9][6]** and **OK**.
- 2 In some countries you can set the dialling process to pulse dialling or tone dialling (DTMF tones). Use **▲/▼** to select the desired dialling process.  
 Only use pulse dialling if tone dialling is not yet activated for your telephone line.
- 3 Confirm with **OK**.
- 4 Use **▲/▼** to set whether you operate your device on an extension.
- 5 Confirm with **OK**.
- 6 **Configuring an extension:** Enter the outside line access code with which you reach the public telephone network. This is usually **[0]**.

 In rare cases, the outside line access code may be a different number or a two-digit number. For older telephone systems, the outside line access code can be R (= Flash). Press **R** to enter this outside line access code. If the connection to the public telephone network is not possible, contact your telephone system supplier.

- 7 Confirm with **OK**.
- 8 When finished, the device tests the telephone line. Confirm with **OK**.
- 9 Your device checks whether it can establish a connection with the public telephone network. If it cannot establish the connection, you are once again asked for input.

### DSL Connection

In the event that you use a DSL modem: Connect the machine after the modem. For additional information, please consult the operating manual of your DSL system.

### ISDN Connection

Your device is an analogue fax device (Group 3). It is not an ISDN device (Group 4), and therefore it cannot be operated directly on an ISDN connection. In order to do this, you need either an analogue adapter or a connection for analogue terminals. Details for ISDN connections can be found in the instructions provided with the terminal adapter or the dial-up router.

### Voice-Mailbox

You cannot simultaneously use the answering machine facility of your telephone service provider (= voice-mail box) and receive faxes on your devices. Get the mail-box func-

tion for your telephone connection deactivated or set the number of rings for the fax switch to lower than **5** on your device (also see Chapter Setting the Fax Switch, Page 38). When the fax switch accepts the call, the mail-box of the service provider does not step in. Enquire with your telephone company.

## Registering and de-registering additional cordless telephones

Normally your cordless telephone is registered with your device in the factory. In the starting mode, press **OK**. The display shows on which base unit and with which number the cordless telephone is registered.

 If you acquired a model with several cordless telephones, only one cordless telephone is registered with your device in the factory. Insert the batteries as described above and register the cordless telephones with your device (also see Chapter "Telephone Connections and Additional Devices", page 43).

You can register in all up to five cordless telephones with your device. Using only original cordless phones as additional cordless phones ensures optimum use of all functions. You can get original cordless telephones through our order service or at specialist shops.

 Additional cordless telephone must be GAP-compatible.

### Registering cordless telephone

You must first bring the cordless telephone and then your device (= base station) in the registration mode to register a cordless telephone.

- 1 On the cordless telephone, press **▲/▼**, and using **▲/▼** select **SETTINGS**.
- 2 Confirm with **OK**.
- 3 Select with **▲/▼** **ADVANCED SET.**
- 4 Confirm with **OK**.
- 5 Dial using **▲/▼** **SET HANDSET**.
- 6 Confirm using **OK**.
- 7 Dial using **▲/▼** **REGISTRATION**.
- 8 Confirm using **OK**.
- 9 Confirm using **●●** **YES**. The cordless telephone goes into registration mode.
- 10 Press **OK**, **[8][2]** and **OK** on the device
- 11 Confirm the preset PIN code (**0000**) using **OK**.

The cordless telephone is automatically registered. This process can take a few minutes. Then the number with which it is registered with the device appears on the display of the cordless telephone.

 You can register other cordless telephones with your device in the same manner. If you face any difficulties in registering, de-register all cordless telephones, and re-register them individually.

## De-registering Cordless Telephone

### On the Device

- 1 Press **OK**, **[8]****[3]** and **OK**.
- 2 Using **▲/▼** to select which cordless telephone you are would like to de-register.
- 3 Confirm with **OK**. The device disconnects from the cordless telephone.

### On the Cordless Telephone

- 1 On the cordless telephone, press **▲/▼**, and using **▲/▼** select **SETTINGS**.
- 2 Confirm with **OK**.
- 3 Select with **▲/▼** **ADVANCED SET..**
- 4 Confirm with **OK**.
- 5 Using **▲/▼** select **SET BASE**.
- 6 Confirm with **OK**.
- 7 Using **▲/▼** select **DELETE HANDSET**.
- 8 Confirm with **OK**.
- 9 Using **▲/▼** to select which cordless telephone you are would like to de-register.
- 10 Confirm with **OK**.
- 11 Confirm the de-registration with **●● Yes**. The connection with the device is disconnected.

## Registering the cordless telephone with other devices

You can register a cordless telephone on four different devices (= base units).

### On the device

- 1 Register the cordless telephone with the first device as described above.
- 2 Press **OK**, **[8]****[2]** and **OK** on the next device.
- 3 Confirm the preset PIN code (**0000**) or enter a new PIN code.

 The pin code can be identical with the pin code on the first device.

- 4 Confirm using **OK**.

### On the cordless telephone

- 5 On the cordless telephone, press **▲/▼**, and using **▲/▼** select **SETTINGS**.
- 6 Confirm with **OK**.
- 7 Select with **▲/▼** **ADVANCED SET..**
- 8 Confirm with **OK**.
- 9 Dial using **▲/▼** **SET HANDSET**.
- 10 Confirm using **OK**.
- 11 Dial using **▲/▼** **PERSON. REGISTR.**
- 12 Confirm using **OK**.
- 13 Select the next device (= base station) using **▲/▼**.
- 14 Confirm using **OK**.

- 15 Confirm the name of the base unit, or enter a new name.

- 16 Confirm using **OK**.

- 17 Enter the same pin code which you entered on the other device.

- 18 Confirm using **OK**.

- 19 Using **▲/▼** select the number with which you would like to register the cordless telephone on the device.

- 20 Confirm using **OK**.

## Setting the preferred base unit

With this function you can specify which device (= base station) should be used for placing telephone calls if you have registered your cordless telephone with multiple devices. When you select **AUTO**, the cordless telephone automatically connects to the device that is within the range.

- 1 On the cordless telephone, press **▲/▼**, and using **▲/▼** select **SETTINGS**.

- 2 Confirm with **OK**.

- 3 Select with **▲/▼** **ADVANCED SET..**

- 4 Confirm with **OK**.

- 5 Dial using **▲/▼** **SET HANDSET**.

- 6 Confirm using **OK**.

- 7 Dial using **▲/▼** **BASE PRIORITY**.

- 8 Confirm using **OK**.

- 9 Press **●** **EDIT ENTRY**.

- 10 Using **▲/▼** select the device to which you would like to assign the priority, or select auto setting.

- 11 Confirm using **OK**.

## Connecting Additional Devices

You can operate other devices on a telephone line, for instance answering machines, modems or charge counters

### Connection to the device

You can connect additional devices directly to your device. Insert the telephone cable of the additional device into the **EXT-** socket (RJ-11-connection) on the device.

 We recommend direct connection to the device because this allows the fax switch to function optimally and to control the additional devices.

### Connection to the Telephone Line

In order for the fax switch to function, the machine must be first in the series if multiple devices are connected to the same telephone socket. Follow the correct order.

## Using Additional Telephones (Easylink)

With the Easylink function you can control your device with additional telephones. To use this function, additional telephones must be set to the tone dialling mode (DT-MF/MFV tones) (for this purpose see the operating manual of your additional telephone).

### Starting Fax Reception

If you pick up at an additional device and hear that you are receiving a fax (whistling tone or silence), you can start the fax reception by pressing **[\*][5]** on the additional telephone or pressing **START** on the device.

### Taking Over the Line

If you pick up on an additional telephone and the machine continues to ring or attempts to receive a fax, you can disconnect the machine from the line. Press **[\*][\*]** on the additional telephone.

### Changing Code

Only change the codes if it is absolutely necessary. The codes must begin with **[\*]** or **[#]** and must be different.

- 1 Press **OK**, **[5][4]** and **OK**.
- 2 Enter the new code for starting fax reception.
- 3 Confirm with **OK**.
- 4 Enter the new code for taking over the line on an additional device.
- 5 Confirm with **OK**.

# 16 Service

 Should disruptions occur, follow the instructions on the display and on the error report.

## Checking the Ink Film Reserve

- 1 Press **OK**, **[4]** **[6]** and **OK**.
- 2 The number of pages that can still be printed with the ink film is shown on the display.
- 3 Press **STOP** to return to the starting mode.

If the ink film used up or if there is no ink film in the machine, a message appears on the display.

## Changing the ink film

 Use only original consumable materials. These are available from a specialised retailer or through our order service (see back side of this user manual). Other consumable materials can cause damage to the device.

 Follow the instructions on the packaging of the consumable materials.

For receiving or copying documents, an ink film must be inserted in your device. Your device is delivered with an already inserted free ink film for a few test pages. For this film, you do not require any Plug'n'Print card (= chip card with information regarding ink film capacity). For every next ink film that you insert, you must load the capacity memory with the included Plug'n'Print card.

- 1 Remove the paper from the paper feeder and take the paper tray out of the device.
- 2 Open the device by lifting the panel using grip in the centre and folding it up.

 Lock the cover of the device completely into place when opening the device. You could be injured if the cover falls while you are working on the device.

- 3 Grip the rear ink film roll at both the sides and place it next to the front ink film roll.

- 4 Remove both the rolls from the device. The used ink film cannot be reused.

 The messages and copies you have printed out can be read from used ink films. Consider data protection issues when disposing of used ink films.

- 5 Pull the used Plug'n'Print card out of the plug socket on the left hand side next to the ink film tray. The Plug'n'Print card cannot be reused.

- 6 Carefully remove the rubber bands from the new ink film. Make sure that the film is not damaged!

- 7** Place the larger roll with the ink film in the rear ink film tray. The blue gear wheel must be on the right hand side.

- 8** Place the smaller roll without ink film in the front tray. The blue gear wheel must be on the right hand side and the pin must be inserted in the depression on the left hand side.

- 9** Break the chip card from the Plug'n'Print card. Insert the chip card in the plug socket on the left hand side next to the ink film tray.

- 10** Turn the blue gear wheel forward to tension the ink film. The ink film must not have any creases.

- 11** Close the device. Insert the paper tray in the opening provided for it behind the paper feeder. Insert paper again.

## Fixing a Paper Jam

- 1 Remove the paper from the paper feeder and take the paper tray out of the device.
- 2 Open the device by lifting the panel using grip in the centre and folding it up.

- ⚠** Lock the cover of the device completely into place when opening the device. You could be injured if the cover falls while you are working on the device.

- 3 Carefully pull the paper out.

- 4 Turn the blue gear wheel forward to tension the ink film. The ink film must not have any creases.

- 5 Close the device. Insert the paper tray in the opening provided for it behind the paper feeder. Insert paper again.

## Fixing a Document Jam

- 1 Remove the paper from the paper feeder and take the paper tray out of the device.
- 2 Open the device by lifting the panel using grip in the centre and folding it up.

**⚠** Lock the cover of the device completely into place when opening the device. You could be injured if the cover falls while you are working on the device.

- 3 Open the scanner cover and the cover of the automatic document cover by first pushing the support (A) and then the support (B) inside. The cover (C) folds below.

- 4 Carefully pull the document to the front or to the back out of the device.

- 5 Close the scanner cover and the cover of the automatic document feeder. Both the supports must securely snap into place.

- 6 Turn the blue gear wheel forward to tension the ink film. The ink film must not have any creases.

- 7 Close the device. Insert the paper tray in the opening provided for it behind the paper feeder. Insert paper again.

## Cleaning

**⚠** Unplug the device from the power socket before cleaning it. Use a soft, lint-free cloth. Never use liquid or easily flammable cleansers (sprays, abrasives, polishes, alcohol, etc.). Do not allow any moisture to reach the interior of the device.

**💡** Special fax cleaning sheets are available as accessories from our call centre. Insert a sheet into the document feeder. Press **STOP**; the page is ejected. Repeat this process at a few times.

- 1 Remove the paper from the paper feeder and take the paper tray out of the device.
- 2 Open the device by lifting the panel using grip in the centre and folding it up.

**⚠** Lock the cover of the device completely into place when opening the device. You could be injured if the cover falls while you are working on the device.

- 3 Open the scanner cover and the cover of the automatic document cover by first pushing the support (A) and then the support (B) inside. The cover (C) folds below.

- 4 Lightly wipe the upper side of the scanner glass (A) and the lower side of the document feeder/scanner film (= white plastic plate) (B) with a cloth.

- 5 Clean the feed roller (A) and the underside of the support pad of the feeder roller (B) with a soft, lint-free cloth moistened with cleaning alcohol (96 percent). Rotate the feed roller; You must clean the entire roller.

- 6 Close the scanner cover and the cover of the automatic document feeder. Both the supports must securely snap into place.

- 7 Turn the blue gear wheel forward to tension the ink film. The ink film must not have any creases.

- 8 Close the device. Insert the paper tray in the opening provided for it behind the paper feeder. Insert paper again.

## Displaying the battery charge

The charge indicator on the display shows the charge level of the battery. If the charge is too low, the display illumination is switched off and the hands-free function is not available. Place the cordless telephone into the charging station.

## Changing the batteries in the cordless telephone

- 1 Press and hold  (at least two seconds) for switching off the cordless telephone.
- 2 Open the battery compartment on the backside of the cordless telephone by pulling the cover down.

- 3 Remove the old batteries.

The batteries used should be disposed of according to the recycling regulations of your country.

- 4 Insert the new batteries in the battery compartment with the positive and negative poles as shown in the picture in the battery compartment.

**⚠ Never** use non-rechargeable batteries in the cordless telephone. Follow the specifications in the technical data.

- 5 Place the cover on the battery compartment and slide it upward until it snaps into place.
- 6 Place the cordless telephone into the charging station.

**⚠** Never place the cordless telephone into the charging station without batteries.

**💡** Leave the cordless telephone in the charging station for at least twelve hours. The batteries will heat up slightly during charging; this is not dangerous.

## Checking the Firmware Version

- 1 Press **OK**, **4** **7** and **OK**.
- 2 The model designation and the configured country appear on the display.
- 3 Confirm with **OK**.
- 4 The information on the firmware version of the device is displayed.
- 5 Confirm with **OK**.

## Using Service Codes

The service codes delete all the changed settings and your device is reset to factory settings. It may be possible that the device with the changed settings reacts differently than expected.

**⚠** Only use the service codes if this is absolutely necessary. Some service codes also delete saved messages and telephone book entries.

1 Press **OK**, **4** **5** and **OK**.

2 Enter a service code:

**7** **1** **1** **7**—Deletes all changed settings and saved data. The device is reset to factory settings and the initial installation process is started.

**7** **1** **4** **0**—Deletes all changed settings. Saved data and telephone book entries remain intact.

**7** **2** **2** **7**—Deletes saved faxes, when there are problems with printing.

3 Confirm with **OK**.

4 Using **▲/▼** select **SURE: YES**.

5 Confirm with **OK**.

**⚠** If you have entered the incorrect code, you can cancel the entry with **SURE: NO**.

## Power Cycling

If a problem occurs that cannot be corrected with the instructions in this user manual (see also the help below), follow the steps given here.

1 Pull out the power plug.

2 Wait at least ten seconds, then plug the power plug back into the socket.

3 If the error occurs again, please contact our technical customer service or your retailer. Follow the instructions on the display and on the error report.

General information	
The time and date flash on the display.	You must check the time and date after a short power failure. Confirm using <b>OK</b> .
Problems when faxing or printing	
Faxes sent are of poor quality.	Change the resolution from <b>RESOL.: STANDARD</b> to <b>RESOL.: FINE</b> or <b>RESOL.: PHOTO</b> . Change the contrast. Clean the scanner and the document feed slot. Test the device by making a copy of the document. If the device is in order, the fax machine of the recipient is defective.
The device produces black lines when sending or printing.	Clean the scanner and the document feed slot.

<b>Problems when faxing or printing</b>	
Copy is blank.	Insert the documents face up into the document feeder.
Printing is interrupted.	Paper or document jam, no paper or ink film. Follow the instructions on the display and in the error report. There could be a small pause after printing several pages. The device continues printing automatically.
No printing	Check if you have inserted clamped paper correctly. The lever on the right hand side next to the paper feeder must be folded backwards.
Documents are not properly fed.	Clean the scanner and the document feed slot.

<b>Problems with the connection</b>	
The device rings once, remains silent for a short while and starts ringing again.	This is absolutely normal. The fax switch checks the call after the first ring. If it is a voice call, the device continues to ring.
No dial tone	Check the installation of the device. Connect the telephone cable to the socket marked <b>LINE</b> . Insert the telephone plug into your telephone connection socket.
Fax transmissions are constantly interrupted.	Try to send the fax manually: Press <b>⏏</b> and dial the number. If the recipient is using an answering machine, wait until you hear a whistling tone. Press <b>START</b> . It is possible that the recipient's machine is not ready to receive.
You hear a whistling tone or silence in the handset.	The call is a fax: Press <b>START</b> on the device. In addition, press <b>*[5]</b> on the telephone. Hang up.
No fax reception or a short fax audio signal as message on the answering machine	Using function 51, set the number of rings for the fax switch to 4 and the total number or the number of rings for the answering machine (model dependent) to 5 (see Page 38). You cannot simultaneously use the answering machine facility of your telephone service provider (= voice-mail box) and receive faxes on your devices(see page 43).

<b>Problems with the Cordless Telephone</b>	
Cordless telephone does not function or does not function as expected. Display shows only the battery charge.	Check if the cordless telephone is functioning and is registered with the device. Switch the cordless telephone off. Open the battery compartment on the backside. Remove the batteries and insert them again. Close the battery compartment and switch the cordless telephone on again.
No dial tone	The cordless telephone is not registered with the device or is out of range.
The cordless telephone cannot be switched on.	Place the cordless telephone into the charging station.
The cordless telephone cannot be switched on after 12 hours in the charging station.	Change the batteries in the cordless telephone (also see Chapter Service, Page 49).
