- USB connectivity for making calls via laptops

Portable and convenient

- Slim and compact design for high portability everywhere
- Slim and light travel case to take it anywhere
- Up to 8 hours of battery life and USB cable recharging

PHILIPS

WeCall Bluetooth conference speaker
Bluetooth® and USB Superior sound, Built-in battery, For iPhone

Highlights

Perfect voice pick up

Four omni-directional microphones enable 360 degree voice pick up from up to 5 metres away, for clear and natural communication without raising your voice or leaning over a speaker - even in the most difficult environment.

Advanced noise cancelation

Advanced noise cancelation with four omni-directional microphones around the speaker enables multiple people to join the conversation and ensures voices can be heard in the clearest way. Stationary and non-stationary noises are suppressed for a noise-free conversation.

Advanced echo suppression

Very fast and advanced echo suppression for a revolutionary hands-free, full-duplex conversation a few metres from the speaker. An adaptive algorithm is designed to eliminate echoes and prevent howling due to feedback from loudspeaker to microphone, which is especially ideal in difficult acoustical conditions and reverberant rooms such as offices with little furniture.

Powerful built-in speaker

2-inch high sensitivity, low distortion neodymium magnet speaker with specially designed low-profile cone resulting in a wide-range response and wide-dispersion directivity. Talk while walking around the room and from anywhere in the room with no drop in quality. Or perfect for music playback.

Advanced audio technologies

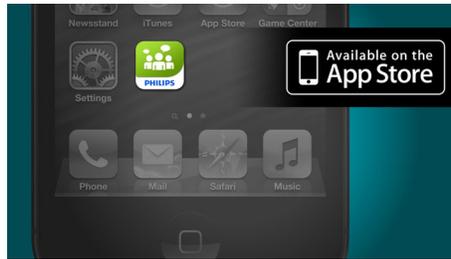

Advanced HD audio technology for natural voice

Seamless Bluetooth connections

Seamless connectivity via auto pairing with iPhones and any Bluetooth enabled smartphones, computers and laptops, with up to 10 metres wireless range.

Intuitive conference calls

The handy Philips WeCall app manages conference call numbers and even enters access codes directly from your calendar, making it a breeze to dial and access calls from your calendar at the push of a button.

Built-in LED indicators

LED status indicators for call, charging and mute functions

USB connectivity

USB connectivity enables you to use the speaker for making calls from laptops with Plug and Play functionalities and automatic device detection.

AECS7000/00

Slim and compact design

The slim and portable design allows you to take the conference speaker wherever you want. It easily fits in your laptop bag for use while on the go, working from home, hotel room, or visiting a business partner.

Long built-in battery life

Up to 8 hours battery life while being used on a call, and up to 200 hours on standby. The USB cable included allows for very easy and convenient charging.

Travel case for easy transport

Durable and ultra light travel case helps to protect the speaker while travelling, with an elegant and functional design for a professional appearance.

CES 2014 Innovation Awards

2014 CES Innovations
Design and Engineering
Award

Sleek, compact, filled with innovative and intuitive technology, the Philips WeCall Bluetooth® conference speaker AECS7000 is ideal for conference calls on your smartphone. Four omni-directional microphones and echo cancellation ensure clear conversations even when 16 feet away.
